

# ESSC13007 *Functional Anatomy*

## Term 2 - 2019

Profile information current as at 25/04/2024 02:02 am

All details in this unit profile for ESSC13007 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

## General Information

### Overview

The development of foundation knowledge and competencies in functional anatomy complements previous anatomy and physiology units and provides the cornerstone to manual assessment of musculoskeletal conditions. This unit will provide you with the knowledge necessary to identify and describe the structural and functional requirements of the musculoskeletal system in relation to human motion for a variety of activities. The unit will develop your understanding of the anatomy of the limbs and the functional principles underpinning movement and posture, including an understanding of the performance aspects of muscle, joints, and the mechanics of movement. You will develop skills in manual location and assessment of musculoskeletal structures as they apply to rehabilitation, exercise conditioning, and general movement.

### Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 10

Fraction of Full-Time Student Load: 0.125

### Pre-requisites or Co-requisites

Pre-requisite: BMSC11001 Human Body Systems 1, BMSC11002 Human Body Systems 2, AND ESSC12004 Exercise and Sport Biomechanics

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

### Offerings For Term 2 - 2019

- Cairns
- Mackay
- Mixed Mode
- Rockhampton

### Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

### Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

### Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

## Class and Assessment Overview

### Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

### Class Timetable

#### [Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

#### [Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

### Assessment Overview

#### 1. **Online Quiz(zes)**

Weighting: 40%

#### 2. **Presentation**

Weighting: 30%

#### 3. **Practical Assessment**

Weighting: Pass/Fail

#### 4. **Written Assessment**

Weighting: 30%

### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## CQUniversity Policies

**All University policies are available on the [CQUniversity Policy site](#).**

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Have your say

##### Feedback

Students comment that there is a lot of valuable content in residential school and that it should be spread across two days

##### Recommendation

This has been consistent feedback from students, and a two-day residential school has been organised for Term 2, 2019

#### Feedback from Staff reflection

##### Feedback

The audiovisual presentation format for the practical assessment worked well; however, students would benefit from observing and interacting with each others' presentations

##### Recommendation

Students could present the audiovisual presentation within an online video conference session, with the ability to ask questions and provide feedback.

## Unit Learning Outcomes

### On successful completion of this unit, you will be able to:

1. Define anatomical terms and identify structures using anatomical models, images, and surface anatomy
2. Using principles of kinesiology, identify and explain the relationships between anatomical structures, movement, and function
3. Analyse exercises to identify muscles that are involved in producing and controlling movement
4. Perform movement and postural assessments, and prescribe corrective exercises to address asymmetries or improve exercise performance.

The Learning Outcomes and Assessment tasks are aligned with Graduate Outcomes as outlined by Exercise and Sport Science Australia (ESSA).

## Alignment of Learning Outcomes, Assessment and Graduate Attributes

### Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes			
	1	2	3	4
1 - Online Quiz(zes) - 40%	•	•		
2 - Presentation - 30%			•	•
3 - Practical Assessment - 0%	•			•
4 - Written Assessment - 30%		•	•	

## Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes

## Term Specific Information

This unit includes compulsory on-campus practical activities. You MUST attend the session specific to your enrolment as outlined below:

#### **Rockhampton (ROK) on-campus AND mixed-mode (MIX) students**

You are required to attend the 2-day Residential School/Practical Block session scheduled at the CQUniversity Rockhampton North Campus between Week 5 Wednesday (14 Aug. 2019) 8:30 am AEST and Thursday (15 Aug. 2019) 5:00 pm AEST.

#### **Cairns (CNS) on-campus students**

You are required to attend the 2-day Practical Block session scheduled at the CQUniversity Exercise and Sport Sciences Laboratories located at the Cairns Basketball Association Headquarters (289 Aumuller St, Manunda QLD 4870) between Week 6 Tuesday (27 Aug. 2019) 8:30am and Wednesday (28 Aug. 2019) 5:00 pm AEST.

#### **Mackay (MKY) on-campus students**

You are required to attend the 2-day Practical Block session scheduled at the CQUniversity Mackay City Campus (Bld 4/G.21) between Week 6 Thursday (29 Aug. 2019) 8:30 am and Friday (30 Aug. 2019) 5:00 pm AEST.

You may be able to attend an alternate session to that specified above, please contact the Unit Coordinator to discuss attendance at a different offering, as places are limited for each campus.

