

ENEC12008 *Geotechnical Engineering*

Term 2 - 2018

Profile information current as at 04/05/2024 06:33 pm

All details in this unit profile for ENEC12008 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit explains why geological processes that produce landforms, geological structures, rocks and soils, affect the location, design, construction and maintenance of civil engineering projects. In the unit, you will conduct geotechnical tests, analyse test data, prepare geotechnical reports, discuss the engineering characteristics and properties of soil. You will select appropriate approaches for analysing the behaviour of soils in civil engineering applications. You will need to use appropriate "civil engineering language" in context and document the process of modelling and analysis of geotechnical problems. You will present information in a professional manner and communicate, work and learn, both individually and in teams. You will be required to have access to a computer and to make frequent use of the internet, particularly if you are a distance (FLEX) student. Distance students will complete the practical work at a residential school.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisites: [ENEG11006 Engineering Statics OR PHYS11184 Engineering Physics A OR ENAG11005 Mechanics] AND [MATH11218 Applied Mathematics OR MATH11160 Technology Mathematics]

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2018

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Written Assessment**

Weighting: 20%

3. **Practical Assessment**

Weighting: 20%

4. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit website

Feedback

Students liked the content in the unit and the amount of topics we covered.

Recommendation

Although this was a compliment, the unit content will be updated each year to reflect the most updated materials.

Feedback from Unit website

Feedback

The unit coordinator and the lecturer were both able to give feedback quickly when posting questions on line. This is important as an external student not being able to attend tutorials or lectures because of work commitments.

Recommendation

This is regarded as the most important aspect of the interaction with all students especially the distant mode students who require further assistance and the same level of support will be offered in coming term.

Feedback from Unit website

Feedback

The labs were very helpful in retrospect as they utilised the same format and formulas required for the exam/tutorials/assignments. This allowed students to actually learn the topic rather than the usual copy and pasting given formulas that usually occurs in most labs.

Recommendation

This shows the satisfaction of students from practical section and guidelines.

Feedback from Unit website

Feedback

It is better to expand the topics to engage the students and helps them to understand a difficult topic without relying just on the PowerPoint slides.

Recommendation

More study resources and/or explanations will be provided to explain such difficult topic in 2018 offer.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Identify and discuss the implications of geological factors affecting the location, design, construction and maintenance of civil engineering projects.
2. Conduct geotechnical tests, analyse test data and prepare geotechnical reports.
3. Calculate basic engineering properties of soils and explain the relationship to soil behaviour.
4. Analyse the behaviour of soil in response to engineering applications using appropriate theories and national standards.
5. Communicate, work and learn both individually and in teams, document the process of modelling, testing and analysis and present the information in a professional manner.

The Learning Outcomes for this unit are linked with Engineers Australia's **Stage 1 Competency Standard for Professional Engineers**, **Stage 1 Competency Standards for Engineering Technologists** and **Stage 1 Competency Standards for Engineering Associates**.

Term Specific Information

Please see additional term specific information on the Unit Website.

Assessment Tasks

1 Assignment 1

Assessment Type

Written Assessment

Task Description

The aim of this assignment is to allow students to demonstrate their understanding of various concepts, theories and

processes studied/developed in the topics covered from week 1 to week 6 from the Study Schedule.

The purpose of assignment questions is to give students an opportunity to show the depth of their understanding of the unit learning outcomes. This should be done by presenting answers clearly, showing the procedure used, explaining the approach to the problem, choices made, checking and interpretation of results.

Some questions may require students to carry out research. All resources used (including the text) should be referenced appropriately. Students are cautioned that copying another student's answer will be dealt with under the Plagiarism Procedures.

Assessment Due Date

Week 7 Friday (31 Aug 2018) 10:00 pm AEST

Return Date to Students

Week 9 Friday (14 Sept 2018)

Weighting

20%

Assessment Criteria

Each question in this assignment will be assessed separately for the criterion accuracy and correct results.

- Correct application of mathematics and arithmetic
- Answers clearly identified
- Correct results

In addition, the assignment as a whole will be assessed against the following criteria:

Evidence of correct procedures:

- All necessary steps in analysis are present in correct order
- Clear presentation of mathematical and arithmetical working linking given details of the problem to the results obtained.
- Evidence of checking results (mathematical, graphical, logic common sense)

Evidence of understanding of the topic

- Explanation of choices made in the analysis (why is procedure required, why this particular procedure)
- Interpretation of results, eg limitations, direction of vectors

Professional presentation

- The work (job) is clearly identified (problem, date, analyst)
- Clear statement of each problem and its details and requirements
- Logical layout of analysis
- Appropriate use of diagrams, clear diagrams
- Correct use of terminology, conventions
- Clear English in the explanation of procedure and interpretation of results.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

The submission should be in a single PDF document and the file size less than 5 MB. If your submission includes more files (eg. Spreadsheet) you can submit it as a zip folder.

