

# ENEG11006 *Engineering Statics*

## Term 2 - 2020

Profile information current as at 21/09/2024 09:25 am

All details in this unit profile for ENEG11006 have been officially approved by CQUUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

### General Information

#### Overview

Understanding forces applied to structural elements and static equilibrium concepts is essential for analysis of statically determinate engineering structures including beams, trusses, and frames. You will analyse such structures under external forces to create Free-body diagrams, calculate support reactions and determine internal forces acting on the structures. You will be drawing diagrams of Shear Force and Bending Moments after calculating the internal forces.

#### Details

Career Level: *Undergraduate*

Unit Level: *Level 1*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

#### Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

#### Offerings For Term 2 - 2020

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Online
- Rockhampton

#### Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

#### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Online Quiz(zes)**

Weighting: 20%

#### 2. **Written Assessment**

Weighting: 20%

#### 3. **Written Assessment**

Weighting: 20%

#### 4. **Take Home Exam**

Weighting: 40%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from In class

##### Feedback

Many students find this unit challenging and experience difficulty in visualising and formulating various problems.

##### Recommendation

The unit will be offered in Term 2 next year to allow students to complete math units before undertaking ENEG11006. New learning resources should be included to assist students with visualisation of problems.

#### Feedback from In class

##### Feedback

Assessments were returned late.

##### Recommendation

Organising the marking support early in the term to ensure timely return of assessments.

## Unit Learning Outcomes

### On successful completion of this unit, you will be able to:

1. Analyse two dimensional force systems to determine resultant forces
2. Calculate sectional properties such as centre of gravity, centroid and second moment of Inertia of simple structural forms
3. Apply static equilibrium concepts to bodies with external forces and moments, create Free-body diagrams and determine support reactions
4. Analyse statically determinate structures, including beams, frames and trusses, to calculate internal forces and create Shear-force and Bending-moment diagrams
5. Demonstrate a professional level of communication skills in written work.

The learning outcomes are linked to Engineers Australia Stage 1 Competencies and also discipline capabilities. You can find the mapping for this on the [Engineering Undergraduate Course Website](#).

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

 N/A Level   Introductory Level   Intermediate Level   Graduate Level   Professional Level   Advanced Level

### Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes				
	1	2	3	4	5
1 - Online Quiz(zes) - 20%	•				
2 - Written Assessment - 20%			•		
3 - Written Assessment - 20%		•		•	
4 - Take Home Exam - 40%	•	•	•	•	•

## Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes				
	1	2	3	4	5
1 - Communication					•
2 - Problem Solving	•	•	•	•	
3 - Critical Thinking	•	•	•	•	
4 - Information Literacy					
5 - Team Work					
6 - Information Technology Competence					
7 - Cross Cultural Competence					
8 - Ethical practice					
9 - Social Innovation					
10 - Aboriginal and Torres Strait Islander Cultures					

## Alignment of Assessment Tasks to Graduate Attributes

Edition: 14 or later (2017 or later)

Authors: R.C. Hibbeler

Pearson

ISBN: 1488689806

Binding: Paperback

#### Additional Textbook Information

Paperback or e-book copy are fine

[View textbooks at the CQUniversity Bookshop](#)

### IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)

## Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

## Teaching Contacts

**Hassan Baji** Unit Coordinator

[h.baji@cqu.edu.au](mailto:h.baji@cqu.edu.au)

## Schedule

### Week 1 - 13 Jul 2020

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to Statics	Chapter 1: General Principles Chapter 2: Force Vectors	

### Week 2 - 20 Jul 2020

Module/Topic	Chapter	Events and Submissions/Topic
Equilibrium of a Particle	Chapter 3: Equilibrium of a Particle Chapter 4: Force System Resultants	

### Week 3 - 27 Jul 2020

Module/Topic	Chapter	Events and Submissions/Topic
Equilibrium of a Rigid Body I	Chapter 5: Equilibrium of a Rigid Body	Progressive Test #1: Online quizzes The test opens at 9:00 AM Monday of this week and closes at 9:00 PM Monday of next week.