## Assessment Tasks

### 1 Online Quizzes

#### **Assessment Type**

Online Quiz(zes)

#### **Task Description**

You will be required to complete two (2) online quizzes during the term. A mid-term quiz will be available in Week 7, and will assess content (lectures, readings and online material) covered in Weeks 1-6 (inclusive). An end of term quiz will be available in the Review/Exam Week, and will assess content (lectures, readings and online material) covered in Weeks 7-12 (inclusive). Each quiz will include 50 questions that are randomly selected from a wider bank of questions. Questions will be equally distributed across all weeks. You will have a time limit of 60 minutes to complete each quiz. Questions will be in multiple choice and fill-in-the-blanks format.

You must log on and access the ESSC13007 Moodle site when each online quiz is open and complete the quiz before the

closing time and date as outlined in the Assessment Due Date section below. You can only attempt each online quiz once and each online quiz must be completed in a single session. Online quizzes should be completed on a computer, as attempting the quiz on a smartphone can result in your session being ended in the event of a phone call or notification. You cannot save your answers and return to the online quiz at a later time. In the absence of an approved extension, there will be no late submissions allowed for any of the online quizzes.

**Number of Quizzes**

2

**Frequency of Quizzes**

Other

**Assessment Due Date**

Mid-term quiz will open Week 6 Wednesday (28 Aug. 2019) 9:00 am AEST, and close Week 7 Wednesday (4 Sep. 2019) at 5:00 pm AEST. The end of term quiz will open Week 12 Wednesday (9 Oct. 2019) 9:00 am AEST, and close Review/Exam Week Wednesday (16 Oct. 2019) 5:00 pm AEST.

**Return Date to Students**

Marks for each quiz will be available upon completion of the quiz via the ESSC13007 Moodle site. Feedback on specific questions will be available once the quiz closes.

**Weighting**

40%

**Assessment Criteria**

Each quiz will contribute to 20% of your overall unit grade. Together the two (2) quizzes comprise 40% of your overall grade. There will be 50 questions per quiz, with each question allocated 1 mark. Each question will be graded as correct or incorrect. For multiple choice questions, there will be only 1 correct response. For text-based questions (i.e. fill-in-the-blanks), you should take care to ensure accurate spelling (Australian English) and correct grammar are used, as answers are spelling and grammar sensitive.

**Referencing Style**

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

**Submission**

Online

**Submission Instructions**

Attempting and submitting each online quiz is performed via the ESSC13007 Moodle site.

**Learning Outcomes Assessed**

- Define anatomical terms and identify structures using anatomical models, images, and surface anatomy
- Using principles of kinesiology, identify and explain the relationships between anatomical structures, movement, and function

**Graduate Attributes**

- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

## 2 Presentation

**Assessment Type**

Presentation

**Task Description**

Identifying sub-optimal movement patterns and their contributing factors is an important part of reducing injury risk and improving performance in sports and exercise. To accurately identify sub-optimal movements, a sound understanding of normal movement and the roles of various muscles and joints is required. Appropriate exercises are then often required to help an individual return to optimal movement and improve performance. This assessment requires you to create and record a 10-minute audio-visual presentation. In the presentation you will be required to identify and aim to correct a sub-optimal movement pattern. You will be provided with several videos on the ESSC13007 Moodle site (by Week 7 of Term), each showing an individual simulating a movement with a common sub-optimal movement pattern.

To complete the assessment, you will be required to choose one (1) of the provided videos and present an audio-visual

presentation which includes the following:

1. A description of the sub-optimal movement pattern in one (1) of the videos provided on the ESSC13007 Moodle site. Use supporting evidence (i.e. peer reviewed journal articles) to briefly explain why you consider this movement pattern to be sub-optimal.
2. Presentation of a complete movement analysis table for the optimal, or normal movement, which includes detailing movement name(s), plane of movement, joint action(s), muscle contraction type(s), prime mover(s), and muscle(s) involved. A template of the movement analysis table will be provided on the ESSC13007 Moodle site (by Friday Week 7).
3. A description of one (1) possible muscle weakness that might contribute to the sub-optimal movement you identified, and explanation of the role of that muscle in the optimal movement.
4. A rationale for one (1) exercise that you could provide to strengthen the muscle you identified as weak.
5. Video demonstration of you instructing a partner how to perform this exercise. Include in your demonstration:
  - a. The start and end position of the movement.
  - b. Instructions on how to complete the full exercise, including at least three (3) succinct verbal cues to ensure that your partner in the video can complete the exercise safely and effectively.

