

EDSE13002 *Industrial Skills*

Term 1 - 2017

Profile information current as at 18/05/2024 12:57 am

All details in this unit profile for EDSE13002 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit investigates the nature and functions of available resources, through the application of inquiry, design and problem-solving methodologies for a range of industrial skills. It requires the student to identify and understand a problem or need, select appropriate resources and strategies that may solve the problem, then implement a plan and evaluate the outcome. While participating, students are exposed to a range of intellectual challenges which develop practical skills associated with welding and thermal cutting, safety equipment and safety to current Australian Standards. Welding and Thermal Cutting form the basis of the range of Industrial skills developed over the duration of the unit and involves the design of engineered artefacts, where safety is paramount. Through practical workshops and associated theory, students will apply the knowledge and skills of industrial skills necessary to teach Industrial Technology and Design in the senior years of schooling.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 7

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2017

- Distance

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Practical Assessment**

Weighting: 50%

2. **Portfolio**

Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Students at Residential School

Feedback

Practical workshops at Residential School are excellent.

Recommendation

Maintain intensive Residential school workshops

Action

Continued with workshops and developing content and learning experiences.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Plan and develop a series of design based activities for construction which develop practical skills associated with hand and power tools, machinery, safety and equipment.
2. Apply the use, development and impact of design concepts and problem solving through the construction of a series of design based activities.
3. Investigate how to plan, sequence, implement and assess design application processes used in the production of projects incorporated in the industrial technology and design teaching area.
4. Critically evaluate specific applications of tools and equipment used in the manufacture of products for welding and thermal cutting.
5. Apply appropriate workplace health and safety and maintenance practices when using hand and power tools.

This unit aligns with the following Australian Professional Standards for Teachers (Graduate Career Stage):

Standard 2: Know the content and how to teach it

2.1 Content and teaching strategies of the teaching area

2.2 Content selection and organisation

Standard 4: Create and maintain supportive and safe learning environments

4.4 Maintain student safety

Standard 7: Engage professionally with colleagues, parents/carers and the community.

7.2 Comply with legislative, administrative and organisational requirements;

Schedule

Week 1 - 06 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
Workplace Health & Safety Principles.	Step 1- Read: Engineering: An Industry Study pp.1-31, Apply Principles of OHS in the Work Environment Step 2- Watch the Power Points and video clips. Step 3- Answer the Quiz.	

Week 2 - 13 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Oxywelding.

Read pp.70-83: Engineering- An Industry Study, Fundamentals of Gas Welding and Cutting PDF, Welding Glossary, The Principles of Welding and Oxy Document found in Resource Folder.

View the power point presentations and watch the video clips. There is also a PDF on The Principles of Welding that you should read.

Answer this weeks Quiz.

Week 3 - 20 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
Manual Metal Arc Welding (MMAW).	Readings for this topic are pp.84-93 Engineering- An Industry Study, MMAW word doc, Principles of Welding PDF, Welding Glossary. View Power Point. Complete this week's Quiz.	

Week 4 - 27 Mar 2017

Module/Topic	Chapter	Events and Submissions/Topic
GMAW Welding	Readings for this week are pp.96-110 Engineering- An Industry Study, Principles of Welding PDF, Power Point, Welding Glossary. Watch video clips. When finished, complete this week's Quiz.	

Week 5 - 03 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
GTAW (Gas Tungsten Arc Welding).	Readings for this topic are Principles of Welding pp.51-55, Welding Glossary, Power Point. Watch video clips. Complete Quiz.	

Vacation Week - 10 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
Enjoy your break		

Week 6 - 17 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Oxy Cutting and Plasma Cutting

Readings for this week's topic can sourced from PDFs, Power Points and video clips. Complete this week's Quiz.

Week 7 - 24 Apr 2017

Module/Topic	Chapter	Events and Submissions/Topic
Engineering Measurements	Readings for this week are P110 - P126 Engineering - An industry Study. Complete readings. Answer Quiz	

Week 8 - 01 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Weld joints & types.	Readings are from Engineering- An Industry Study Textbook pp.90-92 and PDFs found in this week's folder. Complete readings. Answer this week's Quiz.	

Week 9 - 08 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Mechanical cutting and workshop machines.	Readings for this week are P127 - 190 Engineering-An Industry Study Complete readings Answer quiz.	

Week 10 - 15 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Power tools & Hand held operations.	Readings for this week are P191 - 208 Engineering-An Industry Study Complete Readings. Answer Quiz.	

