General Information

Overview

This unit is specifically designed for you to apply the processes of research investigation by analysing, reflecting on, and critiquing an area of your professional practice. You will engage in a problem-based learning approach within an authentic workplace learning environment, ensuring that your investigation is relevant to industry needs. You'll apply an appropriate research methodology that suits your research problem. By the end of this unit, you will have developed a project proposal to implement in the follow-on unit, Engineering Research Project Implementation.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Assessment feedback could be more detailed by clearly specifying actions to improve and correct errors.

Recommendation

Students should receive feedback on specific actions to correct errors or improve performance for any assessment criteria not fully met.

Feedback from UC's observation

Feedback

In-person presentations enabled students to showcase their projects, enhancing both their learning experience and skills.

Recommendation

This practice should be continued.

Feedback from UC's observation

Feedback

Students face challenges balancing time between internships and research projects.

Recommendation

Students should be encouraged to discuss thesis requirements with internship providers to seek flexibility.
