

ENEC12009 Engineering Surveying and Spatial Sciences

Term 1 - 2023

Profile information current as at 26/03/2023 09:27 pm

All details in this unit profile for ENEC12009 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to engineering surveying techniques and spatial sciences. It outlines the fundamental principles of the plane and geodetic surveying, such as measurements of distances, elevations, and angles. You will learn surveying methods such as triangulation and traversing and use industry-relevant software QGIS or equivalent to develop skills in mapping and visualisation. This unit also introduces you to concepts related to automated survey instruments, errors and survey adjustments, computerised processing of survey data, and a range of advanced surveying tools such as GPS, laser scanners, and drones. You will also develop teamwork and communication skills necessary to implement such systems in the civil construction and mining industries.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisite: MATH11218 Applied Mathematics or MATH11160 Technology Mathematics.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2023

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Written Assessment**

Weighting: 40%

3. **Project (applied)**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Moodle Site

Feedback

The reading activities and weekly video resources were well organised and executed.

Recommendation

Continue to add more insightful and practical materials for Term 1, 2023.

Feedback from Moodle Site

Feedback

The students would benefit from more detailed feedback on the assignments.

Recommendation

More detailed feedback on assignments will be given to the students in the next offerings.

Feedback from Moodle Site

Feedback

Holding extra sessions to help students with assignments around hand-in time would be very beneficial.

Recommendation

Drop-in sessions will be considered for those who have questions about the unit contents and assignments.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Recognise and discuss basic concepts and principles of engineering surveying and spatial sciences
2. Perform spatial computations in two and three dimensions
3. Apply surveying principles in civil and mining engineering works such as setting-out, earthwork calculations, and underground surveying
4. Apply advanced techniques to perform spatial computations and solve a range of measurements and data management problems
5. Demonstrate a professional level of communication and teamwork.

The Learning Outcomes for this unit are linked with the Engineers Australia Stage 1 Competency Standards for Professional Engineers in the areas of 1. Knowledge and Skill Base, 2. Engineering Application Ability and 3. Professional and Personal Attributes at the following levels:

Introductory

1.2 Conceptual understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the engineering discipline. (LO: 1N 2N 3N 4N)

2.2 Fluent application of engineering techniques, tools, and resources. (LO: 1N 2N 3N 4N)

3.1 Ethical conduct and professional accountability. (LO: 2N 3N 4N 5N)

Intermediate

1.1 Comprehensive, theory-based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline. (LO: 1N 2I 3I 4N)

1.3 In-depth understanding of specialist bodies of knowledge within the engineering discipline. (LO: 1I 2I 3I 4N)

2.1 Application of established engineering methods to complex engineering problem solving. (LO: 1N 2I 3I 4N)

3.2 Effective oral and written communication in professional and lay domains. (LO: 1N 2N 3N 4I 5N)

3.4 Professional use and management of information. (LO: 3N 4I 5N)

3.6 Effective team membership and team leadership. (LO: 2N 3N 4N 5I)

Note: LO refers to the Learning Outcome number(s) which link to the competency and the levels: N - Introductory, I - Intermediate, and A - Advanced.

Refer to the Engineering Undergraduate Course Moodle site for further information on Engineers Australia's Stage 1 Competency Standard for Professional Engineers and course level mapping information <https://moodle.cqu.edu.au/course/view.php?id=1511>

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes				
	1	2	3	4	5

Schedule

Week 1 - 06 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Basic Concepts of Surveying

- Chapter 1 of Surveying for Civil and Mine Engineers (Walker et al.)
- Chapters 1 & 2 of Engineering Surveying (Schofield and Breach)

Week 2 - 13 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Levelling and its practical application	<ol style="list-style-type: none"> Chapters 2 & 3 of Surveying for Civil and Mine Engineers (Walker et al.) Chapters 3 & 8 of Engineering Surveying (Schofield and Breach) 	

Week 3 - 20 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Distance Measurement	<ol style="list-style-type: none"> Chapter 4 of Surveying for Civil and Mine Engineers (Walker et al.) Chapter 3 of Engineering Surveying (Schofield and Breach) 	

Week 4 - 27 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Angle Measurement Introduction to QGIS	<ol style="list-style-type: none"> Chapter 4 of Surveying for Civil and Mine Engineers (Walker et al.) Chapter 5 of Engineering Surveying (Schofield and Breach) 	

