MATH12227 Geometry

Term 2 - 2027

Profile information current as at 07/09/2026 09:34 pm

All details in this unit profile for MATH12227 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will learn and apply the concepts and properties of points, lines, angles, planes and polygons to solve geometry problems. You will determine the area, perimeter and properties of standard and composite shapes. Calculations of the surface area and volumes of polyhedra and composite solids are also studied. The application of geometry principles and concepts will allow you to develop solutions to applied mathematics problems. You will also analyse and synthesise geometry techniques, principles and concepts into a cohesive, valid and logically communicated solution using correct geometry terminology and notation, and mathematical language.
