

# ENEC13017 Advanced Structural Analysis

## Term 2 - 2018

Profile information current as at 15/05/2024 05:01 pm

All details in this unit profile for ENEC13017 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

### General Information

#### Overview

In this unit, you will analyse determinacy and stability, and the implications this has for structural analysis. You will also determine reactions, internal forces and displacements of structures, and analyse truss and beams with moving loads. You will be introduced to fundamentals of finite element method and use commercially available software to analyse structures.

#### Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

#### Pre-requisites or Co-requisites

Prerequisites: ENEG11006 Engineering Statics AND ENEC12012 Stress Analysis

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

#### Offerings For Term 2 - 2018

- Bundaberg
- Cairns
- Distance
- Gladstone
- Mackay
- Rockhampton

#### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

#### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Written Assessment**

Weighting: 13%

#### 2. **Written Assessment**

Weighting: 13%

#### 3. **Written Assessment**

Weighting: 12%

#### 4. **Written Assessment**

Weighting: 12%

#### 5. **Examination**

Weighting: 50%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Unit evaluation

##### Feedback

Feedback was very positive, the students thought the unit was very well structured and the concepts well explained.

##### Recommendation

Will maintain the same standard next year.

## Unit Learning Outcomes

### On successful completion of this unit, you will be able to:

1. Conduct structural idealisation, static and kinematic indeterminacy and the duality of flexibility and stiffness for practical structures
2. Analyse statically indeterminate structures to determine support reactions, internal forces and nodal displacements
3. Solve structural analysis problems using software packages by applying finite element method
4. Conduct plastic collapse analysis, lower and upper bound solutions for practical structures
5. Demonstrate a professional level of communication.

The learning outcomes are linked to Engineers Australia Stage 1 Competencies and also discipline capabilities. You can find the mapping for this on the [Engineering Undergraduate Course website](#).

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

### Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes				
	1	2	3	4	5
1 - Written Assessment - 13%	•				•
2 - Written Assessment - 13%		•			
3 - Written Assessment - 12%			•		•
4 - Written Assessment - 12%				•	
5 - Examination - 50%	•	•	•	•	

### Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes				
	1	2	3	4	5
1 - Communication	•	•	•	•	•
2 - Problem Solving	•	•	•	•	
3 - Critical Thinking	•	•	•	•	
4 - Information Literacy	•	•	•	•	
5 - Team Work					
6 - Information Technology Competence			•		
7 - Cross Cultural Competence					•
8 - Ethical practice					•
9 - Social Innovation					
10 - Aboriginal and Torres Strait Islander Cultures					

## Alignment of Assessment Tasks to Graduate Attributes

Assessment Tasks	Graduate Attributes									
	1	2	3	4	5	6	7	8	9	10
1 - Written Assessment - 13%	•	•	•	•						
2 - Written Assessment - 13%	•	•	•	•						
3 - Written Assessment - 12%	•	•	•	•		•				
4 - Written Assessment - 12%	•	•	•	•						
5 - Examination - 50%	•	•	•	•						

## Textbooks and Resources

### Textbooks

ENEC13017

#### Supplementary

##### Structural Analysis

Edition: 9th ED SI Units (2016)

Authors: Hibbeler RC

Pearson

Binding: Paperback

[View textbooks at the CQUniversity Bookshop](#)

### IT Resources

**You will need access to the following IT resources:**

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Structural analysis software SpaceGass
- Matlab

## Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

## Teaching Contacts

**Faris Albermani** Unit Coordinator

[f.albermani@cqu.edu.au](mailto:f.albermani@cqu.edu.au)

## Schedule

### Week 1 - 09 Jul 2018

Module/Topic	Chapter	Events and Submissions/Topic
Introduction, Virtual work, statically indeterminate structures (SIS)	Refer to Lecture Supplement	

### Week 2 - 16 Jul 2018

Module/Topic	Chapter	Events and Submissions/Topic
Method of consistent deformations for analyzing SIS, Flexibility approach	Refer to Lecture Supplement	

### Week 3 - 23 Jul 2018

Module/Topic	Chapter	Events and Submissions/Topic
Computational techniques and structural modelling	Refer to Lecture Supplement	

### Week 4 - 30 Jul 2018

Module/Topic	Chapter	Events and Submissions/Topic
Stiffness approach for structural analysis	Refer to Lecture Supplement	<b>Assignment 1</b> Due: Week 4 Monday (30 July 2018) 11:45 pm AEST

