

# ENVR11014 *Environmental Monitoring*

## Term 2 - 2019

Profile information current as at 19/05/2024 09:32 am

All details in this unit profile for ENVR11014 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

## General Information

### Overview

In Environmental Monitoring you will learn the basics of ecosystem science as well as the research and industry skills necessary to carry out surveys and research in natural and impacted ecosystems. Your study will focus on two iconic Australian ecosystems, the Great Barrier Reef and the Brigalow Belt. The field skills you acquire in this unit will enable you to perform both academic research and industry surveys in ecosystems anywhere in the world. You will apply your knowledge of ecosystems, and animal and plant biology to sample collection, vegetation surveys, animal trapping and identification. You will also begin to learn some basic project management skills including how to legally document your work and to prepare and plan for safe field work.

### Details

Career Level: *Undergraduate*

Unit Level: *Level 1*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

### Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

### Offerings For Term 2 - 2019

- Bundaberg
- Mixed Mode
- Rockhampton

### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

### Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Online Quiz(zes)**

Weighting: 30%

#### 2. **Laboratory/Practical**

Weighting: 30%

#### 3. **Report**

Weighting: 40%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Unit Learning Outcomes

**On successful completion of this unit, you will be able to:**

1. Describe the basic concepts of ecological populations and communities
2. Identify the defining characteristics of biomes and ecosystems
3. Measure biotic and abiotic characteristics of ecosystem communities using appropriate field methods
4. Collate, summarise and present data collected in the field
5. Adhere to Australian environmental and work, health and safety legislation.

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

--------------	---------	------------------------------

## Term Specific Information

This unit has one residential school/block practical for both on campus and mixed mode students. The residential school/block practical includes a three-day/three-night field trip off campus at Thornhill Station (8 km southwest of Lowmead, QLD). A reasonable cost for accommodation and meals will be incurred by students (\$110 for the 3 nights and days). Students will be required to provide their own personal protective equipment (e.g. hats, sunscreen, boots, etc.). Transportation to Thornhill Station will be provided by the university. Details will be provided on the Moodle site.

## Assessment Tasks

### 1 Online Theory Quizzes

#### Assessment Type

Online Quiz(zes)

#### Task Description

These periodic quizzes are based on lecture and study material from previous weeks (so please revise the lecture and reading material associated with the weeks covered by the quiz).

For ALL students, Theory Quizzes open the Wednesday after the weeks' covered in the quiz (e.g. Theory Quiz A covers Weeks 1-3, so opens on Wednesday in Week 3) and is open for 1 week.

The Theory Quizzes are limited to **30 minutes for completion**; make sure to submit within the 30 minutes.

You can attempt each quiz a second time, but there is a 60 minute enforced delay between attempts and your **highest** score of the attempt/s will be the score recorded. You must make the attempt while the quiz is open.

Questions are true/false, multiple choice, mix-and-match and other formats. Because the questions are drawn at random from a question bank, you will most likely receive different questions if you make a second attempt, and you will likely receive different questions from your peers. I ask that you not share your quiz questions or answers with other students

as this may disadvantage other students and it will be considered academic misconduct.

**Number of Quizzes**

3

**Frequency of Quizzes**

Other

**Assessment Due Date**

Theory Quiz A will close on August 7, 11:45PM AEST. Theory Quiz B will close on Sept 4, 11:45PM AEST. Theory Quiz C will close on Sept 25, 11:45PM AEST.

**Return Date to Students**

Theory quiz results will be made available to students upon completion of the quiz.

**Weighting**

30%

**Minimum mark or grade**

40%

**Assessment Criteria**

**Referencing Style**

- [Harvard \(author-date\)](#)

**Submission**

Online

**Learning Outcomes Assessed**

- Describe the basic concepts of ecological populations and communities
- Identify the defining characteristics of biomes and ecosystems

**Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Critical Thinking

## 2 Field competencies and workbook

**Assessment Type**

Laboratory/Practical

**Task Description**

Students will complete a series of tasks in the field and associated activities in their workbooks. These activities will address animal monitoring skills (e.g. trapping and handling), aquatic monitoring skills, (e.g. water sampling for chemical analysis), vegetation monitoring skills (e.g. vegetation transects and specimen collection and ID), and peripheral skills (e.g. GPS and Chain of Custody). During or after each field activity, students will present their work to a supervisor for marking and feedback. It is important that students make sure that all required skills checks are completed at the end of each activity or day.

