General Information

Overview

In this unit you will build upon your knowledge of normal and abnormal histopathological features for a range of tissues along with normal and abnormal cytopathological features of a range of cells. The relationship between cellular injury, immune response, tumour formation, infection and pathological dysregulation of tissue organisation will be explored in relation to clinical cases you may encounter. You will develop the knowledge and skill to advise on the investigation of disease and recommend further investigations that will include the latest techniques in immunohistochemistry and fluorescence imaging and molecular pathology.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit coordinator self reflection and SUTE data

Feedback

Informal quizzes based on images shown in tutorials help students recall their learning but require clearer guidelines.

Recommendation

Continue using image-based quizzes and provide additional resources to guide students on how to approach these quizzes.

Feedback from Self reflection

Feedback

Additional learning opportunities such as crossword puzzles and mock exam questions can complement learning and increase engagement.

Recommendation

Continue to provide these useful learning activities.
