

ENEX12002 *Introductory Electronics*

Term 2 - 2019

Profile information current as at 17/05/2024 11:51 am

All details in this unit profile for ENEX12002 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will introduce you to the fundamentals of analog and digital electronics. You will learn the theory of operation of commonly used in active and passive electronic components such as resistors, capacitors, inductors, diodes, transistors, signal & power amplifiers, oscillators, and Op-amps. This unit will provide you with sufficient knowledge of Boolean algebra necessary to understand digital electronics. You will learn logic gates, combinational logic circuits, logic minimization, flip-flops, counters, shift-registers, memory, and multiplexers. You will develop skills in analysing electronic circuits and modelling of analog and digital circuits using industry standard simulation software packages. During this unit you will design analog and digital systems for real world applications and test them in simulation software. This unit will also provide you with an opportunity to further develop their professional skills such as communication, technical writing, and individual presentations.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite: MATH11219 Applied Calculus AND (ENEG11009 Fundamentals of Energy and Electricity or PHYS11185 Engineering Physics B)

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2019

- Mackay
- Mixed Mode

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Written Assessment**

Weighting: 20%

3. **Practical and Written Assessment**

Weighting: 20%

4. **Practical and Written Assessment**

Weighting: 20%

5. **Practical and Written Assessment**

Weighting: 20%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Verbal feedback

Feedback

The students appreciated integrating software in the unit content which enhanced their learning.

Recommendation

Multisim is an integral part of this unit which assists students to simulate the behaviour of circuits. Efforts will be made to improve the structure of software integration.

Feedback from 'Have your say' feedback

Feedback

A few students felt that resources on Eagle software which is used for PCB layout should be included.

Recommendation

This software is an integral part of the design assignments as the students learn to layout the printed circuit board for their design. Some relevant resources will be provided in the next offering.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe the operation of semiconductor devices and use them to design circuits for practical applications.
2. Discuss digital number systems and explain how these systems are applied in digital information processing hardware
3. Analyse the operation of analogue and digital electronic circuits, and model them using industry standard simulation tools to verify their behaviour
4. Interpret function requirements, evaluate circuit options and design analog and digital electronic circuits to solve real world problems
5. Construct analog and digital electronic circuits to a given design and validate their operation
6. Solve real life problems and communicate professionally using electronic engineering terminology, symbols and diagrams that conform to Australian and international standards
7. Work collaboratively and autonomously and communicate professionally in presenting your solutions

Learning outcomes are linked to Engineers Australia Stage 1 Competencies and also discipline capabilities. You can find the mapping for this on the [Engineering Undergraduate Course website](#).

Digital Fundamentals Global Edition VitalSource eBook (11e) is available for purchase at

<http://www.pearson.com.au/9781292075990>

Analog Fundamentals: A Systems Approach VitalSource eBook is available for purchase at

<http://www.pearson.com.au/9780133109016>

Students preferring a paper version of the text can order the **value pack** of both books at a reduced price from the CQUni Bookshop [here](#) (search on the Unit code)

Latest Multisim version. Please see the Moodle site for further details.

Other Required Resources:

- > CQUniversity Email
- > Internet
- > Unit Website (Moodle)
- > Windows PC with USB port to operate USB oscilloscope
- > Eagle PCB Design - Trial (Only if you don't have Ultiboard or any other PCB layout software)
- > Zoom video conference application
- > Word editor, Pdf creator

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Eagle PCB Design - Trial
- Windows PC with USB port to operate USB Oscilloscope
- Pdf creator/scanner
- MS Office (mainly Word and Powerpoint)
- A computer with Windows 7 or later with Admin authority to install Multisim
- Access to Multisim
- Zoom Video Conference Application

Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)
For further information, see the Assessment Tasks.

Schedule

Week 1 - 15 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Analog Concepts, Diodes and Applications	Book 1: Analog Fundamentals Chapters 1 and 2	Relevant questions and sample problems will be solved every week.

Week 2 - 22 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Specialized Diodes and Introduction to BJT	Book 1: Analog Fundamentals Chapters 2 and 3	

Week 3 - 29 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
Transistor Amplifiers, Signal and Power Amplification	Book 1: Analog Fundamentals Chapters 3 and 5	

Week 4 - 05 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Operational Amplifier	Book 1: Analog Fundamentals Chapters 6 and 7	

Week 5 - 12 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Special Operational Amplifier Circuits Active Filters	Book 1: Analog Fundamentals Chapters 8 and 9	

Vacation Week - 19 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 26 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
Oscillators Voltage Regulators	Book 1: Analog Fundamentals Chapters 10 and 11	Assignment 1 Due: Week 6 Monday (26 Aug 2019) 11:55 pm AEST

Week 7 - 02 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Number Systems, Operations, and Logic Gates	Book 2: Digital Fundamentals Chapters 1,2, and 3	Lab Report 1 (Analog) Due Monday (02 Sep 19) 11:55 PM AEST

Week 8 - 09 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Boolean Algebra and Logic Simplification	Book 2: Digital Fundamentals Chapter 4	Design Assignment 1 (Analog) Due: Week 8 Friday (13 Sept 2019) 11:55 pm AEST

Week 9 - 16 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Combinational Logic Analysis and Functions of Combinational Logic	Book 2: Digital Fundamentals Chapters 5 and 6	

Week 10 - 23 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Latches and Flip-flops	Book 2: Digital Fundamentals Chapter 7	

