General Information

Overview

This unit is a foundation level unit to help you develop the academic study and research skills necessary for success in tertiary level education. During this unit you will learn how to use bibliographical software, search scientific research databases, and appraise the quality of evidence presented in scientific and other literature. You will also learn about research ethics and integrity, and develop a foundational understanding of the use of statistics in research. Finally, you will learn fundamental concepts of scientific writing to ensure you can articulate the information you retrieve and appraise, in a clear and concise manner.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Have Your Say

Feedback

Moodle layout was great and easy to find content quickly.

Recommendation

It is recommended that the Moodle design remains simple to enable students to access information in as few clicks as possible.

Feedback from Have Your Say

Feedback

Specific example readings and discussion were skewed towards Health Sciences and Exercise and Sport Science. Some examples from other study areas would help different cohorts.

Recommendation

As this unit includes students from a variety of courses, it is recommended that some examples from different study areas are included to assist in the application of this content towards their studies.

Feedback from Self-reflection

Feedback

Specific content related to referencing, in particular APA referencing is required.

Recommendation

It is recommended that a lecture and tutorial focused on the importance of referencing, and how to reference correctly be created
