

ENEE14005 Capstone Power and Control Design

Term 1 - 2023

Profile information current as at 05/10/2023 08:15 am

All details in this unit profile for ENEE14005 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will work in a team to analyse and design electrical power and control systems by applying PSSE or equivalent industry software. You will also focus on renewables, promoting the United Nations Sustainable Development Goal 7: Affordable and Clean Energy. On satisfactory completion, you will be able to investigate solutions for contemporary engineering problems, plan and control project work in a team environment, research current practice in this discipline, execute evidence-based decision-making, check and evaluate the validity of information, and prepare professional documentation for a project.

Details

Career Level: *Undergraduate*

Unit Level: *Level 4*

Credit Points: *12*

Student Contribution Band: *8*

Fraction of Full-Time Student Load: *0.25*

Pre-requisites or Co-requisites

Prerequisites: ENEE13021 Power System Analysis and Design AND ENEE13019 Control Systems Analysis and Design

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2023

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 12-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 25 hours of study per week, making a total of 300 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Online Test**

Weighting: 20%

2. **Online Test**

Weighting: 20%

3. **Portfolio**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit evaluation

Feedback

Students appreciated professionalism of the unit coordinator and his willingness to assist students promptly.

Recommendation

Continue this good practice.

Feedback from Unit evaluation

Feedback

Students found the content of this unit very informative and practical.

Recommendation

Continue this good practice.

Feedback from Unit evaluation

Feedback

Students appreciated the contents of online tests. However, they mentioned some of questions in the tests are difficult to understand and need rewording.

Recommendation

In the next offering, revisit the question bank and correct the wording of questions that are not clear. If necessary, be more descriptive.

Feedback from Unit evaluation

Feedback

Students mentioned that the design specification of the project included inconsistent data.

Recommendation

In the next offering, review the project specification for any inconsistency.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Perform advanced load flow, stability, and power quality calculations using commercial software
2. Tune power system controllers to obtain the desired performance
3. Design power transmission infrastructure and renewable generation and storage systems for a reliable power supply
4. Apply the Australian Standards, National Electricity rules and general principles of sustainable development
5. Present design outcomes professionally as a report, short conference paper and presentation
6. Communicate, work and learn, both individually and in teams, in a professional manner.

The Learning Outcomes for this unit are linked with the Engineers Australia Stage 1 Competency Standards for Professional Engineers in the areas of 1. Knowledge and Skill Base, 2. Engineering Application Ability and 3. Professional and Personal Attributes at the following levels:

Intermediate

1.4 Discernment of knowledge development and research directions within the engineering discipline. (LO: 1I 2I 3I 4I)

1.5 Knowledge of engineering design practice and contextual factors impacting the engineering discipline. (LO: 1I 2I 3I 4I)

2.2 Fluent application of engineering techniques, tools, and resources. (LO: 1I 2I 3I 4I)

3.3 Creative, innovative, and proactive demeanor. (LO: 5I 6I)

Advanced

1.1 Comprehensive, theory-based understanding of the underpinning natural and physical sciences and the engineering fundamentals applicable to the engineering discipline. (LO: 1A 2A 3A 4A)

1.2 Conceptual understanding of the mathematics, numerical analysis, statistics, and computer and information sciences which underpin the engineering discipline. (LO: 1A 2A 3A 4A)

1.3 In-depth understanding of specialist bodies of knowledge within the engineering discipline. (LO: 1I 2I 3I 4A)

1.6 Understanding of the scope, principles, norms, accountabilities, and bounds of sustainable engineering practice in the specific discipline. (LO: 4A)

2.1 Application of established engineering methods to complex engineering problem-solving. (LO: 1I 2I 3I 4A)

2.3 Application of systematic engineering synthesis and design processes. (LO: 3A 4A)

2.4 Application of systematic approaches to the conduct and management of engineering projects. (LO: 4A)

3.2 Effective oral and written communication in professional and lay domains. (LO: 5A)

3.4 Professional use and management of information. (LO: 3A 4A)

3.5 Orderly management of self, and professional conduct. (LO: 4I 5I 6A)

3.6 Effective team membership and team leadership. (LO: 5A 6A)

Note: LO refers to the Learning Outcome number(s) which link to the competency and the levels: N - Introductory, I - Intermediate, and A - Advanced.

