

ENEX13001 *Instrumentation and Industrial Automation*

Term 2 - 2019

Profile information current as at 15/05/2024 10:55 am

All details in this unit profile for ENEX13001 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will introduce you to the fundamentals of industrial instrumentation and automation systems. You will learn the principles of operation of different sensors, actuators, instrumentation amplifiers, and industrial data communication busses. You will also learn noise cancellation and signal conditioning, sensor and actuator interfacing, programmable logic controller (PLC) programming, and process control. You will learn how to specify the requirements for sensors, actuators and control equipment for a given task, evaluate multiple options available and select the best combination of them for your design. You will also design, fabricate, and program production lines for a given product using industry standard components and PLCs. Students enrolled in distance mode are required to attend a compulsory Residential School.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisites: ENEX12002 Introductory Electronics OR (ENEE13018 Analogue Electronics & ENEE13020 Digital Electronics) AND ENEE12016 Signals and Systems

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2019

- Mackay
- Mixed Mode

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 20%

2. **Written Assessment**

Weighting: 20%

3. **Practical Assessment**

Weighting: 20%

4. **Examination**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from 'Have your say' Survey

Feedback

Learning content and assessment feedback helped student learning.

Recommendation

The learning content will be kept the same and the assessment feedback will be provided in the same manner.

Feedback from 'Have your say' Survey

Feedback

The practical assessment (labs) allowed a good understanding of PLC programming to be obtained through a natural progression of difficulty.

Recommendation

The lab exercises will be the same and be conducted in the same manner.

Feedback from 'Have your say' Survey

Feedback

Moodle site navigation needs to be improved.

Recommendation

The Moodle site design will be changed in order to make it easy for the students to find resources.

Feedback from 'Have your say' Survey

Feedback

Contents of some weeks need to be spread over multiple weeks as their content is too heavy.

Recommendation

The heavy contents of some weeks will be spread over multiple weeks to distribute the learning load as even as possible.

Feedback from 'Have your say' Survey

Feedback

Assessment requirements need further clarification.

Recommendation

The assessment requirements will be further clarified in order to make it easy to understand.

Feedback from 'Have your say' Survey

Feedback

More learning resources will help student learning experience.

Recommendation

Additional learning resources will be provided.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe the need for instrumentation amplifiers in an instrumentation system and their operation
2. Apply common industrial data bus protocols and use them in data acquisition and control programs
3. Specify requirements for sensors, actuators, and accessories for a given process automation module, and select suitable components from a range of available options
4. Program industrial PLCs to provide real-time solutions for industrial automation problems
5. Implement complete solutions for industrial process automation problems
6. Solve real life problems and communicate professionally using instrumentation engineering terminology, symbols and diagrams that conform to Australian and international standards
7. Work individually and collaboratively in teams, communicate professionally in presenting your solutions

Learning outcomes are linked to Engineers Australia Stage 1 Competencies and also discipline capabilities. You can find the mapping for this on the [Engineering Undergraduate Course website](#).

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Textbooks and Resources

Textbooks

ENEX13001

Prescribed

Principles of Measurement Systems

Edition: 4th (2005)

Authors: John P Bentley

Pearson Education Ltd.

Harlow , Essex , England

ISBN: 0-130-43028-5

Binding: Paperback

[View textbooks at the CQUniversity Bookshop](#)

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)
- Access to a document scanner and a software that can create pdf documents.
- A portable computer with Windows 7 or later with Admin authority to install CoDeSys software.

Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)

For further information, see the Assessment Tasks.

Schedule

Week 1 - 15 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Introduction to measurement systems, static characteristics, and accuracy of measurements	<ul style="list-style-type: none">• CH1• CH2• CH3	

Week 2 - 22 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Operational amplifiers in instrumentation systems	<ul style="list-style-type: none">• Lecture notes / slides	

Week 3 - 29 Jul 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Introduction to Industrial Automation	<ul style="list-style-type: none">• Lecture notes/ Slides	

Week 4 - 05 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Signal Conditioning Elements	<ul style="list-style-type: none">• CH9• Lecture notes/ Slides	

Week 5 - 12 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• PLC Programming Fundamentals I• Loading Effects and Two-port Networks	<ul style="list-style-type: none">• CH5• Lecture notes/Slides	

Vacation Week - 19 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 26 Aug 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Signals and Noise in Measurement Systems• PLC Programming Fundamentals II	<ul style="list-style-type: none">• CH6• Lecture notes/ Slides	Assignment 1 Due: Week 6 Friday (30 Aug 2019) 11:45 pm AEST

Week 7 - 02 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Four Terminal Measurements and Source-Measure Units in Instrumentation Systems	<ul style="list-style-type: none">• Lecture notes/ Slides	

