General Information

Overview

On completion of this unit, you will be able to evaluate the evidence base for biochemical tests used in the diagnosis and monitoring of diseases in the major organ systems of the body. Problem-solving and decision making skills will be developed through the use of authentic case studies. Skill development in instrument calibration, best practice measurement, interpretation of test results and test quality control monitoring will occur through practical exercises. You will be required to attend a residential school in order to promote the development of unit learning outcomes. The residential school may be scheduled outside of the term of offering of the unit.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Staff feedback & Self reflection

Feedback

Some students found the unit content challenging.

Recommendation

Review and refine the unit content and delivery approach for future iterations to enhance student learning and engagement.

Feedback from Informal student feedback

Feedback

The Residential School was appreciated by students as it allowed them to put theory into practice.

Recommendation

Investigate the option of scheduling the Residential School earlier to align more effectively with the theoretical delivery of the unit.