Refer to the Engineering Undergraduate Course Moodle site for further information on Engineers Australia's Stage 1 Competency Standard for Professional Engineers and course-level mapping information <https://moodle.cqu.edu.au/course/view.php?id=1511>

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes					
	1	2	3	4	5	6
1 - Online Test - 20%	•					
2 - Online Test - 20%		•				
3 - Portfolio - 60%	•	•	•	•	•	•

Alignment of Graduate Attributes to Learning Outcomes

Textbooks and Resources

Textbooks

ENEE14005

Supplementary

Control Systems Engineering

Edition: 8th edn (2019)

Authors: Norman S. Nise

Wiley

Hoboken , NJ , USA

ISBN: 9781119561880

Binding: Paperback

ENEE14005

Supplementary

Power System Analysis and Design

Edition: 6 (2017)

Authors: J. Duncan Glover, Thomas J. Overbye, Mulukutla Sarma

Cengage

Boston , MA , USA

ISBN: 978-1-305-63618-7

Binding: Paperback

Additional Textbook Information

Textbooks can be accessed online at the CQUniversity Library website. If you prefer your own copy, you can purchase either paper or eBook versions at the CQUni Bookshop here: <http://bookshop.cqu.edu.au> (search on the Unit code)

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- MATLAB and Simulink Suite Software (For students without access to a CQUni campus), see the Textbook and Resources section for more information
- PSS/E Xplore Link for download supplied on Moodle and in project specification

Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

Teaching Contacts

Kianoush Emami Unit Coordinator

k.emami@cqu.edu.au

Schedule

Week 1 - 06 Mar 2023

Module/Topic	Chapter	Events and Submissions/Topic
Review of Load Flow and fault calculations, models of power system components review of PSS/E	Chapters 6-9, of Glover, Sarma, and Overbye	

Week 2 - 13 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Power system dynamics, classical machine model, swing equation, critical clearing time, detailed machine models,, simulation using PSSE	Chapter 11 of Glover, Sarma and Overbye	
Week 3 - 20 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Review of Control Theory, transfer functions, Linear State space models, exciters and governors, modelling of exciters and governors, in PSSE, AEMO Specifications for damping	Refer to ENEE13019 notes on transfer functions and linear modelling, Nise chapters 2,3 , Glover et al chapters 11 and 12 and PSSE Models document	Online test 1 Due: Week 3 Friday (24 Mar 2023) 11:45 pm AEST
Week 4 - 27 Mar 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Review of Compensator design, modelling of voltage response of synchronous machine, exciter tuning, effect of fast exciters on dynamic stability	Refer to ENEE13019 notes on root locus design.and time domain response. See Nise chapters 4,8 and 9	
Week 5 - 03 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Modelling of Solar PV and Wind, effect on system performance, AS4777 Effects of low system inertia, storage options, low voltage ride through issues	PSS/E models document and AS4777	
Vacation Week - 10 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Week 6 - 17 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Power System Quality, harmonics, sources effects and modelling	AS/NZS 61000.3.2:2003	
Week 7 - 24 Apr 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Other aspects of power quality - flicker and negative sequence, estimation, effect of and on renewable generation	National Electricity Rules (NER) chapter 5 AS/NZS61000.3.7:2001	Project Progress Report (15% of Portfolio) Due: Week 7 Friday (28 April 2023) 11:45 pm AEST
Week 8 - 01 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Introduction to the NER clauses for connection, NER clauses S5.2.5.1 - S5.2.5.6	NER chapter 5	
Week 9 - 08 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic
Introduction to the NER clauses for connection, NER clauses S5.2.5.7 - S5.2.5.14 and S5.2.6.1, S5.2.6.2		
Week 10 - 15 May 2023		
Module/Topic	Chapter	Events and Submissions/Topic

Introduction to the Australian electricity market, market impact of renewables, Sustainability triple bottom line

Online Test 2 Due: Week 10 Friday (19 May 2023) 11:45 pm AEST

Week 11 - 22 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Review of unit and portfolio requirements		

Week 12 - 29 May 2023

Module/Topic	Chapter	Events and Submissions/Topic
Question and Answer session regarding project		

Review/Exam Week - 05 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
		Portfolio-Updated Progress Report(15%), Presentation(15%) and Final Report(30%) Due: Review/Exam Week Friday (9 June 2023) 11:45 pm AEST

