

EVST13014 *Freshwater and Marine Systems*

Term 1 - 2019

Profile information current as at 30/04/2024 10:13 pm

All details in this unit profile for EVST13014 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit you will focus on aquatic ecology with an emphasis on freshwater systems. You will develop an understanding of Australia's diverse and unique freshwater and estuarine systems, and their community and ecosystem dynamics, while developing communication and critical thinking skills relevant to research and industry employment. You will study the management of freshwater systems and develop skills required for field and laboratory work.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisites: BOTN12010 or ZOOL12009

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2019

- Mixed Mode
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Residential Schools

This unit has a Compulsory Residential School for distance mode students and the details are:

Click here to see your [Residential School Timetable](#).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: 25%

2. **Presentation**

Weighting: 25%

3. **Report**

Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Unit evaluation and verbal comments at residential school.

Feedback

ASSESSMENT Positive feedback was received regarding the assessment tasks and their reflection of course content. Students indicated that the seminar caused some anxiety but that the non-judgmental atmosphere made it enjoyable. Overall, the seminar was a worthwhile assessment as it helped support learning outcomes. The residential school in-class test received some criticism from students due to the increased study load. Students enjoyed the autonomy associated with the final assignment topic - a report following the field trip and data collection.

Recommendation

The unit will continue to be structured in the same format with similar assessment items. In particular, the seminar and the assignment should remain in the current format. The Unit coordinator should examine and consider an alternative to the in-class test.

Feedback from Student Unit evaluation

Feedback

LECTURES and CONTENT The lecture format was evaluated positively. The Lecturer received positive feedback.

Recommendation

Lectures and course materials should be offered in the same format.

Feedback from Student Unit evaluation and verbal comments during residential school.

Feedback

RESIDENTIAL SCHOOL The format and content of the residential school was evaluated positively on several occasions.

Recommendation

Residential school should be offered in the same format and should include engagement with industry.

Feedback from Student Unit evaluation

Feedback

UNIT FORMAT The Moodle site navigation was evaluated. A suggestion was made that it should contain tabs with topics not just dates.

Recommendation

The Unit Co-ordinator will include dates as well as topics in the weekly tabs to improve Moodle page navigation.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe the classification and features of aquatic habitats (including streams, lakes, estuaries and oceans)
2. Explain stratification and mixing processes and how they impact on the chemical composition of waters including nutrient cycles and gases
3. Discuss the ecology of the major components of aquatic biota, the relationships between them and the management of freshwater systems
4. Use standard methods to sample abiotic and biotic components of aquatic systems, analyse the data obtained, and interpret and communicate the results.

Schedule

Week 1 - 11 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 1 Introduction Study Guide Topic 2 Light, stratification and dissolved and suspended solids	Boulton et al. 2014 pp. 13-15, 27-36, 97-99 and scan Chapters 9, 10 and 11 for related issues. Boulton et al. 2014 pp. 21-30.	

Week 2 - 18 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 2 Light, stratification and dissolved and suspended solids Study Guide Topic 3 Gases and nutrients	Boulton et al. 2014 pp. 21-30. Boulton et al. 2014 pp. 45-52.	

Week 3 - 25 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Study Guide Topic 3 Gases and nutrients
 Study Guide Topic 4 Microbiology and algae

Boulton et al. 2014 pp. 37-40, 41-44, Figure 3.16.
 Boulton et al. 2014 pp. 50-51, 53-55, 55-58, 58-60.
 Boulton et al. 2014 pp. 80-81, 154-157, 271, 71-73, 76, 146, 255-256.

Week 4 - 01 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 5 Aquatic macrophytes	Boulton et al. 2014 pp. 74-77, 144-146, 39, 44, 54, 65, 75, 77-78, 84-85, 129, 159-160, 253-258, 283, 293-295.	

Week 5 - 08 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 6 Eutrophication	Boulton et al. 2014 pp. 253-258, 283, 293-295.	
Study Guide Topic 7 Freshwater macroscopic benthic animals	Boulton et al. 2014 pp. 81-84, 146-150, 154-158. Boulton et al. 2014 pp. 160-162, 164-168.	

Vacation Week - 15 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 22 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 8 Biotic Indices and monitoring programmes.	Boulton et al. 2014 pp. 275-277.	Report on a selected topic Due: Week 6 Monday (22 Apr 2019) 11:55 pm AEST Presentation Due: Week 6 Friday (26 Apr 2019) 11:55 pm AEST

Week 7 - 29 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
		Residential School 29 April to 2 May in Rockhampton

Week 8 - 06 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 9 Zooplankton	Boulton et al. 2014 pp. 82, 86-88 and 147-150.	

Week 9 - 13 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 10 Nekton Study Guide Topic 11 Basic ecotoxicology	Boulton et al. 2014 pp. 40 (Box 3.1), 64-66, Figure 4.2, 150-151, 152-154, 157, 167, 224, 226-227, 269-273.	

Week 10 - 20 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 12 Acid mine drainage and trace metals	Readings provided in resource materials on Moodle.	

Week 11 - 27 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Study Guide Topic 13 Pesticides Boulton et al. 2014 pp. 269-273.

