

ENAE12013 *Electrical Components and Circuit Analysis*

Term 1 - 2023

Profile information current as at 26/03/2023 10:22 pm

All details in this unit profile for ENAE12013 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to modelling electrical components and systems. You will apply theorems and network reduction techniques to DC and AC circuits, and apply problem-solving techniques in the analysis of AC and DC circuits. You will also cover the concepts of transient response, and Laplace transform and transfer functions. You will apply laboratory techniques and appropriate software tools to the analysis of electrical circuits. Use fundamental electrical engineering language in context and document the process of modelling and analysis. You will present information, communicate, work and learn in a professional manner. Mix mode students must complete the practical activities by attending residential school.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prereq: (ENAG11002 Energy & Electricity or ENEG11009 Fundamentals of Energy & Electricity) and MATH11160 Technology Mathematics.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2023

- Mixed Mode

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **In-class Test(s)**

Weighting: 25%

2. **Online Quiz(zes)**

Weighting: 10%

3. **Practical Assessment**

Weighting: 25%

4. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from In-class

Feedback

providing individual attention, and keeping frequent engagement.

Recommendation

Provide the same level of engagement.

Feedback from In-class

Feedback

Students were appreciative for providing the tutorial solutions with appropriate scaffolding.

Recommendation

Provide same-level support.

Feedback from In-class

Feedback

Students were appreciative for providing prompt reply to forum posts and emails.

Recommendation

Maintain the same practice.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Solve electrical circuits using fundamental electrical theorems
2. Analyse and solve problems of Direct Current (DC) circuits using network reduction techniques
3. Model and analyse the transient behaviour of circuits with resistors, inductors and capacitors
4. Analyse and solve problems of Alternating Current (AC) circuits
5. Solve electrical circuit problems using S-domain circuit analysis techniques
6. Use appropriate software tools to simulate electrical circuits and verify the results by conducting laboratory experiments using safe work practices
7. Work individually and in a team to solve electrical circuit problems and produce professional laboratory documents.

The Learning Outcomes for this unit are linked with the Engineers Australia Stage 1 Competency Standards for Engineering Associates in the areas of 1. Knowledge and Skill Base, 2. Engineering Application Ability and 3. Professional and Personal Attributes at the following levels:

Intermediate

1.1 Descriptive, formula-based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the practice area. (LO: 1I 2I 3I 4I)

1.3 In-depth practical knowledge and skills within specialist sub-disciplines of the practice area. (LO: 7I)

1.4 Discernment of engineering developments within the practice area. (LO: 1I 7I)

2.1 Application of established technical and practical methods to the solution of well-defined engineering problems. (LO: 1I 2I 3I 4I 5I 6I)

2.3 Application of systematic design processes to well-defined engineering problems. (LO: 6I)

3.2 Effective oral and written communication in professional and lay domains. (LO: 7I)

3.4 Professional use and management of information. (LO: 7I)

3.6 Effective team membership and team leadership. (LO: 7I)

Advanced

1.2 Procedural-level understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the practice area. (LO: 2A 3A 4A 5A 6I)

Note: LO refers to the Learning Outcome number(s) which link to the competency and the levels: N - Introductory, I - Intermediate and A - Advanced.

Refer to the Engineering Undergraduate Course Moodle site for further information on the Engineers Australia's Stage 1 Competency Standard for Professional Engineers and course level mapping information

Schedule

Week 1 - 06 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Electrical Components and Modelling their Electrical Characteristics	1-7	
Week 2 - 13 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Nodal Analysis	8	Online Quiz 1 : (Progressive Test 1): Due Sunday 11:45 pm AEST Lab Quiz A: Due Sunday 11:45 pm AEST
Week 3 - 20 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Mesh Analysis	8	Lab Quiz B: Due Sunday 11:45 pm AEST
Week 4 - 27 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Network Theorems	9	Online Quiz 2: (Progressive Test 2): Due Sunday 11:45pm AEST Lab Quiz C: Due Sunday 11:45 pm AEST
Week 5 - 03 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Capacitors and Inductors	10-12	Lab Quiz 4 : Due Sunday 11:45 pm AEST
Vacation Week - 10 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Week 6 - 17 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Transient Behaviour of Electrical Components	10-12	In-class test (Online) starts at 2:00 pm (AEST) on Friday (21 Apr 2023)
Week 7 - 24 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Complex Numbers and Phasors	13-14	Online Quiz 3: (Progressive Test 3) : Due Sunday 11:45 pm AEST
Week 8 - 01 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Steady State Sinusoidal Analysis I	15-17	
Week 9 - 08 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Steady State Sinusoidal Analysis II	17-19	Practical and written assessment Due: Week 9 Friday (12 May 2023) 11:45 pm AEST
Week 10 - 15 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Power in AC circuits	20	Online Quiz 4 : (Progressive Test 4) Due Sunday 11:45 pm AEST
Week 11 - 22 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Laplace Transform	Unit Resource Online	

Week 12 - 29 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Circuit Analysis in s Domain	Unit Resource Online	

Review/Exam Week - 05 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 12 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

In this term we are not conducting a dedicated attendance compulsory residential school for Online (distance or Mixed mode) students in Rockhampton. However, we come up with number of alternatives while making sure that they will not discount student learning experiences. We believe it will be an attractive, cost-effective and convenient solution for Online (Distance or Mixed mode) students.

