

Profile information current as at 03/05/2024 06:22 am

All details in this unit profile for MATH13217 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

The unit covers topics in linear algebra, vectors and complex numbers. You will study matrices and operations, systems of linear equations, and different techniques to solve linear systems. You will also study vectors and operations in the 2D plane and 3D space, and applications in scientific analysis and modelling. Complex numbers and applications will be investigated in this unit too. A focus of this unit is to link linear algebra, vectors and complex numbers to contexts in science and engineering subjects in schools.

Details

Career Level: Undergraduate Unit Level: Level 3 Credit Points: 6 Student Contribution Band: 7 Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Prerequisite: MATH12224 Anti-requisite: MATH12172

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the <u>Assessment Policy and</u> <u>Procedure (Higher Education Coursework)</u>.

Offerings For Term 1 - 2022

Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

Regional Campuses Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

<u>Metropolitan Campuses</u> Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

 Written Assessment Weighting: 25%
Written Assessment Weighting: 25%
Examination Weighting: 50%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the <u>University's Grades and Results Policy</u> for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the <u>CQUniversity Policy site</u>.

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the <u>CQUniversity Policy site</u>.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Enquiry

Feedback

A few students asked for opening the face-to-face class in Rockhampton along with the online zoom class.

Recommendation

May consider opening face-to-face class in Rockhampton if more students are able to attend such class regularly in the future.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

- 1. Represent and solve mathematical and scientific problems using matrices and matrix operators
- 2. Solve systems of linear equations using different techniques of linear algebra
- 3. Analyse geometric relationships and kinematic behaviours of motion using vectors
- 4. Solve geometric and scientific problems using complex numbers
- 5. Communicate results, concepts and ideas in context using mathematics as a language.

Schedule

| Week 1 - 07 Mar 2022 | | |
|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------|----------------------------------------------------------|
| Module/Topic | Chapter | Events and Submissions/Topic |
| Unit introduction Fundamentals of matrices | Textbook - Advanced Mathematics for Engineering and Applied Sciences (4th Ed.): Sections 2.1.1-2.1.2.1 | Read Sections 2.1.1-2.1.2.1 Complete Week 1 exercises |
| Week 2 - 14 Mar 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |

| Matrix multiplications | Textbook - Advanced Mathematics for Engineering and Applied Sciences (4th Ed.): Section 2.1.2.2 | Read Section 2.1.2.2 Complete Week 2 exercises |
|---------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|
| Week 3 - 21 Mar 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Determinants and basic operations | Textbook - Advanced Mathematics for Engineering and Applied Sciences (4th Ed.): Section 2.1.3 | Read Section 2.1.3 Complete Week 3 exercises |
| Week 4 - 28 Mar 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| The inverse of a matrix | Textbook - Advanced Mathematics for Engineering and Applied Sciences (4th Ed.): Section 2.1.4 | Read Section 2.1.4 Complete Week 4 exercises |
| Week 5 - 04 Apr 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Linear systems and Cramer's rule | Textbook - Advanced Mathematics for Engineering and Applied Sciences (4th Ed.): Sections 2.2.1-2.2.3 | Read Sections 2.2.1-2.2.3 Complete Week 5 exercises |
| Vacation Week - 11 Apr 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Vacation Week (no class) | | |
| Week 6 - 18 Apr 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Gauss elimination and the method of inverse matrix | Textbook - Advanced Mathematics for Engineering and Applied Sciences (4th | Read Sections 2.2.4-2.2.5 Complete Week 6 exercises |
| | Ed.): Sections 2.2.4-2.2.5 | p |
| Week 7 - 25 Apr 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| | Textbook for MATH11246 (used in 2021) - Essentials and Examples of | Read Sections 8.1.1-8.1.2 Complete Week 7 exercises |
| Concepts and properties of vectors | Applied Mathematics (2nd Ed.): Sections 8.1.1-8.1.2 | Assignment 1 Due: Week 7 Wednesday (27 Apr 2022) 11:59 pm AEST |
| Week 8 - 02 May 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Multiplications of vectors | Textbook for MATH11246 (used in 2021) - Essentials and Examples of Applied Mathematics (2nd Ed.): Section 8.1.3 | Read Section 8.1.3 Complete Week 8 exercises |
| Week 9 - 09 May 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Applications of vectors | Textbook for MATH11246 (used in 2021) - Essentials and Examples of Applied Mathematics (2nd Ed.): Sections 8.2 | Read Section 8.2 Complete Week 9 exercises |
| Week 10 - 16 May 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Complex numbers in rectangular systems and applications | Textbook for MATH11246 (used in 2021) - Essentials and Examples of Applied Mathematics (2nd Ed.): Sections 9.1 & 9.4.1-9.4.2 | Read Sections 9.1 & 9.4.1-9.4.2 Complete Week 10 exercises |

