

# ENEM12009 *Structural Mechanics*

## Term 1 - 2021

Profile information current as at 26/04/2024 02:33 pm

All details in this unit profile for ENEM12009 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

### General Information

#### Overview

In this unit, you will study the behaviour of solid bodies under different loadings by applying basic stress analysis principles and the introductory knowledge of engineering materials. You will gain in-depth understanding of the concepts of continuum stress, strain and deflection; analyse the response of mechanical components to axial, transverse, torsional, bending and buckling loads in the linear elastic regime. You will apply the theory of generalised Hooke's law to design pressure vessels and similar thin walled structures. You will perform calculations concerned with the mechanical properties of materials and conceptually design different mechanical components and structures based on strength, stiffness and stability. You will acquire the skills and knowledge required to develop analytical techniques that are used to solve a wide range of linear stress/strain problems in engineering practice.

#### Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

#### Pre-requisites or Co-requisites

Pre-requisites: MATH11219 Applied Calculus AND (ENEG11006 Engineering Statics or ENEM12007 Statics & Dynamics) AND (ENEG11008 Materials for Engineers or ENEG12005 Material Science and Engineering)

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

#### Offerings For Term 1 - 2021

- Bundaberg
- Cairns
- Gladstone
- Mackay
- Online
- Rockhampton

#### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

#### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Written Assessment**

Weighting: 20%

#### 2. **Written Assessment**

Weighting: 20%

#### 3. **Written Assessment**

Weighting: 20%

#### 4. **Written Assessment**

Weighting: Pass/Fail

#### 5. **Examination**

Weighting: 40%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Unit Moodle student feedback & oral and e-mail feedback

**Feedback**

Students like the use of 3D printed models in this unit as they thought it improved their learning.

**Recommendation**

Keep this innovative, engaging learning and teaching approach for student learning.

#### Feedback from Unit Moodle student feedback

**Feedback**

The way of delivering unit content using lecturers, inside-out tutorials, structural analysis, engagement was appreciated by the students.

**Recommendation**

Keep it up and improve further.

#### Feedback from Unit Moodle student feedback

**Feedback**

Cancellation of term end exam creates a problem for students.

**Recommendation**

This happened because of COVID-19. Hopefully, it will not happen in 2021.

#### Feedback from Unit Moodle student feedback

**Feedback**

The students like to get assignment feedback on time.

**Recommendation**

The student assignment returning score is over the corporate target. However, it can be improved further.

## Unit Learning Outcomes

**On successful completion of this unit, you will be able to:**

1. Analyse the elastic behaviour of engineering structures and components and determine stresses, principal stresses, strains and deflections and the effects of impact loads
2. Analyse stress and strain using experimental methods
3. Explain theories of failure and apply failure analysis to structures and components
4. Describe the nature of engineering assumptions and explain both the approaches used to deal with uncertainty and limitations of the validity of results
5. Prepare professional, technical project documentation showing evaluation of uncertainties and results obtained
6. Communicate, work and learn independently and collaboratively and communicate in a professional manner

Learning outcomes are linked to Engineers Australia Stage 1 Competencies and also discipline capabilities. You can find the mapping for this on the [Engineering Undergraduate Course website](#).

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

### Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes					
	1	2	3	4	5	6
1 - Written Assessment - 20%	•	•	•		•	
2 - Written Assessment - 20%		•	•	•	•	
3 - Written Assessment - 20%			•	•	•	•
4 - Written Assessment - 0%	•	•	•	•	•	•
5 - Examination - 40%	•	•	•			

### Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes					
	1	2	3	4	5	6

## Textbooks and Resources

### Textbooks

ENEM12009

#### Prescribed

#### Mechanics of Materials

Edition: 7th Ed in SI Units (2015)

Authors: Beer and Johnston

McGraw Hill

New York , NY , USA

ISBN: 978-9-814-59254-7

Binding: Hardcover

#### Additional Textbook Information

N/A

[View textbooks at the CQUniversity Bookshop](#)

### IT Resources

**You will need access to the following IT resources:**

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)

## Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

## Teaching Contacts

**Nirmal Mandal** Unit Coordinator

[n.mandal@cqu.edu.au](mailto:n.mandal@cqu.edu.au)

## Schedule

### Week 1 - 08 Mar 2021

Module/Topic	Chapter	Events and Submissions/Topic
Lecture - Mechanical properties of materials, Elastic behaviour - stress, strain and displacement, the concept of stresses: axial, bending and torsional stress components, stresses in inclined planes, design criteria, the factor of safety Tutorial- Four tutorial problems will be supplied during the session	Chapter 1, Beer	

