

ENAM12006 *Mechanical Component Selection*

Term 2 - 2021

Profile information current as at 10/04/2024 10:13 pm

All details in this unit profile for ENAM12006 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to the relationship between material properties, structure, and functional performance of mechanical components such as gears, shafts, bearings, fasteners etc. You will apply material selection to determine the load for individual machine elements. Subsequently, you will learn to determine the shape and sizes of components by the way of comprehensive analysis, estimation, and selection. You will select and specify common mechanical components like drive line, shafts, axles, gears, bearings, mechanical fasteners, and other relevant parts and modules complying with the relevant standards and codes. You will specify fits and tolerances, and finishes required for mechanical components.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

ENAG11005 Mechanics or ENEG11006 Engineering Statics, and MATH11160 Technology Mathematics or MATH11218 Engineering Foundation Mathematics.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2021

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 50%

2. **Written Assessment**

Weighting: 50%

3. **Written Assessment**

Weighting: Pass/Fail

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Students

Feedback

Avoid using multiple textbooks.

Recommendation

Stay with the prescribed textbook but assignment and exercise questions should be taken from the textbook and other books.

Feedback from Students

Feedback

Improve Moodle navigation.

Recommendation

Unit Moodle site should be built up as new with updated materials, older materials must not be mixed up with new ones.

Feedback from Students

Feedback

A large amount of topics and materials covered.

Recommendation

For AD Engineering students, it is suggested to reconsider the unit schedule and content and reduce the number of topics in respect of this offering. Some students appreciated the wider scope of learning.

Feedback from Students

Feedback

Elaborated feedback on assignments appreciated.

Recommendation

Keep providing elaborate feedback and suggestions for improvement in assignments.

Feedback from Students

Feedback

Delayed assessment item return.

Recommendation

Return marked assessment items within two weeks.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Explain the relationship between material properties, structure, and functional performance of mechanical components such as gears, shafts, bearings, fasteners etc
2. Perform simple stress analysis using design limiting criteria to select mechanical components
3. Interpret Australian standards and design codes governing the selection of mechanical components
4. Identify components to suit a given application and justify the basis for the selection
5. Work and learn collaboratively to complete a team project.

The Learning Outcomes for this unit are linked with the Engineers Australia Stage 1 Competency Standards for Engineering Associates in the areas of 1. Knowledge and Skill Base, 2. Engineering Application Ability and 3. Professional and Personal Attributes at the following levels:

Introductory

3.3 Creative, innovative and pro-active demeanour. (LO: 2N 3N 4N)

3.6 Effective team membership and team leadership. (LO: 5N)

Intermediate

1.1 Descriptive formula-based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the practice area. (LO: 2I 3I) 1.2 Procedural-level understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the practice area. (LO: 1I 2I 3I)

1.5 Knowledge of engineering design practice and contextual factors impacting the practice area. (LO: 2I 4I 5N) 1.6

Understanding of the scope, principles, norms, accountabilities and bounds of sustainable engineering practice in the area of practice. (LO: 2I 3I 4I 5N) 3.1 Ethical conduct and professional accountability. (LO: 4I 5I)

Advanced

1.3 In-depth practical knowledge and skills within specialist sub-disciplines of the practice area. (LO: 1I 2A 3A) 1.4

Discernment of engineering developments within the practice area. (LO: 1I 2A 3A 4I 5I) 2.1 Application of established

technical and practical methods to the solution of well-defined engineering problems. (LO: 1A 2I 3I 4A) 2.2 Application of

technical and practical techniques, tools and resources to well-defined engineering problems. (LO: 2A 3A 4A) 2.3

Application of systematic design processes to well-defined engineering problems. (LO: 1I 2A 3A 4A 5N) 3.2 Effective oral and written communication in professional and lay domains. (LO: 1I 2I 3I 4A) 3.4 Professional use and management of information. (LO: 2I 3A 4A 5N)

Note: LO refers to the Learning Outcome number(s) which link to the competency and the levels: N - Introductory, I - Intermediate and A - Advanced.

Refer to the Engineering Undergraduate Course Moodle site for further information on the Engineers Australia's Stage 1 Competency Standard for Professional Engineers and course level mapping information

Assessment Tasks

1 Design Problem Solving 1

Assessment Type

Written Assessment

Task Description

The assignment covers the weekly topics up to week 5 (Topics 1 to 4). The assignment tasks and questions will be uploaded on the unit website. In this assessment item, students are required to answer problem-solving and numerical questions.

Assessment Due Date

Vacation Week Friday (20 Aug 2021) 11:45 pm AEST

Return Date to Students

Week 9 Friday (17 Sept 2021)

Weighting

50%

Minimum mark or grade

50%

Assessment Criteria

Each question in this assignment will be assessed separately for the criterion accuracy and correct results.

20% of the total marks for this assignment are based on accuracy and correct results, including:

1. Free Body Diagrams (FBD) or schematic illustration of the problem
2. Use of correct equations and approach to solve the problem
3. Presenting final results in correct units

In addition, the assignment, as a whole, will be assessed against the following criteria:

Evidence of correct procedures (40% of the total marks for the assignment)

- All necessary steps in analysis and equations in original form are present on correct order
- Clear presentation of mathematical and arithmetical working linking given details of the problem to the results obtained.

Evidence of understanding of the topic (30% of the total marks for the assignment)

- Explanation of choices made in the analysis
- Interpretation of results, e.g., limitations, assumptions etc, if any.

Professional presentation (10% of the total marks for the assignment)

- Assignment title page
- The problem is clearly identified
- Clear statement of each problem and its details and requirements
- Logical layout of analysis
- Appropriate use of diagrams, units, clear diagrams
- Correct use of terminology and conventions

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit as a PDF document

Learning Outcomes Assessed

- Determine requirements for components in mechanical assemblies and systems from design notes, related sources of information and from analysis of performance and purpose

- Research and obtain information required to select components
- Select and size components and explain the basis for selections
- Specify selected components using terminology relating to mechanical component selection
- Select fasteners for given applications and explain reasons for the selection
- Describe the roles and responsibilities of members of engineering teams and the procedures used to maintain safety and quality in design, production and operation
- Work and learn collaboratively and professionally to investigate and solve open ended problems, check work and present solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

2 Design Problem Solving 2

Assessment Type

Written Assessment

Task Description

The assignment covers the topics of weeks 6 to 12 (Topics 4 to 10). The assignment tasks and questions will be uploaded on the unit website. In this assessment item, students are required to answer problem-solving and numerical questions.

Assessment Due Date

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
