General Information

Overview

On completion of this unit, you will be able to evaluate the evidence base for haematological tests used in the diagnosis and monitoring of diseases in the major organ systems of the body. Problem-solving and decision making skills will be developed through the use of authentic case studies. Skill development in instrument calibration, best practice measurement, interpretation of test results and test quality control monitoring will occur through practical exercises. You will be required to attend a compulsory residential school on the Rockhampton campus to promote the development of unit learning outcomes. The residential school may be scheduled outside of the term of offering of the unit.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Students enjoyed Kahoot style quizzes throughout the term.

Recommendation

Continue to use Kahoots or similar style quizzes to encourage student participation in the live tutorials.

Feedback from SUTE

Feedback

Students felt that more case studies would be beneficial.

Recommendation

Consider increasing the number of clinical case studies in tutorials to improve student engagement and encourage active discussion.

Feedback from Self reflection

Feedback

Disconnect between theoretical learning from lectures with practical learning in tutorials.

Recommendation

Consider providing more practical skill exposure and clinical discussion of patients to improve assimilation of theoretical and practical knowledge.
