ENEG11007 *Engineering Industry Project Investigation*

Term 2 - 2024

Profile information current as at 12/05/2024 05:11 am

All details in this unit profile for ENEG11007 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will apply, expand and reflect on your knowledge of professional engineering practice through investigating a real-world engineering project. You will work in a small team guided by a professional engineer or members from the Engineers Without Borders Challenge to develop your project outcomes. You will establish a scope for a team project that describes the requirements and potential issues involved. You will also design and conduct a technical investigation incorporating the engineering method of problem-solving to assess several viable solutions and; look to enhance project outcomes by applying concepts of sustainability and evidence-based decision making. You will also demonstrate an understanding of measurement techniques and data analysis methods in at least one technical area of engineering, and demonstrate professional communication skills by creating a team technical report and presentation. Throughout the unit, you will be compiling an Individual Portfolio to showcase your sustained contributions to the project and to demonstrate a professional attitude for working individually and in your team.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Satisfaction Survey

Feedback

Students appreciated the helpfulness of lecturers and tutors, enjoyed working with industry partners, and found the assessments suitable for flexible learning.

Recommendation

Continue providing a supportive environment, fostering industry collaborations, and offering suitable assessments for various students' needs.

Feedback from Student Satisfaction Survey

Feedback

Students found the unit well-structured, with clear explanations and an abundance of helpful resources.

Recommendation

Maintain the structure and keep expanding the resources available to students if needed.

Feedback from Student Satisfaction Survey

Feedback

Students gained valuable industry insight and improved project management skills through real-life projects.

Recommendation

Continue securing real-life local industry projects to help students develop practical skills and a deeper understanding of the engineering practice.

Feedback from Student Satisfaction Survey

Feedback

Some students encountered communication issues with industry contacts.

Recommendation

Improve the selection process for project sponsors and provide clearer guidelines for industry communication with active support by the teaching team.
