Assessment Tasks

1 Researching Youth - Research paper

Assessment Type

Written Assessment

Task Description

The Research Paper

The task asks you to prepare a **research paper**. To do this, you must first research a chosen topic and then prepare and present a structured paper (essay) that:

- defines and explains your chosen topic
- identifies how and why the issue impacts adolescents
- discusses the implications for secondary school teachers' classroom practice
- and makes recommendations for classroom practice and/or a whole school approach.

Step 1

Choose an issue or concern specific to students in the junior secondary phase of their education.

Examples may include, but are not limited to:

- Mental Health
- Risk taking behaviour e.g. Alcohol, drugs or crime
- Equity and discrimination
- Rural isolation
- Access to technology
- Youth (sub)culture/s
- Body image, self-identity, sexuality
- Disengagement from learning or school

You will notice that many of these topics overlap with the unit topics from the first four weeks of the term. Please feel

free to use the resources you are provided with, however you will need to also conduct your own research.

Step 2

You will **research this topic** using the library on-line materials and your textbook. It is suggested that you read information from at least seven different sources prior to beginning the construction of your paper. From your readings, define the boundary of your paper. For example, you might choose the topic of youth subcultures. This topic is too broad for a 2000 word paper. So to narrow the topic you might consider a specific topic within youth subcultures, e.g. the impact of being a 'gamer' on students' learning and their level of engagement in school.

Please check your topic with your lecturer by sending them an email.

There will be more information on the research process provided through the 'Links to Assessment' on the Moodle site.

Step 3

Write your paper. Make sure that you cover each of the following sections in your paper. You may use headings to assist you in structuring your paper.

The first section should **provide an explanation** and define your chosen topic.

The second section should make up the bulk of your paper as you **discuss the issue and explain how** this topic impacts junior secondary school learners as stated in your research.

You should make sure that you connect the impact of the issue on the Adolescents' to **the implications** on the levels of engagement and learning outcomes for the learners.

Conclude by making recommendations for how teachers and schools can respond effectively to address the implications of the topic and assist young people to achieve at school based on your research findings on teaching youth and your own personal philosophy on secondary school teaching.

Support all of your work with links to current research in the area of adolescent development. This research must include recent journal articles, textbooks and professional readings. It is expected that some of the sources you use will be from beyond the set readings for this course.

The paper is to be written in third person and follow the recommended structure provided by the ALC.

Length: 2000 words

WORD COUNT for written assignments:

The word count is considered from the first word of the introduction to the last word of the conclusion. It excludes the cover page, abstract, contents page, reference page and appendices. It includes in-text references and direct quotations.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