Week 11 - 30 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
Timers and Counters	Book 2: Digital Fundamentals Chapter 7 and 9	Assignment 2 Due: Week 11 Monday (30 Sept 2019) 11:55 pm AEST

Week 12 - 07 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
Shift Registers Data Storage	Book 2: Digital Fundamentals Chapter 8 and 11	Lab Report 2 (Digital) Due Monday (07 Oct 19) 11:55 PM AEST

Review/Exam Week - 14 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
		Design Assignment 2 (Digital) Due: Review/Exam Week Friday (18 Oct 2019) 11:55 pm AEST

Exam Week - 21 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Please refer to the course Moodle site for any guidelines regarding use of forums in communicating with the course coordinator and related staff. Students are advised and encouraged to use Q&A forum for queries regarding assignments. Failure to use the guidelines will not guarantee a response. In this unit, we will use Multisim to simulate different electronic circuits that will help strengthen the theoretical concepts. Due to recent updates in the Multisim software license, students would have easier access to it. More information will be available at the start of the term on course Moodle website. Information about the text books with links is listed in the textbooks and resources section. The students will have the option to join optional residential school from 9-11 September. There are three practical and written assignment (PWA) tasks. PWA 1 is subdivided in 2 labs; one for analog and the other for digital. All labs and practicals are mandatory for all students. PWA 2 and 3 are design assignments one from each section. All PWAs are mandatory for students.

Assessment Tasks

1 Assignment 1

Assessment Type

Written Assessment

Task Description

This assessment would cover topics from analog fundamentals. The assessment criteria and questions will be provided well before the submission date and would be strictly followed. The students are not expected to draw any waveforms or write any equations in the word editor, instead they can scan a clear and legible handwritten document and submit it as a pdf file. Details will be given on the Moodle unit website.

Assessment Due Date

Week 6 Monday (26 Aug 2019) 11:55 pm AEST

Return Date to Students

Week 8 Monday (9 Sept 2019)

Marked assignment with feedback will be provided

Weighting

20%

Assessment Criteria

1. Correct Answers
2. Correct Format
3. *All working* must be shown to obtain full marks
4. Assignment answers must be neat, tidy and legible
5. Structure and Format of the Submission (cover page, file name, page orientation and numbering)

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

One pdf file

Learning Outcomes Assessed

- Describe the operation of semiconductor devices and use them to design circuits for practical applications.
- Analyse the operation of analogue and digital electronic circuits, and model them using industry standard simulation tools to verify their behaviour
- Work collaboratively and autonomously and communicate professionally in presenting your solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Technology Competence

2 Assignment 2

Assessment Type

Written Assessment

Task Description

This assessment would cover the topics from digital electronics domain. The assessment criteria and questions will be provided well before the submission date and would be strictly followed. The students are not expected to draw any waveforms or write any equations in the word editor, instead they can scan a clear and legible handwritten document and submit it as a *pdf* file. Details will be given on the Moodle unit website.

Assessment Due Date

Week 11 Monday (30 Sept 2019) 11:55 pm AEST

Return Date to Students

Review/Exam Week Monday (14 Oct 2019)

Marked assignment with feedback will be provided

- Work collaboratively and autonomously and communicate professionally in presenting your solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Technology Competence

3 Practicals, Laboratory Exercise, and Report

Assessment Type

Practical and Written Assessment

Task Description

This assessment corresponds to lab practicals and collectively covers almost all topics from both digital and analog domain. There are mainly two labs in total out of which, lab 1 covers the analogue electronics portion and lab 2 covers the digital portion.

The assessment is distributed as per the content and the details and modalities of these practicals will be available from the unit Moodle website at the start of the term. These practicals are compulsory for every student.

Assessment Due Date

Lab reports 1 (Analog): Due on Monday (Week 7) at 11:55 PM AEST. Lab reports 2 (Digital): Due on Monday (week 12) at 11:55 PM AEST.

Return Date to Students

Marked labs with feedback will be provided within 2 weeks of submission date

Weighting

20%

Minimum mark or grade

50%

Assessment Criteria

1. Correct Answers
2. Correct Format
3. All Tasks Attempted
4. Correct Procedures
5. Result Discussion
6. *All working* must be shown to obtain full marks
7. Assignment answers must be neat, tidy and legible
8. Structure and Format of the Submission (cover page, file name, page orientation and numbering)

Submission

Online

Submission Instructions

One folder containing pdf and software files (if applicable)

Learning Outcomes Assessed

- Describe the operation of semiconductor devices and use them to design circuits for practical applications.
- Discuss digital number systems and explain how these systems are applied in digital information processing

hardware

- Analyse the operation of analogue and digital electronic circuits, and model them using industry standard simulation tools to verify their behaviour
- Construct analog and digital electronic circuits to a given design and validate their operation
- Solve real life problems and communicate professionally using electronic engineering terminology, symbols and diagrams that conform to Australian and international standards
- Work collaboratively and autonomously and communicate professionally in presenting your solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Team Work
- Information Technology Competence
- Cross Cultural Competence

4 Design Assignment 1 (Analog)

Assessment Type

Practical and Written Assessment

Task Description

This assessment relates to the design of a component / device mainly using contents covered in analog portion of the unit. This mainly software based task would be submitted individually by every student. After the submission the students can fabricate it physically but it would not count towards the grades. Details of this assessment will be available on Moodle unit website.

Assessment Due Date

Week 8 Friday (13 Sept 2019) 11:55 pm AEST

Return Date to Students

Week 10 Friday (27 Sept 2019)

Weighting

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
