General Information

Overview

This unit provides knowledge related to the coordination and voluntary control of movement. Throughout this unit, you will explore concepts related to the structure of the neuromuscular and sensory systems, the mechanisms involved in posture, balance, gait and various human movements, and the assessment of motor function in health and exercise contexts. In this unit you will further explore how concepts of motor control and learning may be applied to acute and chronic movement disorders that you may work with in your exercise and sport science career. In addition, you will gain a better understanding of the changes in motor performance that may occur with learning, aging, and injury.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Unit Evaluation

Feedback

Students appreciated that all content was released at the beginning of term. This allowed for students to progress through content ahead of time.

Recommendation

It is recommended that all content for the unit be available at the beginning of the term to allow students to balance a full time study load with placement requirements, which usually align with enrolling in ESSC13006.

Feedback from Student Unit Evaluation

Feedback

Students appreciated the volume of assessment feedback which provided specific areas of improvement rather than generic comments.

Recommendation

It is recommended that assessment feedback continue to provide recommendations and areas of improvement at an individual level.