General presentation guidelines:

- Duration: You will develop a 10-minute audio-visual presentation. Any information presented beyond 11 minutes will not be marked.
- Presentation slides: You must include accompanying PowerPoint slides. These should complement the spoken aspect of your presentation.
- Font: Times New Roman or Arial.
- Language: English (Australian).
- Referencing: Follow American Psychological Association (APA) style. Reference list must be included on your PowerPoint file.
- Video: You must include a video demonstration in your presentation as per point 5 above. You should embed this in your PowerPoint file.
- Presentation recording: You must record your entire presentation, including slides, video, audio, and a self view camera. This is best recorded in Zoom conferencing software. A link to download this software for free is provided on the ESSC13007 Moodle site.
- Moodle submission (total file size must be <100MB):
  1. A PDF of the final slides presented (with embedded videos removed). Please save as 1 slide per page. Ensure a list of references is included at the end of the presentation (i.e. final slide of the PowerPoint slides).
  2. The recorded presentation (preference is .mp4 format). You must ensure that this video is playable. Late penalties will be applied until a playable recorded presentation is received. Should you not submit a playable recorded presentation, a mark of zero (0) will be awarded.

### **Assessment Due Date**

Week 12 Wednesday (9 Oct 2019) 5:00 pm AEST

In the absence of an approved extension, any submissions received after the due date will incur penalties in accordance with CQUniversity Assessment Policy and Procedure (Higher Education Coursework). Submissions made after 5:00 pm AEST Thursday 29 October, 2019 will not be formally marked as maximum late penalties will have occurred and a grade of 0 will be automatically applied.

### **Return Date to Students**

Exam Week Wednesday (23 Oct 2019)

Marks and individual feedback will be made available via the ESSC13007 Moodle site no later than the set return date.

### **Weighting**

30%

### **Assessment Criteria**

You will be assessed on your ability to identify a sub-optimal movement pattern, completeness and accuracy of your movement analysis table, correctness of weak muscle(s), appropriateness of exercise prescription, clarity of exercise demonstration, and use of appropriate supporting evidence throughout your presentation. Marks will also be allocated to presentation style (including use of PowerPoint, use of video, adherence to the time limit, and use of voice and gesture). Late penalties will be applied to submissions in accordance with CQUniversity policy, including if submissions received are unable to be viewed.

A detailed marking rubric will be available on the ESSC13007 Moodle site. Please refer to this rubric for detailed breakdown of marking allocation.

## Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

## Submission

Online

## Submission Instructions

You will be required to submit the following documents via the assessment submission link on the ESSC13007 Moodle site: 1) A PDF version of the final slides; 2) a video of the recorded presentation in .mp4, .mov, .wmv, or .avi format.

## Learning Outcomes Assessed

- Analyse exercises to identify muscles that are involved in producing and controlling movement
- Perform movement and postural assessments, and prescribe corrective exercises to address asymmetries or improve exercise performance.

## Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

## 3 Station-based examination

### Assessment Type

Practical Assessment

### Task Description

The structural anatomy of the human body underpins the performance of all human movement; thus, an understanding of the anatomy of the muscles and joints is fundamental to exercise and sports performance. In this practical station-based exam you will identify and describe anatomical structures of the musculoskeletal system for the trunk, upper limbs, and lower limbs on anatomical models, bones, and images. This assessment will cover material (lecture and online learning material) from Weeks 1-4, (inclusive).

The practical assessment is compulsory and you must pass this assessment in order to pass the unit. The minimum pass requirement for this assessment item is 50%. Further details of the minimum pass requirement are in assessment criteria below. The station-based exam consists of approximately 25-30 stations set up around the room, each with one question. Some stations will have an identification type question, while others may have a function-based question. After a set period of time, you will rotate to the next station and repeat this until you have been at all stations. There will be one (1) student at each station at a time. You will be given an answer sheet on which to write your answers. The practical assessment is closed book so the only things you will be allowed to have on you are pens (blue or black ink only), your answer sheet, and ID (e.g. driver's licence).

