General Information

Overview

This is the fourth and final Imaging Procedures unit in the course. There are two main areas of focus for the unit - adaptation radiography and fluoroscopic procedures. You will build on your knowledge and skills from prior theory units and clinical placements and further develop your problem-solving skills in the planning and execution of imaging procedures on complex patients and in complex environments such as theatre, casualty and wards. A range of fluoroscopic procedures will be discussed with respect to goals, technique, environments and the radiographer's role. You will examine the critical contribution of interpersonal skills such as effective communication and teamwork to the radiographer's ability to perform effectively and efficiently in these procedure areas.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from MI team teaching team review and unit coordinator reflection.

Feedback

The written assessment contributed towards increased workload for staff and students.

Recommendation

Investigate the option of alternate assessment design and structure for the written assessment to identify opportunities for reducing complexity and workload for both students.

Feedback from Unit coordinator reflection and student feedback.

Feedback

Having the mobile assessment earlier in the term was well received by students.

Recommendation

Maintain the timing of mobile assessment to earlier in the term to ease the spread of assessment load on students throughout the term.

Feedback from Unit coordinator reflection

Feedback

The implementation of the in-class test instead of online open book test supported knowledge consolidation and ensured students demonstrated applied understanding.

Recommendation

Continue this assessment strategy in future iterations.