**Week 2 - 15 Mar 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture -Mechanical Properties of Materials, stress – strain diagram, Deformation, Hooke's Law (axial force) Tutorial- Four tutorial problems will be supplied during the session	Chapter 2, Beer	

**Week 3 - 22 Mar 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture-: Stress –strain, Poisson's ratio – Generalised Hooke's Law, elastic-plastic deformation, residual stress Tutorial- Four tutorial problems will be supplied during the session	Chapter 2, Beer	

**Week 4 - 29 Mar 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture- Torsional stress: Torsion formula, angle of twist, design of transmission shaft Tutorial- Four tutorial problems will be supplied during the session	Chapter 3 Beer	<b>Assignment 1</b> Due: Week 4 Friday (2 Apr 2021) 11:45 pm AEST

**Week 5 - 05 Apr 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture - Stresses in bending loading, analysis of bending stresses in beams Tutorial- Four tutorial problems will be supplied during the session	Chapter 4 Beer	

**Vacation Week - 12 Apr 2021**

Module/Topic	Chapter	Events and Submissions/Topic
no lecture, no tute	N/A	

**Week 6 - 19 Apr 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture - Design of beams for bending: shear force and bending moment diagrams, transverse shear stresses Tutorial- Four tutorial problems will be supplied during the session	Chapter 5, 6 Beer	

**Week 7 - 26 Apr 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture- Transformations of stresses and strains: principal stresses, Mohr's circle, combined loadings Tutorial- a few tutorial problems will be supplied during the session	Chapter 7, 8 Beer	

**Week 8 - 03 May 2021**

Module/Topic	Chapter	Events and Submissions/Topic
Lecture- Deflections of beams, measurement methods Tutorial- a few tutorial problems will be supplied during the session	Chapter 9 Beer	<b>Assignment 2</b> Due: Week 8 Friday (7 May 2021) 11:45 pm AEST

**Week 9 - 10 May 2021**

Module/Topic	Chapter	Events and Submissions/Topic

Lecture- Linear elastic buckling  
Tutorial- a few problems will be supplied during the session

Chapter 10, Beer

### Week 10 - 17 May 2021

Module/Topic	Chapter	Events and Submissions/Topic
Lecture- Failure theories of structural elements, Energy method Tutorial - a few tutorial problems will be given during the session	Chapter 7, 11 Beer	

### Week 11 - 24 May 2021

Module/Topic	Chapter	Events and Submissions/Topic
Lecture- Failure: Fatigue and Fatigue life Tutorial - a few tutorial problems will be given during the session	Lecturer notes, CRO	<b>Assignment 3</b> Due: Week 11 Friday (28 May 2021) 11:45 pm AEST

### Week 12 - 31 May 2021

Module/Topic	Chapter	Events and Submissions/Topic
Lecture: Introduction to FEA and Review of unit Tutorial: No tutorials	Chapter: all, Lecture notes, CRO	<b>Workbook</b> Due: Week 12 Friday (4 June 2021) 11:45 pm AEST

### Review/Exam Week - 07 Jun 2021

Module/Topic	Chapter	Events and Submissions/Topic
Preparation	all	

### Exam Week - 14 Jun 2021

Module/Topic	Chapter	Events and Submissions/Topic
Preparation	all	

## Assessment Tasks

### 1 Assignment 1

#### Assessment Type

Written Assessment

#### Task Description

This assignment assesses contents from week 1 to week 4 of this unit. The assignment questions will be available in the Moodle site at the beginning of Week 1

#### Assessment Due Date

Week 4 Friday (2 Apr 2021) 11:45 pm AEST

Compulsory submission

#### Return Date to Students

Week 6 Friday (23 Apr 2021)

After two working weeks of submission date

#### Weighting

20%

#### Minimum mark or grade

50%

#### Assessment Criteria

It will be graded based on presentation, correct process, appropriate explanation, neat diagram, correct units, interpretation of results and analysis etc.

