ENEP12008 *Engineering Leadership*

Term 2 - 2024

Profile information current as at 29/04/2024 01:57 pm

All details in this unit profile for ENEP12008 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

As a student in the final year of your Bachelor of Engineering course, you will identify and analyse leadership and engineering management techniques applied within industry-based teams, and generate a personal vision for your leadership style. You will also document safety and environmental management systems applied in engineering workplaces, with a focus on cultural aspects. You will examine ethical principles, codes of ethics and apply approaches to ethical decision making. You will develop a three-year career plan outlining professional, technical, and personal aspects of career development. In preparation for this unit, it is strongly recommended that you have undertaken industry practice experience in a workplace, either via Industry Practice unit(s) or vacation employment.

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Comments

Feedback

Marking rubrics for each assessment was hard to locate as they were not given with each assessment.

Recommendation

Marking rubrics should be included in the assessment guidelines.

Feedback from SUTE Comments

Feedback

Some unit content needs to be updated to reflect the changes in technology used at workplaces.

Recommendation

Unit content should be reviewed and updated as required to reflect contemporary engineering practices.

Feedback from SUTE Comments

Feedback

Unit requirements were not clear.

Recommendation

Week one tutorial should focus on the unit requirements.

Feedback from Unit Coordinator Reflections

Feedback

Some topics are relevant to leadership in contemporary engineering organisations.

Recommendation

Topics of project leadership and using leadership as a driver of sustainability should be added to the unit content.
