ENEE14006 *Embedded Microcontrollers*
Term 1 - 2019

Profile information current as at 06/05/2024 05:45 am

All details in this unit profile for ENEE14006 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview
This unit will introduce you to microcontroller basics and their real-world applications. Fundamentals of high-level structured language programming, essential for programming a microcontroller, will be taught in this unit. You will learn about different microcontroller families and their similarities and differences from an application point of view. You will also learn about microcontroller architecture, memory maps, addressing modes, interrupts, timers, counters, and hardware interfacing of a chosen microcontroller. You will learn how to program a microcontroller in a high-level language using an integrated development environment. Advance topics of reading analog inputs, implementation of Universal Synchronous Asynchronous Receiver Transmitter connections with the external world, Pulse Width Modulation, will also be covered in this unit. After learning the fundamentals of hardware interfacing you will practice them in a laboratory using a microcontroller development system based on a specific microcontroller and finally design and prototype a real-world application of the embedded system in your project using the same development system. Online students are required to attend the Residential School.

Details
Career Level: *Undergraduate*
Unit Level: *Level 4*
Credit Points: *12*
Student Contribution Band: *8*
Fraction of Full-Time Student Load: *0.25*

Pre-requisites or Co-requisites
Prerequisite: (ENEE13020 Digital Electronics AND ENEE13018 Analogue Electronics) OR ENEX12002 Introductory Electronics
Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure (Higher Education Coursework)](#).

Offerings For Term 1 - 2019
- Bundaberg
- Cairns
- Gladstone
- Mackay
- Mixed Mode
- Rockhampton

Attendance Requirements
All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools
This unit has a Compulsory Residential School for distance mode students and the details are:
Click here to see your [Residential School Timetable](#).

Website
[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment
Each 12-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 25 hours of study per week, making a total of 300 hours for the unit.

Class Timetable

Regional Campuses
Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

Metropolitan Campuses
Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview
1. **Written Assessment**
Weighting: 25%
2. **Written Assessment**
Weighting: 25%
3. **Portfolio**
Weighting: 50%

Assessment Grading
This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the University's Grades and Results Policy for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the CQUniversity Policy site.
You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the CQUniversity Policy site.

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from 'Have your Say' survey

Feedback

The students have appreciated the clear, to the point, and easy to follow assignments.

Recommendation

The assignments will continue to be clear and concise

Feedback from 'Have your Say' survey

Feedback

The students have appreciated the learning material and the depth of knowledge of the teaching staff.

Recommendation

Learning material will further be improved.

Feedback from 'Have your Say' survey

Feedback

The students have appreciated the programming knowledge gained from this unit which even supports someone who does not have prior knowledge in the area to develop into a confident programmer of hardware.

Recommendation

Further improved support for learning will be provided.

Feedback from 'Have your Say' survey

Feedback

Students have highlighted that the assessment criteria in the portfolio did not clearly define the particular project, which leads to several problems in the implementation stage.

Recommendation

The open-ended project allowed the portfolio assessment criteria to have space for any extraordinary projects to score high marks with successful completion. However, in the next offering, the project will be predefined and the portfolio assessment criteria will be clearly specified based on that project as a trial. If students prefer that setup over the open-ended project, then that model will be continued in the future offerings.

Feedback from 'Have your Say' survey

Feedback

Students were unhappy with the level of support in some campuses.

Recommendation

Unit coordinator will use Zoom to provide additional support for all campuses.
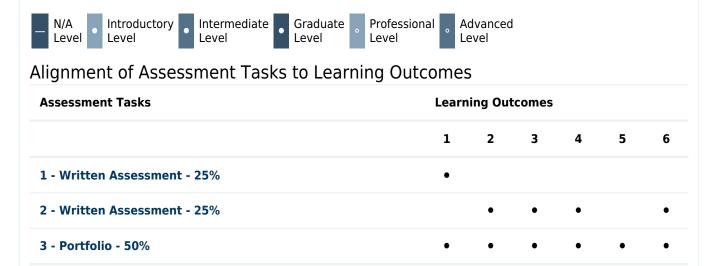

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Apply fundamental structured programming knowledge to develop software solutions
2. Program a microcontroller to interface with external devices such as analog and digital sensors, actuators and computers
3. Analyse and design microcontroller based real-time applications using a given industry standard development system and software tools
4. Prototype an embedded microcontroller system for an authentic application
5. Communicate professionally using relevant technical terminology, symbols, and diagrams and effectively document design and prototyped solutions
6. Work autonomously and as a team member to analyse problems and present solutions.