Exam Week - 12 Jun 2023

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Assessment Tasks

1 Online test 1

Assessment Type

Online Test

Task Description

Questions covering load flow analysis, reactive compensation, transmission line modelling, basic power system stability including the swing equation and critical clearing times, operation of PSS/E

Assessment Due Date

Week 3 Friday (24 Mar 2023) 11:45 pm AEST

Return Date to Students

Week 4 Monday (27 Mar 2023)

Weighting

20%

Minimum mark or grade

50% Minimum mark

Assessment Criteria

Accuracy and correctness of answers

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Perform advanced load flow, stability, and power quality calculations using commercial software

2 Online Test 2

Assessment Type

Online Test

Task Description

Questions on modelling of detailed synchronous machines, exciters, power system stabilisers, and renewable generation, use of PSS/E in modelling the aforementioned, power system quality

Assessment Due Date

Week 10 Friday (19 May 2023) 11:45 pm AEST

Return Date to Students

Week 11 Monday (22 May 2023)

Weighting

20%

Minimum mark or grade

50% minimum mark

Assessment Criteria

Accuracy and correctness of answers

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Tune power system controllers to obtain the desired performance

3 Portfolio-Updated Progress Report(15%), Presentation(15%) and Final Report(30%)

Assessment Type

Portfolio

Task Description

Portfolio consists of a progress report due at 11:45 pm AEST on the Friday of week 7, and a final report and recorded group presentation all due at 11:45 pm AEST on the Friday of week 13. Grading criteria for these tasks will be provided on Moodle. These are group submissions however the marks will be individualised based on self and peer assessment of your contribution in the case of the reports and individual performance in the case of the presentation. The self and peer assessment is done through the university Self and Peer assessment (SPA) system. Details of this will be given on Moodle.

Weightings of these component in respect of the term totals are as follows

Progress report : 15%

Presentation : 15%

Final Report: 30% including 5% from self and peer assessment making a total of 60% for the entire portfolio.

Assessment Due Date

Review/Exam Week Friday (9 June 2023) 11:45 pm AEST

Progress Report due 11:45 PM 28 April 2023 (week 7), Final Report and recorded presentation due 11:45 pm 9 June 2023 (week 13)

Return Date to Students

Within two weeks of due date

Weighting

60%

Minimum mark or grade

50% minimum mark based on the total portfolio mark

Assessment Criteria**Progress Report**

1. Technical accuracy in
 - (a) load flow based analysis and design
 - (b) detailed machine modelling
 - (c) modelling of exciters and PSS's and Critical clearing time calculations
 - (d) tuning of exciters
2. statement of issues and evidence of intra and inter team communication, team charter and self and peer assessments

3. plan for future work including Gantt chart
4. succinctness, correct grammar, spelling formatting etc

Final Report

1. Technical accuracy in the topics mentioned under progress report plus
 - (a) Estimation of harmonic issues that may arise from installation of solar plant
 - (b) Estimation of other power quality issues such as flicker and phase unbalance
 - (c) Sizing of storage.
 - (d) modelling of renewables in PSS/E
 - (e) assessment of impact of solar on system stability and discussion of mitigation measures
 - (f) sustainability report across triple bottom line
 - (g) assessment of NER clauses
 - (h) impact on the electricity market
 - (i) addressing Progress Report feedback in a separate section
2. statement of issues and evidence of intra and inter team communication, team charter and modification thereof where necessary as well as self and peer assessments
3. Risk assessment
4. succinctness, correct grammar, spelling formatting etc
5. recommendations

Presentation

1. Technical aspects with respect to those mentioned under final report including sustainability and risk assessment and recommendations
2. Clarity and succinctness of slides
3. Presentation being ten minutes or less
4. Participation of all members of team and individual performance

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online Group

Submission Instructions

Submit via links provided on Moodle

Learning Outcomes Assessed

- Perform advanced load flow, stability, and power quality calculations using commercial software
- Tune power system controllers to obtain the desired performance
- Design power transmission infrastructure and renewable generation and storage systems for a reliable power supply
- Apply the Australian Standards, National Electricity rules and general principles of sustainable development
- Present design outcomes professionally as a report, short conference paper and presentation
- Communicate, work and learn, both individually and in teams, in a professional manner.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