Learning Outcomes Assessed

- Identify and discuss the implications of geological factors affecting the location, design, construction and maintenance of civil engineering projects.
- Conduct geotechnical tests, analyse test data and prepare geotechnical reports.
- Calculate basic engineering properties of soils and explain the relationship to soil behaviour.
- Analyse the behaviour of soil in response to engineering applications using appropriate theories and national standards.
- Communicate, work and learn both individually and in teams, document the process of modelling, testing and analysis and present the information in a professional manner.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

2 Assignment 2

Assessment Type

Written Assessment

Task Description

The aim of this assignment is to allow students to demonstrate their understanding of various concepts, theories and processes studied/developed in the topics covered from week 6 to week 12 from the Study Schedule.

The purpose of assignment questions is to give students an opportunity to show the depth of their understanding of the unit learning outcomes. This should be done by presenting answers clearly, showing the procedure used, explaining the approach to the problem, choices made, checking and interpretation of results.

Some questions may require students to carry out research. All resources used (including the text) should be referenced appropriately. Students are cautioned that copying another student's answer will be dealt with under the Plagiarism Procedures.

3 Laboratory Report

Assessment Type

Practical Assessment

Task Description

Practical exercises assist students in achieving the Learning Outcomes for this unit. Students are required to complete the laboratory activities as per instructions given in the Practical Instruction Sheets. The Practical Instruction Sheets and report requirements will be given on the unit Website.

Students will handle soil and rock samples so it is possible that clothes become dusty and wet. Students must wear appropriate clothing for laboratory work, including closed shoes. Laboratory Coats are not required. Students who behave unprofessionally or risk the safety of other people or damage equipment may be excluded from the laboratory class, and consequently they may fail to complete compulsory assessment tasks and fail the unit. **Students must attend the lab session before start of the session and those who are late more than 15 minutes will be excluded and cannot attend other groups.**

For Activities 1, 2, 3, 4, 5 and 6:

- Each student must prepare a **technical description** of the test and associated procedures, and should prepare a **data sheet** to be used to record results during the test.
- Each student must prepare a short **test report for each experiment** using the team data sheet for each test. **This includes calculations and discussion on the results only, not test procedure description.** Personal test reports must be short and precise to point out calculations/results/graphs and discussion. The limit for explaining the procedure, results and conclusions is maximum of 3 pages (Word/PDF file). A complete submission for practical assessment includes 2 files (in a zipped folder):
 - **File 1)** Excel File with all analysis and graphs. All cells must be formula based to track the calculations
 - **File 2)** Word/PDF file to explain the procedure, results and conclusions (maximum 3 pages).
- Reports should be such that it can be understood clearly without resorting to the Excel Sheets.

List of Activities:

Activity 1: Sieve Analysis

[AS 1289.3.6.1-2009]

Activity 2: Atterberg Limits (Liquid limit, Plastic limit, linear shrinkage) tests.

[AS 1289.3.1.1-2009; AS 1289.3.9.1-2002; AS 1289.3.2.1-2009; AS 1289.3.3.1-2009; AS 1289.3.3.2-2009; AS 1289.3.4.1-2008]

Activity 3: Compaction test

[AS 1289.5.1.1-2003]

Activity 4: Consolidation test

[AS 1289.6.6.1-1998]

Activity 5: Permeability Tests (Falling head and Constant head)

[AS 1289.6.7.2, AS 1289.6.7.1]

Assessment Due Date

Week 12 Tuesday (2 Oct 2018) 10:00 pm AEST

Return Date to Students

Exam Week Monday (15 Oct 2018)

2 weeks from the submission date (Return and Feedback must be requested by email on submission date. Otherwise student will not receive any feedback)

Weighting

20%

Minimum mark or grade

50%

Assessment Criteria

Each report will be assessed separately for the criterion accuracy and correct procedure as required in the Instruction.

- Correct application of mathematics and arithmetic
- Results clearly identified and explained
- Correct results/explanation

Also, the report as a whole will be assessed against the following criteria:

Evidence of correct procedures

- All necessary steps in experiment and reporting are followed in correct order
- Clear presentation of results obtained.
- Evidence of checking results (mathematical, graphical, logic common sense)

Evidence of understanding of the topic

- Explanation of possible error in the experiment
- Interpretation of results

Professional presentation

- appropriate use of diagrams, clear diagrams
- Correct use of terminology, conventions
- Equation, images, data and tables, and the quality of presentation and layout.
- Proper referencing of sources of information (if required, Harvard style should be used)
- Clear English in the explanation of procedure and interpretation of results

Please also note that practical report is of individual submission and each student should do their own analysis and explanations based on the carried out test.

Referencing Style

- [Harvard \(author-date\)](#)

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