The Learning Outcomes for this unit are linked with Engineers Australia's **Stage 1 Competency Standard for Professional Engineers**.

Textbooks and Resources

Textbooks

There are no required textbooks.

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Access to a document scanner and a software that can create pdf documents.
- Code::Blocks IDE for C programming (freeware from www.codeblocks.org)
- A computer with 9 pin serial port or USB to serial converter, speaker & microphone, Microsoft Windows OS(7 or later) with admin rights to install software, and good internet connectivity
- MPLAB IDE: MPALB X (provided by CQU on lab computers) or later, and MCC18 complier (free download from Microchip website)

Referencing Style

All submissions for this unit must use the referencing style: [Harvard (author-date)](#)
For further information, see the Assessment Tasks.

Teaching Contacts

Preethi Preethichandra Unit Coordinator

Schedule

Week 1 - 11 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
• Introduction to Embedded Systems and Microcontrollers • Introduction to programming languages • Introduction to C language Programming environment	N/A	

Week 2 - 18 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
• Programming in C language - Fundamentals	N/A	

Week 3 - 25 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC Microcontroller and MPLAB X - Introduction • Programming in C language - Essentials I	N/A	Compulsory Residential School in Rockhampton(27th- 29th March 2019; 9:00 - 17:00)

Week 4 - 01 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC 18F4321 Memory, input and output • Programming in C language - Essentials II	N/A	

Week 5 - 08 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC18F4321 Architecture and addressing modes • Programming in C language - Intermediate level	N/A	**Assignment 1 - C language programming** Due: Week 5 Friday (12 Apr 2019) 11:45 pm AEST

Vacation Week - 15 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic

Week 6 - 22 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC 18F4321 hardware interfacing I - LCD Display units, Timers and Counters	N/A	

Week 7 - 29 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC 18F4321 hardware interfacing II - Sensors (analog and Digital)	N/A	

Week 8 - 06 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC 18F4321 hardware interfacing III - Motors and actuators	N/A	

Week 9 - 13 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC 18F4321 hardware interfacing IV - keypads, ultrasound sensors, advanced sensors	N/A	**Assignment 2 - Hardware Programming using CQU PIC Development kit** Due: Week 9 Friday (17 May 2019) 11:45 pm AEST

Week 10 - 20 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
• PIC18F4321 communication - RS232, I2C, SPI	N/A	

Week 11 - 27 May 2019

Module/Topic	Chapter	Events and Submissions/Topic

•
`Introduction to Assembly language`
`programming`
	N/A	

Week 12 - 03 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic
Embedded microcontroller future opportunities	N/A	**Team project - Portfolio** Due: Week 12 Friday (7 June 2019) 11:45 pm AEST

Review/Exam Week - 10 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic

Exam Week - 17 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic

- 24 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic

Term Specific Information

The compulsory residential school will be held in Rockhampton from 27/03/2019 to 29/03/2019.

Assessment Tasks

1 Assignment 1 - C language programming

Assessment Type
Written Assessment

Task Description
This assignment is baced on C language programming. The essential C language skills needed for embedded microcontroller programming will be tested here and students should develop their own solutions to the given problems. Try to analyse the system first and develop a concept solution, develop a graphical representation of it first before start coding. All evidence of your own work including a soft copy of your workbook should be provided as evidence.
This is an individual assessment item and no teamwork or contribution from others allowed.

Assessment Due Date
Week 5 Friday (12 Apr 2019) 11:45 pm AEST

Return Date to Students
Week 7 Friday (3 May 2019)
Marked assignment with feedback. However, there will be no model answers provided.

Weighting
25%

Assessment Criteria
Detailed assessment criteria is in the assignment itself.
This assignment is based on C language programming skills. To obtain full marks students must provide all in detail problem solving and solution development evidences. Each student must have their unique programms developed by themselves. Answer to every problem should include a flowchart / NS-diagram or other similar graphical representation

of the solution. Students should submit the complete working C language code for each question. A clean working program as the answer to a question without evidence of development of it(ex: without a soft copy of workbook pages relevant to it) will receive a maximum of 50% of the allocated marks for that question.

Referencing Style

- [Harvard (author-date)](#)

Submission
Online

Submission Instructions
Online submission as a single WORD file and complete program listing for each question to be included in the answer. The program listings should be able to compile without modifications when copied and pasted on Code:Blocs compiler's editor.

