## General Information

### Overview

Organisational behaviour is the study of human behaviour at work. The complexity of human behaviour means that this inter-disciplinary field of study draws upon the literature from psychology, sociology, anthropology and political science. In this unit you will examine theories and the research base from the social sciences that inform the way in which individual level factors (e.g. personality, attitudes, emotion and motivation), team level factors (e.g. leadership and group dynamics) and organisational factors (e.g. structure and culture) combine to explain behaviour. You will learn about the role of workplace behaviour and its critical role in organisational outcomes such as productivity, innovation and absenteeism.