### Week 4 - 03 Aug 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Equilibrium of a Rigid Body II Chapter 5: Equilibrium of a Rigid Body

#### Week 5 - 10 Aug 2020

Module/Topic	Chapter	Events and Submissions/Topic
Center of Gravity and Centroid	Chapter 9: Center of Gravity and Centroid	Progressive Test #2: Online quizzes The test opens at 9:00 AM Monday of this week and closes at 9:00 PM Monday of the next week.

#### Vacation Week - 17 Aug 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

#### Week 6 - 24 Aug 2020

Module/Topic	Chapter	Events and Submissions/Topic
Moment of Inertia	Chapter 10: Moments of Inertia	Progressive Test #3: Online quizzes The test opens at 9:00 AM Monday of this week and closes at 9:00 PM Monday of next week.

#### Week 7 - 31 Aug 2020

Module/Topic	Chapter	Events and Submissions/Topic
Analysis of Trusses: Method of Joints and Section	Chapter 6: Structural Analysis	<b>Assignment 1</b> Due: Week 7 Friday (4 Sept 2020) 11:59 pm AEST

#### Week 8 - 07 Sep 2020

Module/Topic	Chapter	Events and Submissions/Topic
Beams: Internal Forces	Chapter 7: Internal Forces	

#### Week 9 - 14 Sep 2020

Module/Topic	Chapter	Events and Submissions/Topic
Beams: Axial Force, Shear Force and Bending Moment Diagrams	Chapter 7: Internal Forces	

#### Week 10 - 21 Sep 2020

Module/Topic	Chapter	Events and Submissions/Topic
Analysis of Three-Dimensional Systems	Chapters 3-5	

#### Week 11 - 28 Sep 2020

Module/Topic	Chapter	Events and Submissions/Topic
Friction	Chapter 8: Friction	<b>Assignment 2</b> Due: Week 11 Friday (2 Oct 2020) 11:59 pm AEST

#### Week 12 - 05 Oct 2020

Module/Topic	Chapter	Events and Submissions/Topic
Revision		

#### Review/Exam Week - 12 Oct 2020

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

#### Exam Week - 19 Oct 2020

Module/Topic	Chapter	Events and Submissions/Topic
		<b>Final Exam</b> Due: Exam Week Monday (19 Oct 2020) 11:59 pm AEST

## Term Specific Information

Term 2/2020 final exam in this unit is temporarily changed to a take-home exam due to COVID-19.

## Assessment Tasks

### 1 Progressive Tests

**Assessment Type**

Online Quiz(zes)

**Task Description**

This assessment task consists of three "Progressive Tests". First, second and third carries 7%, 7%, and 6% marks, respectively. Each test consists of a number of numerical questions.

Important Notes:

- Each Test is set for 60 minutes. You have 60 minutes from when you start your attempt to submit your answers.
- If you start but leave a test and come back to it later, your 60 min time may have lapsed and you will be scored zero for that attempt.
- You can attempt each test up to three (3) times within the given time frame as specified in the schedule.
- The test will be automatically closed after the end of the given time frame.
- The final mark will be the highest of all the attempts.
- Even though the tests are open for a few days, it is expected that your first attempt would be on the first day.
- The Tests cannot generally be deferred. However, under exceptional circumstances, if you have valid reasons to defer the test(s), please contact the Unit Coordinator with documents of proof before the due date.

**Number of Quizzes**

3

**Frequency of Quizzes**

Other

**Assessment Due Date**

Tests opening and closing details are given on the schedule section.

**Return Date to Students**

Immediately after the test

**Weighting**

20%

**Assessment Criteria**

Full marks allocated to a question will be awarded for each correct answer. No partial marks will be allocated.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking

**Learning Outcomes Assessed**

- Analyse two dimensional force systems to determine resultant forces

### 2 Assignment 1

**Assessment Type**

Written Assessment

**Task Description**

The aim of this assignment is to allow the students to demonstrate their understanding of various concepts, theories and processes studied/developed in this unit covered in weeks 1 to 6.

