General Information

Overview

This unit builds upon the basic microbiological concepts learned in first year and applies them to an environmental context. In this unit you will learn about the various microbial groups and develop a sound understanding of their relevance and importance in both natural and industrial environments. This unit has a very applied and practical focus, covering both field and laboratory microbiological methods. You will learn and apply practical skills which also include employability skills in the area of microbiology.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE comments

Feedback

Students found the residential school to be very relevant to the unit and their learning

Recommendation

The residential school will continue in its current format.

Feedback from SUTE comments

Feedback

Some agriculture students felt this unit was not very relevant to their degree

Recommendation

This was the first year that agriculture students enrolled in this unit. I will look into probably adding modules specifically for agriculture students to make the unit more relevant to them.
