

EDSE13001 Culinary Science for Teachers

Term 2 - 2019

Profile information current as at 17/05/2024 02:23 pm

All details in this unit profile for EDSE13001 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit explores why foods are prepared the way they are, why certain changes take place in them after undergoing cooking and how this knowledge may be used to improve the final product. Knowledge and skills acquired in this unit form an integral component to the teaching of Home Economics and its related subjects in secondary schools. This area of study aligns with the Home Economics syllabi and provides opportunities to develop strategies for designing activities that will challenge and engage students in the classroom and beyond.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 7

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2019

- Mixed Mode

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:
Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Portfolio**

Weighting: 50%

2. **Practical Assessment**

Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Evaluation Survey

Feedback

The structuring of two weeks for each experiment/theory was very helpful. It allowed me to stay on top of the workload.

Recommendation

Maintain fortnightly experiments.

Feedback from Student Evaluation Survey

Feedback

Too many experiments at Res School and not enough time to really evaluate the outcomes.

Recommendation

Evaluate number of experiments conducted at Res School.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Design and perform a series of food based experiments which develop practical skills associated with cookery and recipe construction.
2. Apply appropriate problem solving procedures to plan, sequence, implement and assess food production processes used in recipe construction.
3. Recognise and apply skills, sequences and procedures using design and problem solving processes required for teaching a range of cookery skills.
4. Critically evaluate specific applications of recipes and ingredients used in the production of edible foods.
5. Apply appropriate workplace health and safety practices for cookery.

This unit aligns with the following Australian Professional Standards for Teachers (Graduate Career Stage):

Standard 2: Know the content and how to teach it

2.1 Content and teaching strategies of the teaching area

2.2 Content selection and organisation

Standard 4: Create and maintain supportive and safe learning environments

4.4 Maintain student safety

Standard 7: Engage professionally with colleagues, parents/carers and the community

7.2 Comply with legislative, administrative and organisational requirements

Schedule

Week 1 - 15 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Water	Chapter 1 - Measurements and Units (pp. 1-21)	Conduct Experiment 3.4 (p.57) Orange Juice Yield Test
	Chapter 2 - Basic Food Chemistry (pp. 23-32)	
	Chapter 3 - Water in Culinary Transformations (pp. 33-79)	

Week 2 - 22 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Water	Chapter 1 - Measurements and Units (pp. 1-21)	Submit draft Orange Juice Yield Test Lab Report
	Chapter 2 - Basic Food Chemistry (pp. 23-32)	
	Chapter 3 - Water in Culinary Transformations (pp. 33-79)	

Week 3 - 29 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Fats & Oils	Chapter 6 – Fats & Oils in Culinary Transformations (pp.135-195)	Conduct Experiment 6.4 (p. 215) Pastry Making: Sugar Cookie Recipe
Week 4 - 05 Aug 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Fats & Oils	Chapter 6 – Fats & Oils in Culinary Transformations (pp.135-195)	Submit draft Sugar Cookie Lab Report
Week 5 - 12 Aug 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Carbohydrates Pigments: Acids & Bases	Chapter 4 – Carbohydrates in Culinary Transformations (pp. 81-133)	Conduct Experiment (not from textbook - see Moodle for details) Acids & Bases
Vacation Week - 19 Aug 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Week 6 - 26 Aug 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Carbohydrates Pigments: Acids & Bases	Chapter 4 – Carbohydrates in Culinary Transformations (pp. 81-133)	Submit draft Acids & Bases Lab Report Commence preparation for Assessment Task 2 "Play with Your Food" Experiment and Teacher Demonstration
Week 7 - 02 Sep 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Proteins	Chapter 5 – Proteins in Culinary Transformations (pp. 135-195)	Conduct Experiment 5.3 (p.153) Steak
Week 8 - 09 Sep 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Proteins	Chapter 5 – Proteins in Culinary Transformations (pp. 135-195)	Submit draft steak Lab Report
Week 9 - 16 Sep 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Proteins	Chapter 5 – Proteins in Culinary Transformations (pp. 135-195)	Optional - Conduct Experiment 5.9 (p. 181) Gels Finalise Assessment Task 1 ready for submission Email ingredients list for Assessment Task 2(A) to Unit Coordinator by 4:00PM Tuesday 17 September 2019
Week 10: Residential School - 23 Sep 2019		
Module/Topic	Chapter	Events and Submissions/Topic

Compulsory attendance at Residential School Tuesday 24 September to Friday 27 September 2019 (all days inclusive)

Textbook required to conduct experiments at Residential School

Practical Cookery Skills will be assessed across all 4 days of the Residential School.

Friday 27 September 2019
Assessment Task 2(A)
Demonstration, theory statement, workplan (submit via Moodle and hand in hard-copy to lecturer)

Laboratory Reports & Resources
 Due: Week 10 Monday (23 Sept 2019) 11:45 pm AEST
Practical Cookery, Teacher Demonstration & Resources Due: Week 10 Friday (27 Sept 2019) 9:00 am AEST

Week 11 - 30 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Proteins	Chapter 5 – Proteins in Culinary Transformations (pp. 135-195)	

Week 12 - 07 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
Professional Reflections		Review demonstration video for professional reflection

Review/Exam Week - 14 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
		Monday 15 October 2019 submit Assessment Task 2(B) Professional Reflection via Moodle

Exam Week - 21 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Residential School

Week 10 Tuesday to Friday
 24-27 September 2019
 9:00am - 4:30pm daily (all days inclusive)
 CQUniversity Rockhampton City Campus
 Trade Training Kitchen and Willby's Restaurant

Assessment Tasks

1 Laboratory Reports & Resources

Assessment Type

Portfolio

Task Description

Rational

To teach food related topics, you need to know the chemical reactions and processes that occur when food is prepared, cooked and stored. A knowledgeable, successful and inspiring food educator needs to possess the vocabulary, skills and abilities to construct and deliver content in fun and challenging ways. An appropriate teaching strategy to explain

complex scientific processes is to perform laboratory testing and experiments on food. This experimental approach complements the 'hands on' and practical approach that underpins learning and teaching in food contexts.

