

ENEC13015 *Steel and Timber Design*

Term 1 - 2023

Profile information current as at 29/04/2024 07:49 pm

All details in this unit profile for ENEC13015 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces Australian Standards used for steel and timber design. Basic material and section properties and factors affecting the properties of structural members are introduced. You will design steel and timber members subjected to axial loads, bending moments and combined actions, then check whether they comply with both ultimate and serviceability limit states as required in AS4100 and AS1720 respectively. Furthermore, you also will design steel connection and timber joints according to Australian Standards. You also develop skills in the use of computer software in structural design. You are expected to document the process of analysis and design and communicate, work and learn, both individually and in teams in a professional manner.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisites: ENEC12012 Stress Analysis AND MATH11218 Applied Mathematics

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2023

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Online
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 25%

2. **Written Assessment**

Weighting: 25%

3. **Examination**

Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Students communication

Feedback

Unit content is relevant to the industry expectation with the reference to Australian Standards and the use of design software.

Recommendation

This good practice should be continued in the following years

Feedback from Students communication

Feedback

Some additional resources related to wind load may helpful.

Recommendation

Additional resources should be provided in Week 2 tutorial class.

Feedback from Students communication

Feedback

Some detailed feedback and a breakdown of the marking criteria will help to complete the assignment and learning.

Recommendation

Detail marking criteria should be provided in 2023.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Explain how the key materials and section properties of steel and timber affect the structural performance
2. Explain the ultimate and serviceability design limit states for steel and timber members
3. Design steel and timber members and connections subjected to various design actions according to relevant Australian Standards
4. Design structures subjected to load combinations according to Australian Standards
5. Demonstrate a professional level of communication.

The Learning Outcomes for this unit are linked with the Engineers Australia Stage 1 Competency Standards for Professional Engineers in the areas of 1. Knowledge and Skill Base, 2. Engineering Application Ability and 3. Professional and Personal Attributes at the following levels:

Introductory

3.5 Orderly management of self, and professional conduct. (LO: 5N)

Intermediate

1.2 Conceptual understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the engineering discipline. (LO: 3I 4N)

3.1 Ethical conduct and professional accountability. (LO: 3I)

3.2 Effective oral and written communication in professional and lay domains. (LO: 5I)

3.3 Creative, innovative and pro-active demeanour. (LO: 3I)

3.4 Professional use and management of information. (LO: 1I 3I)

Advanced

1.1 Comprehensive, theory-based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline. (LO: 1I 2I 3A)

1.3 In-depth understanding of specialist bodies of knowledge within the engineering discipline. (LO: 1A 2I 3A)

1.4 Discernment of knowledge development and research directions within the engineering discipline. (LO: 1I 2I 3A)

1.5 Knowledge of engineering design practice and contextual factors impacting the engineering discipline. (LO: 1I 2I 3A 4I)

1.6 Understanding of the scope, principles, norms, accountabilities and bounds of sustainable engineering practice in the specific discipline. (LO: 1A 3A)

2.1 Application of established engineering methods to complex engineering problem-solving. (LO: 3A 4I)

2.2 Fluent application of engineering techniques, tools and resources. (LO: 3A 4I)

2.3 Application of systematic engineering synthesis and design processes. (LO: 1N 3A 4I)

Note: LO refers to the Learning Outcome number(s) which link to the competency and the levels: N - Introductory, I - Intermediate and A - Advanced.

Refer to the Engineering Undergraduate Course Moodle site for further information on the Engineers Australia's Stage 1 Competency Standard for Professional Engineers and course level mapping information

Schedule

Week 1 - 06 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to Structural Design Process & Limit State Approaches Structural Analysis using Software		Please have the Spacegass (Student Version) installed on your PC before the tutorial class. Obtain the free student version from Free Student Version SPACE GASS

Week 2 - 13 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Estimation of Design Actions on Structures	Dead and Live Load (AS1170.1), Wind Action (AS1170.2) and Load Combination (AS1170.0)	