| Week 11 - 23 May 2022 | | |
|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| Module/Topic | Chapter | Events and Submissions/Topic |
| Complex numbers in other systems | Textbook for MATH11246 (used in 2021) - Essentials and Examples of Applied Mathematics (2nd Ed.): Sections 9.2-9.3 | Read Sections 9.2-9.3 Complete Week 11 exercises |
| Week 12 - 30 May 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Unit review and examination preparation | | Assignment 2 Due: Week 12 Wednesday (1 June 2022) 11:59 pm AEST |
| Review/Exam Week - 06 Jun 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |
| Exam Week - 13 Jun 2022 | | |
| Module/Topic | Chapter | Events and Submissions/Topic |

Assessment Tasks

1 Assignment 1

Assessment Type

Written Assessment

Task Description

This is an individual assignment. This assignment is to test student's learning outcomes of topics studied in Weeks 1-6. The assignment details are provided on the Moodle website.

Assessment Due Date

Week 7 Wednesday (27 Apr 2022) 11:59 pm AEST

Return Date to Students

Week 9 Wednesday (11 May 2022) It is envisaged that feedback and solutions will be available in two weeks, or as soon as the marking process is completed.

Weighting

25%

Assessment Criteria

The final mark is out of 25. Questions are awarded the full marks allocated if they are error-free, partial marks if there are some problems, and no marks if not attempted or contain so many errors as to render the attempt to be without value. To ensure maximum benefit, answers to all questions should be neatly and clearly presented and all appropriate working should be shown. Assignments will receive NO marks if submitted after the solutions are released.

Referencing Style

• Harvard (author-date)

Submission Online

Submission Instructions

Submit one PDF or word file through the Moodle website.

Learning Outcomes Assessed

- Represent and solve mathematical and scientific problems using matrices and matrix operators
- Solve systems of linear equations using different techniques of linear algebra
- Communicate results, concepts and ideas in context using mathematics as a language.

2 Assignment 2

Assessment Type

Written Assessment

Task Description

This is an individual assignment. This assignment is to test student's learning outcomes of topics studied in Weeks 7-11. The assignment details are provided on the Moodle website.

Assessment Due Date

Week 12 Wednesday (1 June 2022) 11:59 pm AEST

Return Date to Students

Review/Exam Week Wednesday (8 June 2022) It is envisaged that the feedback and solutions will be available before the exam if all students submitted this assignment on time.

Weighting

25%

Assessment Criteria

The final mark is out of 25. Questions are awarded the full marks allocated if they are error-free, partial marks if there are some problems, and no marks if not attempted or contain so many errors as to render the attempt to be without value. Examination

Outline

Complete an invigilated examination.

Date

During the examination period at a CQUniversity examination centre.

Weighting

50%

Length 180 minutes

Minimum mark or grade 20 (40% of 50 marks)

Exam Conditions

Open Book.

Materials

Dictionary - non-electronic, concise, direct translation only (dictionary must not contain any notes or comments). Calculator - all non-communicable calculators, including scientific, programmable and graphics calculators are authorised

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the **Student Academic Integrity Policy and Procedure**. This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the <u>Academic Learning Centre (ALC)</u> can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Seek Help If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
