General Information

Overview

In Measurement and Evaluation in Health Science you will learn when to apply and how to interpret the results of the most commonly utilised statistics used across a variety of fields of study. This unit will introduce you to statistical methods that will allow you to make appropriate decisions about research outcomes and evaluate research findings. This is a practical unit that will develop your skills in the use of statistical software to organise, analyse, and report statistical outcomes.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback

Feedback

Assessment questions are clearly linked to lecture content, keeping this format aids student learning.

Recommendation

It is recommended that the unit coordinator should attempt to maintain a clear link between lecture content and assessment requirements.

Feedback from Self-reflection

Feedback

Online quizzes had to be removed from the assessment tasks to meet an updated external accreditation requirement.

An attempt should be made to ensure the new assessment format follows a logical progression of the statistical abilities presented during the unit.

Recommendation

It is recommended that the unit coordinator attempt to create novel assessments that match the knowledge presented to students during the unit.

Feedback from Student feedback

Feedback

The unit coordinator was enthusiastic, relatable, and kept lectures interesting while speaking about statistics which helped students retain information presented in class.

Recommendation

It is recommended that the unit coordinator attempt to maintain an engaging learning environment.