The Task: 4 Food Experiments

Conduct 4 experiments as directed, drawn from the textbook and/or Moodle unit material. Each experiment will need to be completed at your home. The experiments are:

1. Water: Orange Juice Yield Test
2. Fats & Oils: Pastry Making
3. Carbohydrates: Acids & Bases: Pigments
4. Proteins: Steak
5. Proteins: Gels (optional extension experiment)

What to Submit

Complete 4 laboratory reports and accompanying resources. You are expected to use the proforma Laboratory Report and Resources sheets provided which include:

1. Experiment Objective
2. Equipment and Ingredients
3. Method
4. Results tables
5. Discussion, comparison and application of theory
6. Glossary of key terms
7. 50-100 word theoretical explanations of 3 key procedures or chemical processes for each experiment with accompanying photographs

Detailed task descriptions, weekly study schedule, criteria sheets and proformas for Laboratory Reports and Resources are located on the Moodle site for this unit.

Weighting 50%

Assessment Due Date

Week 10 Monday (23 Sept 2019) 11:45 pm AEST

Drafts due fortnightly as indicated in schedule. All final reports uploaded via Moodle by Monday 11:45PM 23 September 2019

Return Date to Students

Fortnightly draft submissions provide formative feedback to students. Summative feedback provided 2 weeks after submission.

Weighting

50%

Minimum mark or grade

Pass

Assessment Criteria

- Apply accurate and appropriate use of culinary science vocabulary and key concepts
- Explore teaching and learning challenges within the culinary science environment
- Construct resources appropriate for theoretical and practical culinary science lessons

Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

Submission

Online

Submission Instructions

Use correct file name extensions. Compress all photographs. Submit via Moodle.

Learning Outcomes Assessed

- Design and perform a series of food based experiments which develop practical skills associated with cookery and recipe construction.
- Apply appropriate problem solving procedures to plan, sequence, implement and assess food production processes used in recipe construction.
- Recognise and apply skills, sequences and procedures using design and problem solving processes required for teaching a range of cookery skills.
- Critically evaluate specific applications of recipes and ingredients used in the production of edible foods.
- Apply appropriate workplace health and safety practices for cookery.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Cross Cultural Competence
- Ethical practice

2 Practical Cookery, Teacher Demonstration & Resources

Assessment Type

Practical Assessment

Task Description

Rational

Food educators not only require the skills and knowledge to demonstrate specific practical cookery skills, but also have the confidence to simultaneously deliver theory to an audience. A demonstration provides a "snap shot" of a complex task. Food experiments are a fun and interactive way to engage an audience with content; but requires considerable organisation and preparation. Practical Home Economics, Food & Nutrition or Food Technology classes are set apart from many other school subjects because of their 'hands on' pedagogy. Especially relevant in busy kitchen environments, students need to understand explicitly what is required and expected. To scaffold (coach) students through new cookery knowledge and techniques, a "show and tell" demonstration usually precedes each practical cookery lesson and can take 10 minutes or a whole lesson to complete.

The Tasks

Part A:

1. Practical: Compulsory attendance at Residential School and completion of all practical cookery tasks as instructed
2. Research: theory statement that explains the scientific procedures and processes for "Play with your Food" themed experiment (500 words)
3. Prepare: Workplan including preparation, ingredients, costing, estimated timing, utensils, and method required to deliver demonstration
4. Present: 10 minute teacher demonstration to your peers

Part B:

5. Reflect: Professional self-reflection on practical, research, preparation and performance (500 words)
- Support for this task will be provided via weekly Zoom tutorials and detailed task descriptions, weekly study schedule, criteria sheets and exemplars are located on Moodle.

Weighting 50%

Important Note: Attendance at all 4 days of Residential School is compulsory. Non-attendance will result in a failed grade for this unit.

Assessment Due Date

Week 10 Friday (27 Sept 2019) 9:00 am AEST

Compulsory Attendance (all days inclusive) at Residential School; Theory Statement, Workplan & Demonstration Due Friday 27 September 2019; Reflection due by 11:45PM Friday 11 October 2019

Return Date to Students

Feedback will be given during the Residential School and 2 weeks after submission.

Weighting

50%

Minimum mark or grade

Pass

Assessment Criteria

- Create a challenging and engaging food science activity appropriate for school students
- Build teacher confidence and deliver a teacher demonstration to a live audience
- Simultaneously demonstrate and verbally express technical cookery skills and chemical reactions theory
- Apply complex preparation and planning procedures to deliver a cookery demonstration
- Research and apply accurate and appropriate culinary science theory
- Engage in constructive peer feedback
- Critically reflect on professional practice and performance

Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

Submission

Offline Online

Submission Instructions

Upload theory statement & workplan via Moodle and hand in hard-copy on Friday at Res School. Reflection submitted via Moodle by Friday 11 October 2019

Learning Outcomes Assessed

- Design and perform a series of food based experiments which develop practical skills associated with cookery and recipe construction.
- Apply appropriate problem solving procedures to plan, sequence, implement and assess food production processes used in recipe construction.
- Recognise and apply skills, sequences and procedures using design and problem solving processes required for teaching a range of cookery skills.
- Critically evaluate specific applications of recipes and ingredients used in the production of edible foods.
- Apply appropriate workplace health and safety practices for cookery.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Information Technology Competence
- Cross Cultural Competence
- Ethical practice

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
