ENEM28001 *Finite Element Analysis for Engineering Design*

Term 1 - 2027

Profile information current as at 08/10/2026 01:36 am

All details in this unit profile for ENEM28001 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This project-based learning unit will use cutting-edge computational design techniques to solve complex multidisciplinary problems in mechanical, structural and electromechanical engineering. You will formulate innovative design ideas for authentic applications and use the latest finite element simulation software to obtain accurate insights into how they will perform in practice. You will be introduced to the variational principles in statics and dynamics of structures and machines, finite element methods (FEM) and analysis procedures, principles of multivariate analysis, and parametric design optimisation techniques. You will apply these procedures to model and simulate a variety of problems at the interface of the mechanical, structural, electrical, and mechatronic disciplines. You will gain hands-on experience with an industry-standard finite element analysis software package.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: *12*

Student Contribution Band: *8*

Fraction of Full-Time Student Load: *0.25*

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2027

- Melbourne
- Online
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Information for Class and Assessment Overview has not been released yet.
This information will be available on Monday 11 January 2027

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Academic Progression Policy and Procedure
- Student Refund and Credit Balance Policy and Procedure
- Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Improve video resources.

Recommendation

The Unit Coordinator should review the quality of the video resources and update them.

Feedback from SUTE

Feedback

Use real world assessment problems.

Recommendation

The Unit Coordinator should review and adopt more real-world assessment problems.

Feedback from SUTE

Feedback

Review amount of weekly content.

Recommendation

The unit has been benchmarked using industry feedback in 2026. The Unit Coordinator should consider the feedback and amend the overall volume of content being delivered in the unit.

Feedback from SUTE

Feedback

Provide clearer expectations.

Recommendation

The Unit Coordinator should endeavour to further improve the feedback being provided to students.

Unit Learning Outcomes

Information for Unit Learning Outcomes has not been released yet.
This information will be available on Monday 11 January 2027

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Information for Alignment of Learning Outcomes, Assessment and Graduate Attributes has not been released yet.
This information will be available on Monday 11 January 2027

Textbooks and Resources

Information for Textbooks and Resources has not been released yet.
This information will be available on Monday 11 January 2027

Academic Integrity Statement

Information for Academic Integrity Statement has not been released yet.
This unit profile has not yet been finalised.
