LMED29001 *Genomic Pathology 1*
Term 2 - 2026

Profile information current as at 14/12/2025 04:12 pm

General Information

Overview

Molecular and cellular pathology involves the study of disease processes at the molecular level and allows diagnosis of disease through the detection of genetic mutations, dysregulated gene expression and non functional or cytotoxic proteins. In this unit, you will learn about the role of cellular genetic material and associated genetic rearrangements and mutations. You will explore the application of molecular techniques, such as polymerase chain reaction and next generation sequencing, and their revolutionary impact on diagnostic testing. The residential school may be scheduled outside of the term of offering of the unit.