<b>Week 5 - 06 Aug 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Direct stiffness method: beam structures	Refer to Lecture Supplement	
<b>Vacation Week - 13 Aug 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
<b>Week 6 - 20 Aug 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Direct stiffness method: truss structures	Refer to Lecture Supplement	<b>Assignment 2</b> Due: Week 6 Monday (20 Aug 2018) 11:45 pm AEST
<b>Week 7 - 27 Aug 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Direct stiffness method: frame structures	Refer to Lecture Supplement	
<b>Week 8 - 03 Sep 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Moment distribution method for beam analysis	Refer to Lecture Supplement	<b>Assignment 3</b> Due: Week 8 Monday (3 Sept 2018) 11:45 pm AEST
<b>Week 9 - 10 Sep 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Elastic analysis, Plastic analysis and Nonlinear analysis	Refer to Lecture Supplement	
<b>Week 10 - 17 Sep 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Plastic collapse theorems	Refer to Lecture Supplement	
<b>Week 11 - 24 Sep 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Upper and lower bound solutions	Refer to Lecture Supplement	<b>Assignment 4</b> Due: Week 11 Monday (24 Sept 2018) 11:45 pm AEST
<b>Week 12 - 01 Oct 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Limit analysis	Refer to Lecture Supplement	
<b>Review/Exam Week - 08 Oct 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
Revision		Final exam as per the University examination timetable
<b>Exam Week - 15 Oct 2018</b>		
<b>Module/Topic</b>	<b>Chapter</b>	<b>Events and Submissions/Topic</b>
		Final exam as per the University examination timetable

## Assessment Tasks

### 1 Assignment 1

#### Assessment Type

Written Assessment

**Task Description**

The assignment will be available for download from the unit Moodle site.

**Assessment Due Date**

Week 4 Monday (30 July 2018) 11:45 pm AEST

**Return Date to Students**

Week 6 Monday (20 Aug 2018)

**Weighting**

13%

**Assessment Criteria**

Submission must be neatly presented and easy to follow. Use clearly annotated diagrams when possible. State all the assumptions and calculations made in your solution.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Learning Outcomes Assessed**

- Conduct structural idealisation, static and kinematic indeterminacy and the duality of flexibility and stiffness for practical structures
- Demonstrate a professional level of communication.

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy

## 2 Assignment 2

**Assessment Type**

Written Assessment

**Task Description**

The assignment will be available for download from the unit Moodle site.

**Assessment Due Date**

Week 6 Monday (20 Aug 2018) 11:45 pm AEST

**Return Date to Students**

Week 8 Monday (3 Sept 2018)

**Weighting**

13%

**Assessment Criteria**

Submission must be neatly presented and easy to follow. Use clearly annotated diagrams when possible. State all the assumptions and calculations made in your solution.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Learning Outcomes Assessed**

- Analyse statically indeterminate structures to determine support reactions, internal forces and nodal displacements

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking

- Information Literacy

## 3 Assignment 3

### Assessment Type

Written Assessment

### Task Description

The assignment will be available for download from the unit Moodle site.

### Assessment Due Date

Week 8 Monday (3 Sept 2018) 11:45 pm AEST

### Return Date to Students

Week 10 Monday (17 Sept 2018)

### Weighting

12%

### Assessment Criteria

Submission must be neatly presented and easy to follow. Use clearly annotated diagrams when possible. State all the assumptions and calculations made in your solution.

### Referencing Style

- [Harvard \(author-date\)](#)

### Submission

Online

### Learning Outcomes Assessed

- Solve structural analysis problems using software packages by applying finite element method
- Demonstrate a professional level of communication.

### Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

## 4 Assignment 4

### Assessment Type

Written Assessment

### Task Description

The assignment will be available for download from the unit Moodle site.

### Assessment Due Date

Week 11 Monday (24 Sept 2018) 11:45 pm AEST

### Return Date to Students

Week 12 Monday (1 Oct 2018)

### Weighting

12%

### Assessment Criteria

Submission must be neatly presented and easy to follow. Use clearly annotated diagrams when possible. State all the assumptions and calculations made in your solution.

### Referencing Style

- [Harvard \(author-date\)](#)

### Submission

Online

### Learning Outcomes Assessed

- Conduct plastic collapse analysis, lower and upper bound solutions for practical structures

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy

## Examination

**Outline**

Complete an invigilated examination.

**Date**

During the examination period at a CQUniversity examination centre.

**Weighting**

50%

**Length**

180 minutes

**Minimum mark or grade**

Minimum percentage of examination marks required to pass the unit; 50%

**Exam Conditions**

Closed Book.

**Materials**

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Calculator - non-programmable, no text retrieval, silent only

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
