General Information

Overview

The focus of this unit is teaching and learning in the senior secondary school (Years 11 and 12). There is a specific focus on pedagogical approaches and thinking skills applicable for senior teaching areas. The influences on senior secondary school curriculum frameworks from key stakeholders are critically examined. You will also analysis and interpret subject curriculum documents in order to plan and implement effective units of work that utilise pedagogical approaches that develop the thinking skills and processes required for discipline teaching areas. Other areas examined include curriculum development, teaching and learning resources, teaching strategies, pedagogical approaches, assessment and school work programs relevant to the pre-service teacher's discipline teaching areas. Critical use is made of information and communication technologies, curriculum and policy documents, higher order thinking strategies and appropriate content in order to design quality learning experiences that involve explicit teaching of the subject discipline area in the senior schooling context.