**Assessment Due Date**

Week 10 Friday (27 Sept 2019) 8:00 am AEST

Skills checks and workbooks will be checked/marked during or at the end of each activity during the residential school (Sept 26th to 30th). It is the student's responsibility to make sure all checks/markings are completed at the time indicated in the field workbook.

**Return Date to Students**

Week 11 Monday (30 Sept 2019)

Students will be marked/checked off on skills and workbooks throughout the residential school.

**Weighting**

30%

**Minimum mark or grade**

50%

### Assessment Criteria

The assessment criteria for each task an activity will vary, but assessment criteria will generally revolve around the following:

1. Safety;
2. Accuracy;
3. Completeness;
4. Compliance.

After receiving feedback, and at the instructors discretion and within the limits of field work, students will be given an opportunity to demonstrate proficiency in skills they were not able to receive full marks on in the field or workbook.

### Referencing Style

- [Harvard \(author-date\)](#)

### Submission

Offline

### Submission Instructions

During or after each field activity, students will present their work to a supervisor for marking and feedback. It is important that students make sure that all required skills checks are completed at the end of each activity or day.

### Learning Outcomes Assessed

- Measure biotic and abiotic characteristics of ecosystem communities using appropriate field methods
- Collate, summarise and present data collected in the field
- Adhere to Australian environmental and work, health and safety legislation.

### Graduate Attributes

- Problem Solving
- Team Work
- Ethical practice

## 3 Residential School Results and Discussion

### Assessment Type

Report

### Task Description

During your ENVR11014 residential you will undertake survey and monitoring field work activities that require the application of scientific and industry standard environmental monitoring methodologies and technologies. These activities will be across three areas: 1) terrestrial animal, 2) freshwater aquatic and, 3) terrestrial vegetation. Following the residential you will use the data collected to write up and present the results of each activity and then discuss those results with reference to accepted ecological theory(ies). Written reports must use both figures, tables and text and include a relevant discussion around each of the field work activities (600 words  $\pm 10\%$  per activity report, 1800 words  $\pm 10\%$  total). To assist you with the task of writing up the results, general assistance with the interpretation and analysis of data will be provided at the end of field work activities.

### Assessment Due Date

Week 12 Friday (11 Oct 2019) 11:45 pm AEST

### Return Date to Students

Exam Week Friday (25 Oct 2019)

### Weighting

40%

### Minimum mark or grade

40%

### Assessment Criteria

The Residential School Results and Discussion will be marked on:

1. Completeness (relevant observations and results presented from all three activities);
2. Clarity, grammar, punctuation and organisation;
3. Presentation of figures and tables (figures should be publication ready)
4. Correct inline referencing of figures/tables;

5. Discussion of the results (are all the results included discussed?);
6. Appropriate application of ecological theory to the results in the discussion;
7. At least two appropriate and correctly-cited references with appropriate author-date citation (look up "parenthetical referencing" *i.e.* Harvard Referencing).

### **Referencing Style**

- [Harvard \(author-date\)](#)

### **Submission**

Online

### **Submission Instructions**

Submit a Word document (or a format compatible with TurnItIn) with all relevant figures, tables, appendices, and text. Submission must be through Moodle.

### **Learning Outcomes Assessed**

- Describe the basic concepts of ecological populations and communities
- Identify the defining characteristics of biomes and ecosystems
- Measure biotic and abiotic characteristics of ecosystem communities using appropriate field methods
- Collate, summarise and present data collected in the field

### **Graduate Attributes**

- Communication
- Critical Thinking

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