#### Referencing Style

- [Harvard \(author-date\)](#)

**Submission**

Online

**Submission Instructions**

It is not expected that students will type up calculations. Students should scan hand calculation for online submissions

**Learning Outcomes Assessed**

- Analyse the elastic behaviour of engineering structures and components and determine stresses, principal stresses, strains and deflections and the effects of impact loads
- Analyse stress and strain using experimental methods
- Explain theories of failure and apply failure analysis to structures and components
- Prepare professional, technical project documentation showing evaluation of uncertainties and results obtained

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

## 2 Assignment 2

**Assessment Type**

Written Assessment

**Task Description**

This assignment assesses contents from week 5 to week 8 of this unit. The assignment questions will be available on the Moodle site at the beginning of Week 5

**Assessment Due Date**

Week 8 Friday (7 May 2021) 11:45 pm AEST

Compulsory submission

**Return Date to Students**

Week 10 Friday (21 May 2021)

After two weeks of submission date

**Weighting**

20%

**Minimum mark or grade**

50%

**Assessment Criteria**

It will be graded based on presentation, correct process, appropriate explanation, neat diagram, correct units, interpretation of results and analysis etc.

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Submission Instructions**

It is not expected that students will type up calculations. Students should scan hand calculation for online submissions

**Learning Outcomes Assessed**

- Analyse stress and strain using experimental methods
- Explain theories of failure and apply failure analysis to structures and components
- Describe the nature of engineering assumptions and explain both the approaches used to deal with uncertainty and limitations of the validity of results
- Prepare professional, technical project documentation showing evaluation of uncertainties and results obtained

**Graduate Attributes**

- Problem Solving
- Critical Thinking
- Information Literacy

- Information Technology Competence
- Ethical practice

## 3 Assignment 3

### Assessment Type

Written Assessment

### Task Description

This assignment assesses contents from week 9 to week 11 of this unit. The assignment questions will be available on the Moodle site at the beginning of Week 9

### Assessment Due Date

Week 11 Friday (28 May 2021) 11:45 pm AEST  
Compulsory submission

### Return Date to Students

Week 12 Friday (4 June 2021)  
After one week of submission date

### Weighting

20%

### Minimum mark or grade

50%

### Assessment Criteria

It will be graded based on presentation, correct process, appropriate explanation, neat diagram, correct units, interpretation of results and analysis etc.

### Referencing Style

- [Harvard \(author-date\)](#)

### Submission

Online

### Submission Instructions

It is not expected that students will type up calculations. Students should scan hand calculation for online submissions

### Learning Outcomes Assessed

- Explain theories of failure and apply failure analysis to structures and components
- Describe the nature of engineering assumptions and explain both the approaches used to deal with uncertainty and limitations of the validity of results
- Prepare professional, technical project documentation showing evaluation of uncertainties and results obtained
- Communicate, work and learn independently and collaboratively and communicate in a professional manner

### Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

## 4 Workbook

### Assessment Type

Written Assessment

### Task Description

This assignment assesses contents from week 1 to week 12 of this unit.

The workbook is graded as a pass/fail based on the satisfactory performance of the criteria. You have to put solutions to problems in tutorials, and at least 2 extra workbook problems (if any) given on a weekly basis.

### Assessment Due Date

Week 12 Friday (4 June 2021) 11:45 pm AEST  
Compulsory submission

### Return Date to Students

After a week of submission date: A general e-mail on workbook assessment will be sent to the students through Moodle

### **Weighting**

Pass/Fail

### **Minimum mark or grade**

Students should obtain a Pass/Fail grade

### **Assessment Criteria**

The criteria and associated weightings are given below. The allocations are as follows:

10% Presentation and layout - includes written appearance of the document, quality of arrangement in records, use of title sections, legality, etc.

90% Content - demonstrates the application of knowledge, adequate personal study and application of unit materials. There should be evidence of application and analysis relating to each unit topic.

### **Referencing Style**

- [Harvard \(author-date\)](#)

### **Submission**

Online

### **Submission Instructions**

It is not expected that students will type up calculations. Students should scan hand calculation for online submissions

### **Learning Outcomes Assessed**

- Analyse the elastic behaviour of engineering structures and components and determine stresses, principal stresses, strains and deflections and the effects of impact loads
- Analyse stress and strain using experimental methods
- Explain theories of failure and apply failure analysis to structures and components
- Describe the nature of engineering assumptions and explain both the approaches used to deal with uncertainty and limitations of the validity of results
- Prepare professional, technical project documentation showing evaluation of uncertainties and results obtained
- Communicate, work and learn independently and collaboratively and communicate in a professional manner

### **Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Team Work
- Information Technology Competence
- Cross Cultural Competence

## **Examination**

### **Outline**

Complete an invigilated examination.

### **Date**

During the examination period at a CQUniversity examination centre.

### **Weighting**

40%

### **Length**

180 minutes

### **Minimum mark or grade**

50%

### **Exam Conditions**

Closed Book.

### **Materials**

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Calculator - all non-communicable calculators, including scientific, programmable and graphics calculators are authorised

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