### Assessment Due Date

This assessment will be completed during your designated Residential School/Laboratory Block session. The station-based exam is a closed book and learning material will not be permitted into the exam. You will be required to hand in your completed answer sheet at the conclusion of the station-based exam.

### Return Date to Students

Week 8 Friday (13 Sept 2019)

Marks will be made available via the ESSC13007 Moodle site within 2 weeks following the last laboratory session in Mackay.

### Weighting

Pass/Fail

### Minimum mark or grade

50%

### Assessment Criteria

Answers will be assessed based on correctly identifying the structural and functional components of muscles, bones and joints in the trunk, back, upper limbs and lower limbs. Partial marks may be awarded where appropriate. Minor spelling errors may be permitted as long as they do not alter the meaning of the word.

The station-based exam is a PASS/FAIL assessment; therefore, requires a minimum grade of 50% in order to achieve a PASS for this assessment. If you do not achieve the minimum mark, you will be offered one (1) opportunity to re-attempt incorrectly answered questions. Re-attempts will take place during the Residential School/Laboratory Block session (e.g.

during a break or free-work time).

### Referencing Style

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

### Submission

Offline

### Submission Instructions

You will be required to submit your answer sheet to the examiner at the conclusion of the examination.

### Learning Outcomes Assessed

- Define anatomical terms and identify structures using anatomical models, images, and surface anatomy
- Perform movement and postural assessments, and prescribe corrective exercises to address asymmetries or improve exercise performance.

### Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

## 4 Laboratory Workbook

### Assessment Type

Written Assessment

### Task Description

During the Residential School/Laboratory Block sessions, you will be required to complete a number of activities focused on identifying anatomical landmarks from anatomical models, images/diagrams and surface anatomy, describing the structure and movement of body parts, and performing movement and postural analyses. Throughout these activities, you will be required to complete a laboratory workbook. The laboratory workbook will enable you to demonstrate knowledge and skills related to each laboratory activity. The laboratory workbook will also include short answer responses relating to the theoretical and practical content delivered in this unit. This is an individual assessment, and even though you may be working in small groups, please ensure you do not copy answers from another student. A template will be provided for you to complete this assessment on the ESSC13007 Moodle site.

### Assessment Due Date

Week 8 Wednesday (11 Sept 2019) 5:00 pm AEST

In the absence of an approved extension, any submissions received after the due date will incur penalties in accordance with CQUniversity Assessment Policy and Procedure (Higher Education Coursework). Submissions made after 5PM AEST Tuesday 1 October, 2019 will not be formally marked as maximum late penalties will have occurred and a grade of 0 will be automatically applied.

### Return Date to Students

Week 10 Wednesday (25 Sept 2019)

Marks for the workbook will be made available via the ESSC13007 Moodle site no later than the set return date.

### Weighting

30%

### Assessment Criteria

The laboratory workbook will evaluate your ability to identify anatomical structures, describe human movement, and apply knowledge to interpret findings. Marks will be allocated to tasks completed in each laboratory session. The laboratory workbook will consist of questions pertaining to the following areas of functional anatomy:

- Identifying anatomical structures and describing movement
- Structure and movement of the torso/axial skeleton
- Structure and movement of the upper limbs
- Structure and movement of the lower limbs
- Posture and postural assessment
- Movement analysis of resistance exercise
- Observational gait analysis

The laboratory workbook must be submitted as a Word document (.doc or .docx). Any section that contains

handwritten/scanned answers will not be marked. Answers should be correctly referenced where appropriate and a list of references should be included at the end of the document. Mark allocations for each section of the laboratory workbook will be clearly outlined in the template file provided on the ESSC13007 Moodle site.

### **Referencing Style**

- [American Psychological Association 6th Edition \(APA 6th edition\)](#)

### **Submission**

Online

### **Submission Instructions**

The laboratory workbook must be submitted as a Word document (.doc or .docx). The file must be submitted to the correct assessment submission link via the ESSC13007 Moodle site.

### **Learning Outcomes Assessed**

- Using principles of kinesiology, identify and explain the relationships between anatomical structures, movement, and function
- Analyse exercises to identify muscles that are involved in producing and controlling movement

### **Graduate Attributes**

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence
- Ethical practice

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