Week 5 - 03 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Traversing & Triangulation QGIS- Vector data basics	<ol style="list-style-type: none"> Chapter 5 & 16 of Surveying for Civil and Mine Engineers (Walker et al.) Chapters 6 & 7 of Engineering Surveying (Schofield and Breach) 	Surveying Fundamentals Due: Week 5 Friday (7 Apr 2023) 11:59 pm AEST

Vacation Week - 10 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
MID-TERM BREAK		

Week 6 - 17 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Earthworks (Quantities, Sections, Contours) QGIS- Coordinate systems	<ol style="list-style-type: none"> Chapters 8 & 9 of Surveying for Civil and Mine Engineers (Walker et al.) Chapter 11 of Engineering Surveying (Schofield and Breach) 	

Week 7 - 24 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Curves QGIS- Working with vector data	<ol style="list-style-type: none"> Chapters 10, 11, 12 & 13 of Surveying for Civil and Mine Engineers (Walker et al.) Chapter 10 of Engineering Surveying (Schofield and Breach) 	

Week 8 - 01 May 2023

Module/Topic	Chapter	Events and Submissions/Topic

Setting out Works
QGIS- Raster data basic

1. Chapter 15 of Surveying for Civil and Mine Engineers (Walker et al.)
2. Chapter 12 of Engineering Surveying (Schofield and Breach)

Week 9 - 08 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Mine and Underground Surveying QGIS- Create a map	1. Chapter 7 of Surveying for Civil and Mine Engineers (Walker et al.) 2. Chapter 13 of Engineering Surveying (Schofield and Breach)	

Week 10 - 15 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Digital and Mass Survey Methods	1. Chapter 14 of Engineering Surveying (Schofield and Breach)	Surveying Computations Due: Week 10 Friday (19 May 2023) 11:59 pm AEST

Week 11 - 22 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Introduction of GPS and advanced surveying methods	1. Chapters 14 & 16 of Surveying for Civil and Mine Engineers (Walker et al.) 2. Chapter 9 of Engineering Surveying (Schofield and Breach)	

Week 12 - 29 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Review		Geospatial mapping Due: Week 12 Friday (2 June 2023) 11:59 pm AEST

Review/Exam Week - 05 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 12 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Assessment Tasks

1 Surveying Fundamentals

Assessment Type

Written Assessment

Task Description

This assessment task relates to unit learning outcome 1. This assessment task aims to allow the students to demonstrate their understanding of various concepts and theories delivered in the unit during Weeks 1 to 4. This written assessment will constitute a number of questions (usually 6 to 8), similar to the unit tutorial questions, on the topics covered in the first four weeks of the term. All students are required to submit their written assessment individually and as a single PDF file for this assessment. The assignment questions will be made available on Moodle.

Assessment Due Date

Week 5 Friday (7 Apr 2023) 11:59 pm AEST

Return Date to Students

Week 6 Friday (21 Apr 2023)

Weighting

20%

Assessment Criteria

Each question in this assignment will be assessed separately for the criterion *accuracy and correct results*.

- Correct application of mathematics and arithmetic
- Answers clearly identified
- Correct results

In addition, the assignment as a whole will be assessed against the following criteria:

Evidence of correct procedures

- All necessary steps in analysis are present in correct order
- Clear presentation of mathematical and arithmetical working linking given details of the problem to the results obtained
- Evidence of checking results (mathematical, graphical, logic-common sense)

Evidence of understanding of the topic

- Explanation of choices made in the analysis (why is procedure required, why this particular procedure)
- Interpretation of results, eg limitations, direction of vectors

Professional presentation

- The work (job) is clearly identified (problem, date, analyst)
- Clear statement of each problem and its details and requirements
- Logical layout of analysis
- Appropriate use of diagrams, clear diagrams
- Correct use of terminology, conventions
- Clear English in the explanation of procedure and interpretation of results.

A similarity check will be always done before marking the submitted assignments for all students. Upon detection of any plagiarism including i) similarity between submitted reports within the same cohort or ii) with the previous cohorts or iii) submitted works to other institutes or iv) using the material provided by cheating websites will result in failing that assignment without marking and the student will be reported to the CQU Academic Misconduct team for further actions.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

The submission should be in a single PDF document. Any spreadsheet must be transferred to the main PDF document. See Moodle for more detail and description.

Learning Outcomes Assessed

- Recognise and discuss basic concepts and principles of engineering surveying and spatial sciences

2 Surveying Computations

Assessment Type

Written Assessment

Task Description

This assessment task relates to the unit learning outcomes 1, 2, and 3. This assessment task aims to allow the students to demonstrate their understanding of various concepts and theories delivered in the unit until Week 10. This written assessment will constitute a number of small projects (usually 3 to 4) on the topics covered during the term for angle and distance measurement, area and volume calculation, contour map preparation, and earthwork estimation. All students are required to submit their written assessment individually and as a single PDF file for this assessment. Further details on the projects and assessment requirements will be provided on Moodle.