Week 8 - 09 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Industrial Process Control Systems	<ul style="list-style-type: none">• Lecture notes/ Slides	

Week 9 - 16 Sep 2019

Module/Topic	Chapter	Events and Submissions/Topic
<ul style="list-style-type: none">• Industrial Data Communications Protocols• Data Acquisition and Communications Systems	<ul style="list-style-type: none">• CH18• Lecture notes/ Slides	Residential School: 22-24, September (MKY)

Assessment Tasks

Week 10 - 23 Sep 2019

1 Assignment 1

Module/Topic	Chapter	Events and Submissions/Topic
Industrial Instrumentation Busses Written Assessment	• Lecture notes/ Slides	Assignment 2 Due: Week 10 Friday (27 Sept 2019) 11:45 pm AEST
Task Description This assignment is based on instrumentation principles and application of them in actual measurement systems. Further details will be available on the unit moodle site.		
Ultrasonic Measurement Systems	• Ch16	Laboratory Exercises - Practical and Written Assessment Due: Week 11 Friday (4 Oct 2019) 11:45 pm AEST
Flow Measurement Systems	• CH12	
Sensing Elements	CH8	

Return Date to Students

Week 12 - 07 Oct 2019

Marked assignment with feedback will be provided.

Module/Topic	Chapter
Optical Measurement Systems	• CH15
Parasitic Elements in Measurement Systems	• CH 14

Assessment Criteria

Review/Exam Week - 14 Oct 2019 things:

Module/Topic	Chapter	Events and Submissions/Topic
1. Application of theoretical fundamentals.		
2. Correct diagrams using standard notations.		
3. Explanation of reasons to apply specific theory to solve a given problem where applicable.		

Exam Week - 21 Oct 2019

Module/Topic	Chapter	Events and Submissions/Topic
4. Correct mathematical working and correct answer.		
5. All working must be shown to obtain full marks		
6. Neatness and format.		

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Submit the answers as a single pdf file. You are free to scan and embedd clearly hand written answers into the pdf.

Learning Outcomes Assessed

- Describe the need for instrumentation amplifiers in an instrumentation system and their operation
- Implement complete solutions for industrial process automation problems
- Work individually and collaboratively in teams, communicate professionally in presenting your solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Technology Competence

2 Assignment 2

Assessment Type

Written Assessment

Task Description

This assignment is based on advanced measurement techniques and fundamentals of industrial automation systems.

Assessment Due Date

Week 10 Friday (27 Sept 2019) 11:45 pm AEST

Return Date to Students

Week 12 Friday (11 Oct 2019)

Marked assignment with feedback will be provided.

Weighting

20%

Assessment Criteria

Marks will be allocated for the following things:

1. Application of theoretical fundamentals.
2. Correct diagrams using standard notations.
3. Explanation of reasons to apply specific theory to solve a given problem where applicable.
4. Correct mathematical working and correct answer.
5. All working must be shown to obtain full marks
6. Neatness and format.

Referencing Style

- [Harvard \(author-date\)](#)

Learning Outcomes Assessed

- Apply common industrial data bus protocols and use them in data acquisition and control programs

- Specify requirements for sensors, actuators, and accessories for a given process automation module, and select suitable components from a range of available options
- Program industrial PLCs to provide real-time solutions for industrial automation problems
- Implement complete solutions for industrial process automation problems
- Solve real life problems and communicate professionally using instrumentation engineering terminology, symbols and diagrams that conform to Australian and international standards
- Work individually and collaboratively in teams, communicate professionally in presenting your solutions

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Technology Competence

3 Laboratory Exercises - Practical and Written Assessment

Assessment Type

Practical Assessment

Task Description

This task involves laboratory experiments on industrial automation and instrumentation. You will have to complete the pre-lab exercises to commence the laboratory practicals. Further details will be available in the unit moodle site.

Assessment Due Date

Week 11 Friday (4 Oct 2019) 11:45 pm AEST

Return Date to Students

Review/Exam Week Friday (18 Oct 2019)

Marked lab reports with feedback.

Weighting

20%

Minimum mark or grade

50% of the allocated marks.

Assessment Criteria

Marks will be allocated to :

1. Active contribution in group work
2. Following the correct procedures during the experimentation.
3. Correct results.
4. Analysis of results and discussion.
5. Conclusions.

Referencing Style

- [Harvard \(author-date\)](#)

Examination**Outline**

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

40%

Length

180 minutes

Minimum mark or grade

50% of the allocated marks.

Exam Conditions

Open Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments).

Calculator - all non-communicable calculators, including scientific, programmable and graphics calculators are authorised

Law dictionaries, Business and Law dictionaries (discipline specific dictionaries) are authorised.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
