General Information

Overview

The focus of this unit is on preparing pre-service teachers to teach in junior secondary school contexts (Years 7 - 9). In this unit, emphasis is placed on helping you understand strategies and processes to ensure the bridge between primary and secondary school is safe, strong and consistent for all students. Teaching in junior secondary school contexts requires a particular pedagogical approach where learned information must be meaningful and links to the world beyond the classroom are made. You will engage with the six guiding principles of junior secondary school teaching, namely, distinct identity; quality teaching; student wellbeing; parent and community involvement; leadership; and, local decision-making. Within this context, the role secondary school teachers have in developing effective, useful and efficient strategies that can be used in any discipline area to increase student understanding and improve overall achievement and motivation will be explored.

Assessment Tasks

1 Assessment Task 1 - Research Paper

Assessment Type

Written Assessment

Task Description

The task asks you to prepare a **research paper**. To do this, you must first research a chosen topic and then prepare and present a structured paper (essay) that:

- defines and explains the topic
- identifies how and why the issue impacts adolescents
- discusses the implications for the education of secondary aged students and their teachers
- and makes recommendations for classroom practice and/or a whole school approach.

Step 1

Choose an issue or concern specific to students in the secondary phase of their education.

Examples may include, but are not limited to:

- Mental Health
- Risk taking behaviours e.g. Alcohol, drug, crime
- Equity and discrimination
- Access to technology
- Youth (sub)culture/s
- Body image, self-identity or sexuality
- Any other issue specific to adolescence that results in disengagement from learning or school.

You will notice that many of these topics overlap with course topics in the first four weeks of the term.

Step 2

Research the topic using the library on-line materials and the various resources from the weekly readings. It is suggested that you read information from at least seven different sources prior to beginning the construction of your paper. From your readings, define the boundary of your paper. For example, you might choose the topic of youth subcultures. This topic is too broad for a 2000 word paper. So to narrow the topic you might consider a specific topic within youth subcultures, e.g. the impact of being a 'gamer' on students' learning and their level of engagement in school. Please check your topic with your lecturer via an email.

There will be more information on the research process provided throughout the Links to Assessment on the Moodle site.

Step 3

Write the research paper. **This step includes considering a structure, writing a first draft, editing and referencing a second draft to produce a final piece for submission.**

The following sections should guide the writing of your research paper:

Provide an explanation of your defined chosen topic based on the literature.

Discuss and justify how and why this topic impacts adolescents as stated in the research.

Discuss the implications the topic has on the levels of engagement and learning outcomes for youth and their teachers' practice.

Conclude by making recommendations for how teachers, whole schools and education systems could respond effectively to address the implications of the topic and assist young people to achieve at school based on your research and what the content in this course suggests as best practices for secondary school teaching.

Support all of your work with links to current research in the area of adolescent development. This research must include recent journal articles, textbooks and professional readings. It is expected that most of the sources you use will be from beyond the set readings for this course.

The paper is to be written in third person and follow the recommended structure provided by the ALC.

Length: 2000 words +/-10% not including the reference list.

This research assessment allows you to demonstrate the following three Professional standards:

Professional Standard 1.1 Physical, social and intellectual development and characteristics of students - *Demonstrate knowledge and understanding of physical, social and intellectual development and characteristics of students and how these may affect learning.*

Professional Standard 1.2 Understand how students learn - *Demonstrate knowledge and understanding of research into how students learn and the implications for teaching.*

Professional Standard 3.6 Evaluate and improve teaching programs - *Demonstrate broad knowledge of*

strategies that can be used to evaluate teaching programs to improve student learning.