Option 1: Complete laboratory exercises by physically attending scheduled laboratory sessions with On-campus students in one of the campuses. (Bundaberg, Cairns, Gladstone, Mackay, or Rockhampton). Please refer to the unit Moodle site for further information.

Option 2: Online (Distance or Mixed mode) students can complete laboratory exercises at home without attending planned laboratory sessions if students can self-supply equipment and components required to complete laboratory exercises. Please refer to the unit Moodle site for further information.

Option 3: Online (Distance or Mixed mode) students can complete laboratory exercises at home without attending planned laboratory sessions if Online (Distance or Mixed mode) students purchase laboratory exercise kit (named as TAMKIT) from CQUniversity. This laboratory exercise kit (TAMKIT) has all the equipment required to complete laboratory exercises. However Online (Distance or Mixed mode) students need to purchase components listed in COMPKIT_ENAE12013 as well. Please refer to the unit Moodle site for further information.

Assessment Tasks

1 In-class test

Assessment Type

In-class Test(s)

Task Description

This assessment covers weekly topics from Week 1 to Week 5. Students are required to answer analytical and numerical questions to demonstrate their theoretical knowledge and analytical problem solving skills.

Students will attend in-class test **during Week 6**.

This **in-class test** will be carried out as **an Online Quiz** through the unit **Moodle** site.

Further information about In-class test will be provided in the unit Moodle site.

Assessment Due Date

Suggested date and time will be confirmed and notified via the unit Moodle site

Return Date to Students

Week 8 Monday (1 May 2023)

We strive to release the assessment marks in 2 weeks after due date

Weighting

25%

Minimum mark or grade

25% of allocated marks for this assessment

Assessment Criteria

In-class test will be graded using the following criteria:

- Correct answers
- All working must be shown

- Answers must be neat, tidy and legible
- Correct format
- Application of correct methods and procedures
- Discussion of answers
- All questions must be attempted
- Each question in the test will be assessed separately.
- Need to score more than 25% to PASS

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Solve electrical circuits using fundamental electrical theorems
- Analyse and solve problems of Direct Current (DC) circuits using network reduction techniques
- Model and analyse the transient behaviour of circuits with resistors, inductors and capacitors

2 Online Quizzes (Progressive Tests)

Assessment Type

Online Quiz(zes)

Task Description

The assessment is a set of online Progressive tests which can be accessed via the unit Moodle site. The progressive tests are an integral part of the study to test on the key concepts of each week. Details of the assessment can be found on the unit Moodle site at the beginning of the term. Each Progressive test will be available up to 2 weeks after the relevant week to allow students who cannot find time each week for study. For example Progressive test one will close at the end of week 2 and Progressive test 2 will close at end of week 5. All progressive tests must be completed by the end of week 10.

Each progressive test can be attempted several times, but the score for the Progressive test will be score for your first attempt. Correct answer for the Progressive test questions will be available immediately after you submit your answers. If you encounter any network access issues during the Progressive test, the unit coordinator should be notified at your earliest convenient.

Number of Quizzes

4

Frequency of Quizzes

Assessment Due Date

Suggested date and time will be notified and confirmed via the unit Moodle site

Return Date to Students

Results are available immediately after completion of each Progressive test

Weighting

10%

Minimum mark or grade

25% of allocated marks for this assessment

Assessment Criteria

Students must need to satisfactorily score more than 50% for the Online quizzes (Progressive test) to pass this unit.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Solve electrical circuits using fundamental electrical theorems
- Analyse and solve problems of Direct Current (DC) circuits using network reduction techniques
- Analyse and solve problems of Alternating Current (AC) circuits

- Solve electrical circuit problems using S-domain circuit analysis techniques

3 Practical and written assessment

Assessment Type

Practical Assessment

Task Description

This assessment item covers all topics.

All students **must pass** the laboratory exercise based assessment in order to pass the unit.

Students need to answer a set of online quizzes and submit laboratory exercise reports to complete this assessment task.

Students will be offered number of options to complete laboratory exercises at home or by physically attending one of our campuses. Please refer to the unit Moodle site for further information.

Each student must **submit an individual laboratory report** (not one report per laboratory group) by the due date although some students might be working in teams during the laboratory sessions in campuses.

Additional information regarding the laboratories will be provided to the students via the unit Moodle site at the start of the term progressively.

Assessment Due Date

Week 9 Friday (12 May 2023) 11:45 pm AEST

Return Date to Students

Week 11 Monday (22 May 2023)

We strive to release the assessment marks in 2 weeks after due date

Weighting

25%

Minimum mark or grade

50% of allocated marks for this assessment

Assessment Criteria

Laboratory exercises will be graded using the following criteria,

- Correct answers
- All working must be shown
- Report must be neat, tidy and legible
- Correct format
- Correct description of laboratory procedures
- Correct interpretation and discussion of laboratory results
- All laboratory exercises must be attempted
- Laboratory exercise based assessment marks need to be more than 50% to PASS

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Use appropriate software tools to simulate electrical circuits and verify the results by conducting laboratory experiments using safe work practices
- Work individually and in a team to solve electrical circuit problems and produce professional laboratory documents.

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

40%

Length

180 minutes

Minimum mark or grade

50% of allocated marks for this examination

Exam Conditions

Restricted.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).
Calculator - all non-communicable calculators, including scientific, programmable and graphics calculators are authorised

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
