General Information

Overview

On completion of this unit, you will be able to evaluate the evidence base for haematological tests used in the diagnosis and monitoring of diseases in the major organ systems of the body. Problem-solving and decision making skills will be developed through the use of authentic case studies. Skill development in laboratory haematology testing, best practice measurement, interpretation of test results and quality control monitoring, as well as blood film morphology will be obtained through practical exercises at Residential school. You will be required to attend a compulsory residential school on your campus of enrolment, to promote the development of unit learning outcomes. The residential school may be scheduled outside of the term of offering of the unit.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Self reflection

Feedback

During marking of assessments, it was noted that there was a high level of GenAI use in two assessment items.

Recommendation

Consider redesigning the case study assessments to promote authentic student engagement with the learning outcomes and limit reliance on GenAI technologies.

Feedback from Student feedback in person.

Feedback

Residential school was a great learning experience and enhanced the overall understanding of the unit.

Recommendation

Continue to run residential school in the same format.

Feedback from Feedback in person, email and at residential school

Feedback

Industry sessionals were a great asset to residential school as they shared current industry experience with students.

Recommendation

Continue to engage current industry sessionals to provide updated knowledge and case studies to enhance student learning.
