

ENEM12006 *Fluid Mechanics*

Term 2 - 2019

Profile information current as at 02/05/2024 08:49 am

All details in this unit profile for ENEM12006 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces the fundamental properties of fluids, analysis of pipe flow and analysis of buoyancy and stability of floating objects. It presents methods of analysing fluid systems using the concept of a control volume combined with the conservation of mass and momentum equations. Students analyse incompressible flows in pipe systems and use similitude and modelling principles and techniques to solve problems in fluid mechanics. Students will prepare technical and laboratory reports using appropriate "mechanical engineering language", and document the process of modelling and analysis. They are required to act professionally in presenting information, communicating, working and learning, both individually and in teams. Distance education (FLEX) students must have access to a computer and make frequent use of the Internet. FLEX students will be required to attend a residential school.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisites: MATH11219 Engineering Mathematics AND [ENEG11006 Engineering Statics OR ENEM12007 Statics & Dynamics] AND [ENEG11009 Fundamentals of Energy & Electricity OR PHYS11185 Engineering Physics B]

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2019

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Assessment Overview

1. **Practical and Written Assessment**

Weighting: 20%

2. **Written Assessment**

Weighting: 20%

3. **Written Assessment**

Weighting: 20%

4. **Written Assessment**

Weighting: Pass/Fail

5. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Schedule

Week 1 - 15 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Unit Overview and Fluid Properties	1	Tutorial 1: Fluid properties

Week 2 - 22 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Fluid Statics and Manometry	2	Tutorial 2: Fluids Statics and Manometry

Week 3 - 29 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Equilibrium, Buoyancy and Forces on Submerged Bodies	2	Tutorial 3: Buoyancy and Forces on Submerged Bodies

Week 4 - 05 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Eulerian and Lagrangian mechanics, One dimensional flow, Euler's equation and Bernoulli's equation	3 and 4	Tutorial 4: Euler's equation and Bernoulli's equation

Week 5 - 12 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Control Volume, Conversion of Mass, Momentum Equation	4, 5 and 6	Tutorial 5: Control Volume, Conversion of Mass, and Momentum Equation

Vacation Week - 19 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Non teaching week		No tutorial. Residential School for distance students. For more information, see Handbook

Week 6 - 26 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Application of Momentum Equation	6	Tutorial 6: Momentum Equation Assignment 1 Due: Week 6 Monday (26 Aug 2019) 11:45 pm AEST

Week 7 - 02 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Viscous Effects, Navier Stoke's equation	6	Tutorial 7: Viscous Effects and Navier Stoke's equation

Week 8 - 09 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Boundary Layer Concept, Laminar and Turbulent Flow, Reynolds Stress	6, 8 and 9	Tutorial 8: Boundary Layer Concept, Laminar and Turbulent Flow, Reynolds Stress

Week 9 - 16 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Incompressible Flow in Pipes, Moody Diagram, Pipe Bends, and Fittings, Measurement of Fluid Flow	8	Tutorial 9: Incompressible Flow in Pipes

Week 10 - 23 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Dimensional Analysis, Buckingham Pi Theorem, Common Dimensionless Numbers	7	Tutorial 10: Dimensional Analysis

Week 11 - 30 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Dynamic Similarity, Modelling Technique and Experimentation	7	Tutorial 11: Dynamic Similarity Assignment 2 Due: Week 11 Friday (4 Oct 2019) 11:45 pm AEST

Week 12 - 07 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
Reveiw	Sample problems	Revision Laboratory Reports Due: Week 12 Friday (11 Oct 2019) 11:45 pm AEST
Review/Exam Week - 14 Oct 2019		
Module/Topic	Chapter	Events and Submissions/Topic
Unit Review		Workbook Due: Review/Exam Week Friday (18 Oct 2019) 11:45 pm AEST
Exam Week - 21 Oct 2019		
Module/Topic	Chapter	Events and Submissions/Topic

Term Specific Information

Assessment Tasks

1 Laboratory Reports

Assessment Type

Practical and Written Assessment

Task Description

Each student will be required to complete the laboratory exercises as per the instruction sheets which will be available in the unit website. Laboratory sessions are compulsory, and each session will be up to 2 hours in duration. The timetable of laboratories will be supplied separately via unit website (Moodle).

