General Information

Overview

This unit examines the processes involved in neuromotor control, skill acquisition, and retention within a sport and exercise context. Throughout this unit, you will explore theoretical concepts of motor learning and skill acquisition, evaluation of skill performance, and processes for designing learning environments. Further, you will gain a better understanding of the changes in motor performance that may occur with learning, aging, and injury. Particular emphasis will be focused on motor learning and skill development as relevant to the role of a coach or exercise and sport scientist.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

The Residential School provided excellent links to real world scenarios.

Recommendation

It is recommended that Residential School activities continue to provide application to industry and real world experience in a simulated environment.

Feedback from Head of Course

Feedback

The unit requires updates to reflect changes in the Exercise and Sports Science Australia standards during the re-accreditation process.

Recommendation

It is recommended that unit content and assessment tasks align with feedback from the external accreditation report from Exercise and Sports Science Australia.