Assessment Due Date

Week 10 Friday (19 May 2023) 11:59 pm AEST

Return Date to Students

Week 12 Friday (2 June 2023)

Weighting

40%

Minimum mark or grade

50%

Assessment Criteria

Each project in this assignment will be assessed separately for criterion accuracy and correct results.

- Correct application of mathematics and arithmetic
- Answers clearly identified
- Correct results

In addition, the assignment as a whole will be assessed against the following criteria:

Evidence of correct procedures

- All necessary steps in the analysis are present in the correct order
- Clear presentation of mathematical and arithmetical working linking given details of the problem to the results obtained
- Evidence of checking results (mathematical, graphical, logic-common sense)

Evidence of an understanding of the topic

- Explanation of choices made in the analysis (why is the procedure required, why this particular procedure)
- Interpretation of results, eg limitations, the direction of vectors

Professional presentation

- The work (job) is clearly identified (problem, date, analyst)
- Clear statement of each problem and its details and requirements
- Logical layout of analysis
- Appropriate use of diagrams, clear diagrams
- Correct use of terminology, conventions
- Clear English in the explanation of procedure and interpretation of results.

A similarity check will be always done before marking the submitted assignments for all students. Upon detection of any plagiarism including i) similarity between submitted reports within the same cohort or ii) with the previous cohorts or iii) submitted works to other institutes or iv) using the material provided by cheating websites will result in failing that assignment without marking and the student will be reported to the CQU Academic Misconduct team for further actions.

Submission

Online

Submission Instructions

The submission should be in a single PDF document. Any spreadsheet or Excel graphs must be transferred to the main PDF document. See Moodle for more detail and description.

Learning Outcomes Assessed

- Recognise and discuss basic concepts and principles of engineering surveying and spatial sciences
- Perform spatial computations in two and three dimensions
- Apply surveying principles in civil and mining engineering works such as setting-out, earthwork calculations, and underground surveying

3 Geospatial mapping

Assessment Type

Project (applied)

Task Description

This assessment task relates to the unit learning outcomes 2, 3, 4, and 5. It aims to allow the students to demonstrate their understanding of various concepts and theories delivered in the unit and develop a geospatial map using QGIS. The report should be prepared and submitted as a team. The report template and assessment details and requirements will be made available on Moodle.

Assessment Due Date

Week 12 Friday (2 June 2023) 11:59 pm AEST

Return Date to Students

After the final grade release

Weighting

40%

Minimum mark or grade

50%

Assessment Criteria

This assessment will be assessed for the:

- Accuracy of the Input parameter for each computation step with an appropriate unit.
- Application of accurate methodology with appropriate referencing. Full mark will only be awarded for error-free computational steps with appropriate explanation to be understood by an independent person;
- Accuracy of the answer with the appropriate unit;
- If answers to any preceding steps are inaccurate. A partial mark is awarded for subsequent answers;
- Correct application of mathematics and arithmetic;
- Clearly identified answers; and
- Correct results.

In addition, the assessment as a whole will be assessed against the following criteria:

- Evidence of correct procedures;
- All necessary steps in the analysis are present in the correct order;
- Clear presentation of the mathematical and arithmetical working linking is given;
- Details of the problem with the results are obtained; and
- Evidence of checking results (mathematical, graphical, logic common sense) are presented.

Evidence of an understanding of the topic:

- Explanation of choices made in the analysis (why is the procedure required, why this particular procedure); and
- Interpretation of results

A similarity check will be always done before marking the submitted assignments for all students. Upon detection of any plagiarism including i) similarity between submitted reports within the same cohort or ii) with the previous cohorts or iii) submitted works to other institutes or iv) using the material provided by cheating websites will result in failing that assignment without marking and the student will be reported to the CQU Academic Misconduct team for further actions.

Referencing Style

Submission Instructions

The submission should be in a single PDF document. Any spreadsheet, software output, or Excel graphs must be transferred to the main PDF document. See Moodle for more detail and description.

Learning Outcomes Assessed

- Perform spatial computations in two and three dimensions
- Apply surveying principles in civil and mining engineering works such as setting-out, earthwork calculations, and underground surveying
- Apply advanced techniques to perform spatial computations and solve a range of measurements and data management problems

- Demonstrate a professional level of communication and teamwork.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
