

ENEG11009 *Fundamentals of Energy and Electricity*

Term 2 - 2018

Profile information current as at 30/04/2024 11:27 am

All details in this unit profile for ENEG11009 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

Corrections

Unit Profile Correction added on 02-08-18

The final exam is restricted. Students can bring in one double-sided A4 sheet with notes on it. The sheet needs to be submitted with answer script. Duration of the final exam is 180 minutes.

General Information

Overview

In this unit, you will learn how to apply fundamental laws of physics related to energy and electricity to real world engineering problems. You will be introduced to the concepts of heat, energy, work, energy conversion and laws of thermodynamics. You will apply energy principles of rotational motion, simple harmonic motion and oscillations. You will learn the concepts of voltage and current and use Kirchhoff's laws to analyse simple direct current (DC) and alternating current (AC) electrical circuits. You will also learn the operation of electrical machines such as motors and generators and how to select a machine for a given application. Throughout this unit you will be using experimental and measurement techniques to investigate relevant physical phenomena and learn how they can be used in practice to solve engineering problems. This unit will also provide you with opportunities to develop communication skills through collaborative team work and opportunities to create professional documentation through lab reports. Distance students are required to attend the compulsory Residential School.

Details

Career Level: *Undergraduate*

Unit Level: *Level 1*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2018

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Assessment Overview

1. **Written Assessment**

Weighting: 15%

2. **Written Assessment**

Weighting: 15%

3. **Practical and Written Assessment**

Weighting: 20%

4. **Examination**

Weighting: 40%

5. **Online Quiz(zes)**

Weighting: 10%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit evaluation

Feedback

Assessment feedback timing was appreciated and found it helped student learning. The Lecturer staff were praised for providing help when needed. Quick and detailed forum post replies were appreciated.

Recommendation

Continue the same practices.

Feedback from Unit evaluation

Feedback

Workload of the unit was too high.

Recommendation

Unit content will be reviewed to identify where the workload can be reduced and Foundation curriculum will be reviewed for current engineering units.

Feedback from Unit evaluation

Feedback

Recommended eText book was harder to use than a print textbook.

Recommendation

Information will be provided regarding the print textbooks. Print version of the textbooks will be offered and further learning material will be added as unit online resources. eTextbook was used mainly as a cost saving measure for students.

Feedback from Teaching team

Feedback

Improve pass rate.

Recommendation

Students will be informed about the importance of continuous engagement to pass this unit. Workload will be reduced. Percentage of hard exam questions developed from complex topics will be reduced.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Solve simple engineering problems in energy, heat, rotational motion, electricity and magnetism
2. Apply information literacy skills to research and evaluate information needed for effective independent learning
3. Explain the operating principles of laboratory equipment and perform error analyses
4. Investigate physical phenomena using scientific experiments and safe work practices
5. Create professional documentation of the solutions, designs and analyses using engineering terminologies, diagrams and symbols that conform to Australian Standards
6. Work individually and collaboratively in a team to produce quality outputs

Learning outcomes are linked to Engineers Australia Stage 1 Competencies and also discipline capabilities. You can find the mapping for this on the [Engineering Undergraduate Course website](#).

Textbooks and Resources

Textbooks

ENEG11009

Prescribed

Fundamentals of Energy and Electricity

1st edition (2016)

Authors: Knight, R.

Pearson Education

Australia

ISBN: 9781488616006

Binding: Paperback

Additional Textbook Information

This is a custom design eBook especially for this unit. This textbook include material from the following 3 Physics text books: "College Physics: A Strategic Approach" by Knight, Jones and Field, "Physics: Principles with Applications", by Giancoli, and "Principals and Practices of Physics" by Mazur. This book is only available in eBook format and you need to purchase this directly through Pearson Education online. More information about purchasing the book will be available in the unit Moodle site.

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)

Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)
For further information, see the Assessment Tasks.

Assessment Tasks

1 Assignment 1

Assessment Type

Written Assessment

Task Description

This assessment item covers the topics 1-4. The assignment questions will be released on the unit website at the beginning of the term. Handwritten scanned calculations and formulas will be accepted. Students can scan clear and legible handwritten calculations for online submission.

Assessment Due Date

Vacation Week Monday (13 Aug 2018) 11:45 pm AEST

Return Date to Students

We strive to return assessments within 2 weeks after due date

Weighting

15%

Assessment Criteria

The assignments will be graded using the following criteria:

- Correct answers;
- Correct format;
- All working must be shown to obtain marks;
- Assignments must be neat, tidy and legible;
- All questions must be attempted.

Referencing Style

- [Harvard \(author-date\)](#)

3 Laboratory Activities and Report

Assessment Type

Practical and Written Assessment

Task Description

This assessment item covers all topics.

Laboratory sessions will be held at various times, as directed by the unit Moodle site, through the term or in the case of distance students at the residential school. All information regarding the laboratories will be provided to the students via the unit Moodle site.

Laboratory attendance is compulsory and all students **must pass** the laboratory exercise assessment in order **to pass the unit**.

Details of the laboratory exercises will be posted on the unit website at the start of the term.

Although students will be working in teams during the laboratory session, each student must submit an individual lab report (not one report per lab group) by the due date(s).

Assessment Due Date

Lab Report Part I Due on Monday Week 7 11:45 PM AEST and Lab Report Part II Due on Friday Week 11 11:45 PM AEST

Return Date to Students

We strive to return assessments within 2 weeks after due date

4 Online QUIZ(ZES)

Assessment Type

Online Quiz(zes)

Task Description

The assessment is a set of five online fortnightly quizzes which can be accessed via the unit Moodle site. Each online quiz weights 2% of your final mark (10% in total). The quizzes are an integrated part of the study to test on the key concepts of each topic. Each quiz will be available up to 2 weeks after the relevant fortnight to allow students who cannot find time each week for study. For example quiz on Week 1 and 2 will be available on Monday Week 3 and will close on Sunday the week after.

- Each quiz has a set time to complete and once a student start a quiz, it will close after the set time.
- Once started, a quiz cannot be paused in the middle. Students are strongly advised to sufficiently cover the material related to each quiz before starting the quiz.
- You can attempt each quiz 2 times within the given time frame as specified in the schedule.
- Final mark will be the highest of all the attempts.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