Week 12 - 03 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic
Study Guide Topic 14 Ecosystem dynamics Study Guide Topic 15 Freshwater management	Boulton et al. 2014 pp. 66-70, 80, 86-88, 142, Figure 4-13, Box 4.4. Boulton et al. 2014 pp. 200, 221-226, Chapter 11.	Scientific report Due: Week 12 Friday (7 June 2019) 11:55 pm AEST

Review/Exam Week - 10 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Term Specific Information

Assessment Tasks

1 Report on a selected topic

Assessment Type

Written Assessment

Task Description

You are an environmental scientist, a new environmental issue has emerged in the catchment that you work in and you have been asked to provide a report on its likely impacts on local waterways and possible management actions.

You will choose one of six possible topics as the issue that has emerged in your catchment (choices will be provided on Moodle). In your report, you will relate the issue facing your catchment to factors including the classification and features of aquatic habitats, stratification and mixing processes, chemical composition of waters, the ecology of the major components of aquatic biota and management of aquatic systems.

Your report will be presented in the format of executive summary, introduction, main body, and conclusions, with correct and appropriate referencing. You have been asked to keep the report to a maximum of 2000 words.

Assessment Due Date

Week 6 Monday (22 Apr 2019) 11:55 pm AEST

Return Date to Students

Week 8 Friday (10 May 2019)

Weighting

25%

Minimum mark or grade

45%

Assessment Criteria

The assessment criteria include:

- Clear and concise writing in correct English, proper sentence construction, organisation of material and correct use of terminology (10%)
- Knowledge of physical, chemical and biological components of aquatic habitats, with focus on an identified environmental issue (20%)
- Ability to thoroughly research an environmental issue and possible management actions (30%)
- Presentation of logical arguments, supported by published evidence, on the likely impact and extent of the environmental issue, its effects on aquatic ecosystems and possible management solutions (30%)
- Correct referencing of material including tables, figures and literature (10%)

Please note that penalties will apply for reports that do not meet the required word limit (within 10% over and 10% under the limit). The word limit includes words in tables but not those in the reference list.

It is recommended that you choose your topic from the 6 possible topics early in the term and you must then put the title on the course Moodle discussion forum to ensure that not too many students choose the same topics.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Submission Instructions

Assignments must be submitted as either *.doc or *.docx files via Moodle

Learning Outcomes Assessed

- Describe the classification and features of aquatic habitats (including streams, lakes, estuaries and oceans)
- Explain stratification and mixing processes and how they impact on the chemical composition of waters including nutrient cycles and gases
- Discuss the ecology of the major components of aquatic biota, the relationships between them and the management of freshwater systems

Graduate Attributes

- Communication
- Problem Solving
- Critical Thinking
- Information Literacy
- Information Technology Competence

2 Presentation

Assessment Type

Presentation

Task Description

You will prepare and present a 12 minute PowerPoint presentation on the same topic as your report on an emerging environmental issue (Assessment 1).

The PowerPoint slides are to be submitted electronically via Moodle by Friday 26 April 2019 (prior to the residential school).

You will be required to deliver your presentation during the residential school. The format of the presentation session will be similar to a scientific conference, with 12 minutes to present and 3 minutes for questions.

You will be delivering the presentation to your colleagues, and you will have the opportunity to ask constructive questions and discuss the information presented by others.

Assessment Due Date

Week 6 Friday (26 Apr 2019) 11:55 pm AEST

Return Date to Students

Week 8 Friday (10 May 2019)

Weighting

25%

Minimum mark or grade

45%

Assessment Criteria

Your presentation will be assessed on:

- Relevance of content to a presentation format (60%)
- Clarity and conciseness of presentation slides and delivery, and adherence to time limit (40%)

Penalties will apply for presentations that take less than 10 minutes or more than 14 minutes to deliver. The key to successful presentations is adequate preparation.

It is recommended that you choose your topic from the 6 possible topics early in the term and you must then put the title on the course Moodle discussion forum to ensure that not too many students choose the same topics.

Referencing Style

3 Scientific report

Assessment Type

Report

Task Description

This assessment item will be a scientific report of the field trip carried out during residential school. Details of what is required will be made available on the Moodle site.

The report will be presented in the format of abstract, introduction, methods, results and discussion. Maximum 2000 words.

Assessment Due Date

Week 12 Friday (7 June 2019) 11:55 pm AEST

Return Date to Students

Exam Week Friday (21 June 2019)

Weighting

50%

Minimum mark or grade

50%

Assessment Criteria

The assessment criteria include:

- Clear and concise writing in correct English, proper sentence construction, organisation of material and correct use of terminology (10%)
- Knowledge of physical, chemical and biological components of aquatic habitats (20%)
- Appropriate description of methods, data presentation and analysis (30%)
- Ability to link together information from all of the physical, chemical and biological parameters measured to accurately describe the functioning of the aquatic system (15%)
- Logical discussion, supported by published evidence (15%)
- Correct referencing of material including tables, figures and literature (10%)

Please note that penalties will apply for reports that do not meet the required word limit (within 10% over and 10% under the limit). The word limit includes words in tables but not those in the reference list.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