Learning Outcomes Assessed

- Apply fundamental structured programming knowledge to develop software solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

2 Assignment 2 - Hardware Programming using CQU PIC Development kit

Assessment Type
Written Assessment

Task Description
This assignment is baced on essential C language programming skills needed for embedded microcontroller programming. The embedded hardware programming skills will be tested here and students should develop their own solutions to the given problems. Try to analyse the system first and develop a concept solution, develop a graphical representation of it first before start coding. All evidence of your own work including a soft copy of your workbook should be provided as evidence.
This assignment is based on CQU PIC development board and all programs must be developed with MPLAB X IDE and in C language. More technical details will be provided with the assignment.
This is an individual assessment item and no teamwork or contribution from others allowed.

Assessment Due Date
Week 9 Friday (17 May 2019) 11:45 pm AEST

Return Date to Students
Week 11 Friday (31 May 2019)
Marked assignment with feedback. However, there will be no model answers provided.

Weighting
25%

Assessment Criteria
Detailed assessment criteria is in the assignment itself.
To obtain full marks students must provide all in detail problem solving and solution development evidences. Each student must have their unique programms developed by themselves. Answer to every problem should include a flowchart/ NS-diagram or other similar graphical representation of the solution. Students should submit the complete working C language code for each questionA clean working program as the answer to a question without evidence of development of it(ex: a soft copy of workbook pages relevant to it or explanation os your code) will receive a maximum of 50% of the allocated marks for that question.

Referencing Style

- [Harvard (author-date)](#)

Submission
Online

Submission Instructions

Online submission as a single WORD file and complete program listing for each question to be included in the answer. The program listings should be able to compile without modifications when copied and pasted on MPLABX MCC18 C compiler's editor.

Learning Outcomes Assessed

- Program a microcontroller to interface with external devices such as analog and digital sensors, actuators and computers
- Analyse and design microcontroller based real-time applications using a given industry standard development system and software tools
- Prototype an embedded microcontroller system for an authentic application
- Work autonomously and as a team member to analyse problems and present solutions.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

3 Team project - Portfolio

Assessment Type

Portfolio

Task Description

Project Details This is the major project in this unit and it is an open ended project. Student can decide the project in consultation with the lecturer and tutors and must finalize it by the end of week 3. The main hardware used is the CQU PIC Development kit and the sensor/actuator board provided by CQU in around 3rd week of the term. Students are free to use any additional sensors, actuators, and accessories to the project at their own cost. Students develop a working prototype of an embedded system solution for a real world problem. Project outcome(developed prototype) will be tested towards the end of the term.

Portfolio Details

Portfolio is an individual submission based on their individual project. It must contain the following items and ***omission of any of them will result in a Fail Grade:***

Project report containing(but not limited to)
      Executive summary
      Problem definition
      Project scope
      Solution development report(concept level to programming level)
      Project management report
      Project development report(actual physical prototype fabrication)
      Results and discussion
      Lessons learnt and recommendations for future development
Programming report (your complete programming listing of the project)
A copy of peer review of assigned student project(format will be available in Moodle).
Individual workbook (scanned /electronic copy of your workbook including your hand-written work)
Evidence of timely completion of project tasks Problem definition

Assessment Due Date

Week 12 Friday (7 June 2019) 11:45 pm AEST

Return Date to Students

The portfolio will not be returned until the unit grades are released as there is no final examination for this unit.

Weighting

50%

Minimum mark or grade
50% of the allocated marks.

Assessment Criteria
The portfolio marks will be allocated to the project depth, successfulnes of each individual element, successfulness of integrating all elements into a complete working prototype, and professional documentation related to project.
The portfolio marks will be allocated to the level of the project, the level of successful completion, the level of programming techniques and effective memory usages etc.
Detailed description of portfolio assessment criteria will be available in Moodle.

Submission
Online

Learning Outcomes Assessed

- Apply fundamental structured programming knowledge to develop software solutions
- Program a microcontroller to interface with external devices such as analog and digital sensors, actuators and computers
- Analyse and design microcontroller based real-time applications using a given industry standard development system and software tools
- Prototype an embedded microcontroller system for an authentic application
- Communicate professionally using relevant technical terminology, symbols, and diagrams and effectively document design and prototyped solutions
- Work autonomously and as a team member to analyse problems and present solutions.

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Information Technology Competence
- Ethical practice

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?
A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?
A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?
For academic advice and guidance, the Academic Learning Centre (ALC) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest
If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help
If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work
Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