Week 3 - 20 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design of steel members subjected Tension and Compression	Study Guide: Tension Member Study Guide: Compression Member	

Week 4 - 27 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design of Steel Members Subjected to Bending	Study Guide: Bending Study Guide: Shear & Bearing	

Week 5 - 03 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design of Steel Members Subjected to Combined Actions Application of Design Software in Steel Design	Study Guide: Combined Action Spacegass Guide	

Vacation Week - 10 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Mid-term Break		

Week 6 - 17 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design of Steel Connections	Study Guide: Connections	

Week 7 - 24 Apr 2023

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to Timber Design	Study Resources	Steel Design Due: Week 7 Wednesday (26 Apr 2023) 5:00 pm AEST

Week 8 - 01 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design timber members subjected to tension and compression	Study Resources	

Week 9 - 08 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design timber members subjected to bending and shear	Study Resources	

Week 10 - 15 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design timber members subjected to combined actions	Study Resources	

Week 11 - 22 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Design of timber connections	Study Resources	

Week 12 - 29 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Review		Timber Design Due: Week 12 Monday (29 May 2023) 5:00 pm AEST

Review/Exam Week - 05 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
		Examination - Please check the exam timetable

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Assessment Tasks

1 Steel Design

Assessment Type

Written Assessment

Task Description

The aim of this assignment is to allow the students to demonstrate their understanding of various concepts, theories and processes studied/developed in steel design.

Assignment 1 will be available by end of week 1 through the unit website.

Assessment Due Date

Week 7 Wednesday (26 Apr 2023) 5:00 pm AEST

Return Date to Students

Week 9 Wednesday (10 May 2023)

Weighting

25%

Assessment Criteria

Each question will be assessed based on the following criteria.

- Correct application of mathematics and arithmetic
- The problem clearly identified and explained in the answer
- Correct results/explanation

In addition, the following criteria will be considered:

Evidence of correct procedures

- All necessary steps in the analysis are presented in the correct order
- Clear presentation of mathematical work

Evidence of an understanding of the topic

- Use of correct principles and theories
- Interpretation of results as necessary

Professional presentation

- Appropriate use of diagrams, clear diagrams
- Use of correct terminologies and conventions

Submission

Online

Learning Outcomes Assessed

- Explain how the key materials and section properties of steel and timber affect the structural performance
- Explain the ultimate and serviceability design limit states for steel and timber members
- Design steel and timber members and connections subjected to various design actions according to relevant Australian Standards
- Design structures subjected to load combinations according to Australian Standards
- Demonstrate a professional level of communication.

2 Timber Design

Assessment Type

Written Assessment

Task Description

The aim of this assignment is to allow the students to demonstrate their understanding of various concepts, theories and processes studied/developed in timber design.

Assignment 2 will be available by end of week 7 through the unit website.

Assessment Due Date

Week 12 Monday (29 May 2023) 5:00 pm AEST

Return Date to Students

Review/Exam Week Wednesday (7 June 2023)

Weighting

25%

Assessment Criteria

Each question will be assessed based on the following criteria.

- Correct application of mathematics and arithmetic
- The problem clearly identified and explained in the answer
- Correct results/explanation

In addition, the following criteria will be considered:

Evidence of correct procedures

- All necessary steps in the analysis are presented in the correct order
- Clear presentation of mathematical work

Evidence of an understanding of the topic

- Use of correct principles and theories
- Interpretation of results as necessary

Professional presentation

- Appropriate use of diagrams, clear diagrams
- Use of correct terminologies and conventions

Submission

Online

Learning Outcomes Assessed

- Explain how the key materials and section properties of steel and timber affect the structural performance
- Explain the ultimate and serviceability design limit states for steel and timber members
- Design steel and timber members and connections subjected to various design actions according to relevant Australian Standards
- Design structures subjected to load combinations according to Australian Standards
- Demonstrate a professional level of communication.

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

50%

Length

180 minutes

Minimum mark or grade

50%

Exam Conditions

Closed Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Calculator - non-programmable, no text retrieval, silent only

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