The following laboratory activities will be conducted by all students:

1. Flow Rate Measurement and Pipe Flow.
2. Stability of Floating Bodies and Centre of Pressure.
3. Wind Tunnels Tests.

Assessment Due Date

Week 12 Friday (11 Oct 2019) 11:45 pm AEST

Return Date to Students

In two weeks from the date of submission

Weighting

20%

Minimum mark or grade

You must get a minimum 50% on this assessemnt item to secure a Pass in this unit

Assessment Criteria

Reporting of major elements/steps (eg. Theory, Objective, Procedures, Results etc) taken to undertake the laboratory sessions (40% of total marks).

Clarity of expression, including correct grammar, spelling, punctuation and appropriate referencing of sources (10% of total marks).

Accurate and correct use and presentation of mathematical equations or graphs, tables, diagrams and/or drawings (30% of total marks).

Discussion and logical presentation of ideas and arguments by means of data analysis and synthesis (20% of total marks).

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online Group

Submission Instructions

Submission should be via unit website (Moodle)

Learning Outcomes Assessed

- prepare technical and laboratory reports based on thorough evaluation of data and associated uncertainties
- use appropriate mechanical engineering language in context
- document the process of modelling and analysis and present the information in a professional manner
- communicate, work and learn, individually and in peer learning teams in a professional manner
- explain the fundamental properties of fluids and apply this knowledge to analyse fluid flow in pipes
- analyse the buoyancy and stability of floating bodies
- analyse fluid systems using the concept of a control volume combined with the conservation of mass and momentum equations
- analyse incompressible flows in pipe systems

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Information Technology Competence
- Ethical practice

2 Assignment 1

Assessment Type

Written Assessment

Task Description

This assignment covers the weekly topics from Week 1 to Week 5. Students are required to answer analytical and numerical questions. The assignment tasks will be uploaded on the unit website (Moodle).

Assessment Due Date

Week 6 Monday (26 Aug 2019) 11:45 pm AEST

Return Date to Students

In two weeks from the date of submission

Weighting

20%

Minimum mark or grade

You must get a minimum 50% on this assessemnt item to secure a Pass in this unit

Assessment Criteria

Each question in the assignment will be assessed separately against the following criterion:

20% of the total marks are for accuracy and correct result

Correct application of maths and arithmetic

Correct answer to the questions

Correct use of terminology, units and conventions

40% for correct method and procedure

Correct selection and application of formula and maths

Clear presentation of mathematical and arithmetical calculations for the results obtained

Evidence of checking results (mathematical, graphical etc.)

30% for evidence of understanding

Explanation of choices made (why a particular procedure/method is selected)

Interpretation of results including limitations etc, if any

Correct and orderly procedures and required steps

10% for professional presentation

Clear identification and statement of each problem

Logical layout of analysis

Appropriate use of diagrams

Referencing Style

- [Harvard \(author-date\)](#)

4 Workbook

Assessment Type

Written Assessment

Task Description

The Workbook provides a record or detailed diary of each individual student's study and learning activities throughout the unit. It should include all individual work and activities.

Maintaining a Workbook is viewed as a sound study technique. It is intended to provide an evidence if students have adequately studied the whole unit and achieved unit learning outcomes. The Workbook can be handwritten or kept as a text file. Each entry should be dated and pages should be numbered with student name or initials. It should be prepared week by week, not at the end of the Term. It should contain your attempts at problems including failures and fixes, brainstorming, draft notes and developing ideas.

A typical Workbook should record:

- study notes taken while studying textbooks and unit resources
- study notes taken during lectures and/or workshops
- personal study summaries of key concepts
- notes, sketches/ drawings or mind-maps
- planning and preparation for team/project tasks
- planning and preparation for online unit discussions
- workbook practice tasks you are asked to complete in the Unit Website
- initial attempts at set tutorial tasks
- initial attempts at assignment tasks
- preparation for class tests or exams.

Assessment Due Date

Review/Exam Week Friday (18 Oct 2019) 11:45 pm AEST

Return Date to Students

Workbook will be returned after the CQU Certification of Grades.

Weighting

Pass/Fail

Minimum mark or grade

Pass

Assessment Criteria

Workbook questions have been set for each topic and are available on the unit website. If students have difficulty with

Workbook questions, they should seek assistance. All questions must be successfully completed in the workbook and responses must show sufficient working and explanation to allow step-by-step checking by tutors. At least 50% of the questions must be completed to achieve a Pass grade.

A question will be deemed to have been completed if the student has shown correct procedure and sound understanding of the work. All calculations should be justified with reference to the text or relevant Standards and Codes.

Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

40%

Length

180 minutes

Minimum mark or grade

50

Exam Conditions

Closed Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Calculator - all non-communicable calculators, including scientific, programmable and graphics calculators are authorised

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
