General Information

Overview

The impacts of human populations on the natural environment are well studied but little progress has been made to improve the sustainability of our lifestyle due to the complex interactions among social, economic and environmental imperatives. In Sustainability Issues and Solutions you will investigate the impact of human activities on a range of living and non-living, renewable and non-renewable natural resources. By applying 'Systems Thinking' you will practise developing solutions that are economically, socially and environmentally sustainable. On completion of this unit you will have a broad appreciation of the balances underpinning both temporal and spatial variation in sustainability and human efforts to control these.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Students would like more live Q&A sessions.

Recommendation

Continue to offer live Q&A sessions to students.

Feedback from SUTE

Feedback

Some student feedback considered there were too many assessment pieces, and the weighting of assessments could be changed.

Recommendation

Review the current assessment structure as it aligns with the unit learning outcomes, and determine where modifications can be made.

Feedback from SUTE

Feedback

Students expressed their appreciation for the lecture content and topics, but have suggested certain content could be updated.

Recommendation

Continue to review and update lecture content to see where further updates and new knowledge can be included.