Week 11 - 22 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Review your readings from the last 10 weeks. Also continue working on your assignment which is due next week.		

Week 12 - 29 May 2017

Module/Topic	Chapter	Events and Submissions/Topic
Assignment Due: 2/06/2017		Quizzes and Unit Plan Due: Week 12 Friday (2 June 2017) 5:00 pm AEST

Review/Exam Week - 05 Jun 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 12 Jun 2017

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Residential School 26/06/17 -
28/06/17 if needed 29/06/17
- 01/07/17

During this week students will be assessed on their knowledge & understanding of processes and procedures as well as their skills.

Students will be required to complete a number of school examples aligned to certain year levels.

Students will be required to wear steel capped safety boots, long sleeve shirts and long pants.

Assessment Tasks

1 Residential School

Assessment Type

Practical Assessment

Task Description

Monday 26th - Wednesday 28th June 2017 if needed Thursday 29th - Saturday 1st July
CQUniversity Rockhampton City Campus

Residential school introduces students to the welding and thermal cutting processes being taught in schools today. Students will be assessed on the quality and presentation of their welding and thermal cutting examples, in addition to their knowledge and understanding and application of welding & thermal cutting processes, and their ability to work independently with limited assistance.

Residential School gives students the opportunity to develop their hand skills, knowledge & understanding of welding & thermal cutting procedures and processes.

Assessment Due Date

Practical projects assessed over the duration of Residential School

Return Date to Students

Results Finalised at Residential School

Weighting

50%

Assessment Criteria

Students will be assessed over the duration of the Res School in relation to the following:

- Practical expertise
- Quality and presentation of projects
- knowledge and understanding and application of workshop processes
- ability to work independently with limited assistance

Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

Submission

Offline

Submission Instructions

Assessment taken during Res School

Learning Outcomes Assessed

- Plan and develop a series of design based activities for construction which develop practical skills associated with hand and power tools, machinery, safety and equipment.
- Apply the use, development and impact of design concepts and problem solving through the construction of a series of design based activities.
- Investigate how to plan, sequence, implement and assess design application processes used in the production of projects incorporated in the industrial technology and design teaching area.
- Critically evaluate specific applications of tools and equipment used in the manufacture of products for welding and thermal cutting.
- Apply appropriate workplace health and safety and maintenance practices when using hand and power tools.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Information Technology Competence
- Cross Cultural Competence
- Ethical practice

2 Quizzes and Unit Plan

Assessment Type

Portfolio

Task Description

Assessment Item 1 A

10 Multi-Choice Quizzes: 20% total marks

Quizzes will be based on weekly readings from the assigned text book. Quizzes will be available on the Moodle website each Monday and remain open until the following Monday at midnight. Students will be allowed a maximum of 1 hour and two attempts to complete each quiz. The highest scoring attempt will be used for grading.

Please note that results from all 10 quizzes contribute to the overall mark of 20%

Assessment Item 1B

Written Assignment: Unit Plan due: 2/06/17 30% total marks

Students are required to develop a Unit Plan and Project suitable for either a Year 11 or 12 Engineering class.

The assignment will consist of a **Unit Plan** that has a: **Rationale** for the Project, what **Year Level** the Project is targeting, an accurate **Dimensioned Working Drawing** of the Project, a **Detailed Work Procedure**, **Lesson Plans** for the duration of the Project and a **Criteria Sheet**.

An example of an assignment has been made available under the Resources Tab on the Moodle Website.

Assessment Due Date

Week 12 Friday (2 June 2017) 5:00 pm AEST

Return Date to Students

Assessment will be returned after moderation and grade certification

Weighting

50%

Assessment Criteria

Students are assessed on the following criteria:

- Ability to present graphical information
- ability to express and develop an idea
- Ability to present work effectively

Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

Submission

Online

Submission Instructions

Students are to upload their assessment in the Moodle course Site

Learning Outcomes Assessed

- Plan and develop a series of design based activities for construction which develop practical skills associated with hand and power tools, machinery, safety and equipment.
- Apply the use, development and impact of design concepts and problem solving through the construction of a series of design based activities.
- Investigate how to plan, sequence, implement and assess design application processes used in the production of projects incorporated in the industrial technology and design teaching area.
- Critically evaluate specific applications of tools and equipment used in the manufacture of products for welding and thermal cutting.
- Apply appropriate workplace health and safety and maintenance practices when using hand and power tools.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Information Technology Competence
- Cross Cultural Competence
- Ethical practice

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