Assignment 1 will be available by end of Week 2 through unit website.

**Assessment Due Date**

Week 7 Friday (4 Sept 2020) 11:59 pm AEST

**Return Date to Students**

Feedback will be returned two weeks after assignment due date.

**Weighting**

20%

**Assessment Criteria**

Each solution should have the following items:

Statement of a problem in your own words. [10%]

Accurate drawing of assumed Sign Conventions, Free-Body and other diagrams as required for the solution.[20%]

Accuracy in Calculations. [70%]

Appropriate and Professional level of Communication [Pass/Fail - All the steps should be explained in full detail.

You should get Pass from this criteria to get marks from the others.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking

**Learning Outcomes Assessed**

- Apply static equilibrium concepts to bodies with external forces and moments, create Free-body diagrams and determine support reactions

## 3 Assignment 2

**Assessment Type**

Written Assessment

**Task Description**

The aim of this assignment is to allow the students to demonstrate their understanding of various concepts, theories and processes studied/developed in this unit. This assessment will provide you an opportunity to show your understanding on the calculation of Internal forces in trusses and beams and drawing of Internal Force diagrams.

Assignment 2 will be available by end of week 6 through unit website.

**Assessment Due Date**

Week 11 Friday (2 Oct 2020) 11:59 pm AEST

**Return Date to Students**

The assignment will be returned within two weeks

**Weighting**

20%

**Assessment Criteria**

Each solution should have the following items:

Statement of a problem in your own words. [10%]

Accurate drawing of assumed Sign Conventions, Free-Body and other diagrams as required for the solution.[20%]

Accuracy in Calculations. [70%]

Appropriate and Professional level of Communication [Pass/Fail - All the steps should be explained in full detail.

You should get Pass from this criteria to get marks from the others].

Online

## Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking

## Learning Outcomes Assessed

- Calculate sectional properties such as centre of gravity, centroid and second moment of Inertia of simple structural forms
- Analyse statically determinate structures, including beams, frames and trusses, to calculate internal forces and create Shear-force and Bending-moment diagrams

## 4 Final Exam

### Assessment Type

Take Home Exam

### Task Description

In this term and due to COVID-19, the final exam is replaced by a take-home exam during the University examination weeks. The exam paper will be released on the unit Moodle site at 9:00am on the day of the exam. You have to independently work through the exam paper and upload your solution to the unit Moodle no later than 4:00pm on the same day of the exam. Your submission has to be clearly and neatly presented.

### Assessment Due Date

Exam Week Monday (19 Oct 2020) 11:59 pm AEST

Term 2/2020 final exam in this unit is temporarily changed to a take-home exam due to COVID-19.

### Return Date to Students

### Weighting

40%

### Minimum mark or grade

50% (20 of 40)

### Assessment Criteria

Solution for each question should have the following items:

Statement of a problem in your own words. [10%]

Accurate drawing of assumed Sign Conventions, Free-Body and other diagrams as required for the solution.[20%]

Accuracy in Calculations. [70%]

Appropriate and Professional level of Communication [Pass/Fail - All the steps should be explained in full detail.

You should get Pass from this criteria to get marks from the others].

### Referencing Style

## Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Ethical practice

## Learning Outcomes Assessed

- Analyse two dimensional force systems to determine resultant forces
- Calculate sectional properties such as centre of gravity, centroid and second moment of Inertia of simple structural forms
- Apply static equilibrium concepts to bodies with external forces and moments, create Free-body diagrams and determine support reactions
- Analyse statically determinate structures, including beams, frames and trusses, to calculate internal forces and create Shear-force and Bending-moment diagrams
- Demonstrate a professional level of communication skills in written work.

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
