MEDS13008 *Vascular Sonography*

Term 3 - 2027

Profile information current as at 07/09/2026 08:54 pm

All details in this unit profile for MEDS13008 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will introduce you to vascular sonography. In this unit you will explore the sonographic assessment of normal and pathological vascular cases. You will apply knowledge of vascular anatomy and physiology, and the physical properties of Doppler ultrasound to clinical scenarios and case studies to critically reflect on sonographic problems. Engaging in this sonographic decision-making process will culminate in the creation of sonographer's interpretive reports, including a provisional diagnosis.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from UC reflection, student feedback

Feedback

Some students struggled to maintain their studies during their 5-week placement block which resulted in them struggling to catch up before quizzes and tests.

Recommendation

The unit structure will be modified for next year's delivery to condense the content and allow content-free weeks for when students are on their five-week placement. Content weeks will include an oral examination, to be held during the first or second half of the term, depending on when students are on placement. This will significantly reduce student workload while on placement, allowing them to structure their learning more easily.

Feedback from UC reflection, student feedback

Feedback

Some students expressed a desire for more practise tests throughout term.

Recommendation

With the newly condensed delivery of the unit, the provision of additional practise tests will be explored.
