

MEDS20010 Fundamentals of Musculoskeletal Ultrasound

Term 3 - 2020

Profile information current as at 14/05/2024 05:23 pm

All details in this unit profile for MEDS20010 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit is an introduction to the theory and practice of basic soft tissue ultrasound imaging and is appropriate for science graduates and allied health / medical professionals wishing to use ultrasound as a focused diagnostic tool at the point of care. The unit will interest students engaged in, or studying towards, managing soft tissue injury and pathology, and is also useful to anyone who has interest in musculoskeletal imaging. You will develop knowledge of musculoskeletal ultrasound with emphasis on interpretation of anatomical structures, biomechanics, and pathology. You will study a range of anatomical structures and pathology which can mimic musculoskeletal conditions.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Co-requisite: MEDS20009 Science and Instrumentation of Ultrasound

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 3 - 2020

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Written Assessment**

Weighting: Pass/Fail

2. **Online Test**

Weighting: Pass/Fail

Assessment Grading

This is a pass/fail (non-graded) unit. To pass the unit, you must pass all of the individual assessment tasks shown in the table above.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from No source available.

Feedback

No student feedback was provided to develop recommendations from.

Recommendation

No recommendations.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe general anatomy, biomechanics and pathophysiology of the musculoskeletal system and related structures
2. Differentiate normal and simple abnormal ultrasound appearance of the musculoskeletal system and related structures
3. Differentiate ultrasound appearance of the musculoskeletal system from anatomical structures and pathology of other body systems
4. Interpret static and dynamic diagnostic ultrasound images to provide a provisional differential diagnosis.

This unit will not require external accreditation but will apply to appropriate profession specific bodies for recognition for Continuing Professional Development (CPD) related to Basic Soft Tissue Ultrasound.

Schedule

Week 1 - 09 Nov 2020

Module/Topic	Chapter	Events and Submissions/Topic
Introduction and Information about Assessment items	Lectures and notes on Moodle site.	

Week 2 - 16 Nov 2020

Module/Topic	Chapter	Events and Submissions/Topic
	Chapter 1 of prescribed text available from the library (digital copy) as a free download.	
Radiologic and sonographic terminology and technical requirements	Prescribed Textbook Ultrasound of the Musculoskeletal System 1 (2007) Authors: Stefano Bianchi and Carlo Martinoli	
	Additional readings and lectures on course Moodle site.	

Week 3 - 23 Nov 2020

Module/Topic	Chapter	Events and Submissions/Topic
Skin and subcutaneous structures	Chapter 2 of prescribed text. Additional readings and lectures on course Moodle site.	

Week 4 - 30 Nov 2020

Module/Topic	Chapter	Events and Submissions/Topic
Muscles and Fasciae	Chapter 3 of prescribed text. Additional readings and lectures on course Moodle site.	

Vacation Week - 07 Dec 2020

Module/Topic	Chapter	Events and Submissions/Topic
No content delivered this week. You can use this time to catch up if you need to.		

Week 5 - 14 Dec 2020

Module/Topic	Chapter	Events and Submissions/Topic
Tendons, sheaths and retinaculae	Chapter 3 of prescribed text. Additional readings and lectures on course Moodle site.	

Week 6 - 21 Dec 2020

Module/Topic	Chapter	Events and Submissions/Topic
Bursae and fat pads	Lectures and notes on Moodle site. Additional readings and lectures on course Moodle site.	

Vacation Week - 28 Dec 2020

Module/Topic	Chapter	Events and Submissions/Topic
Enjoy a Christmas and new year break.		

Week 7 - 04 Jan 2021

Module/Topic	Chapter	Events and Submissions/Topic
Nerves and Vessels	Chapter 4 of prescribed text. Additional readings and lectures on course Moodle site.	

Week 8 - 11 Jan 2021

Module/Topic	Chapter	Events and Submissions/Topic
Ligaments	Lectures and notes on Moodle site. Additional readings and lectures on course Moodle site.	

Week 9 - 18 Jan 2021

Module/Topic	Chapter	Events and Submissions/Topic
Bones and joints	Chapter 5 of prescribed text. Additional readings and lectures on course Moodle site.	E poster due Wed this week E-Poster Due: Week 9 Wednesday (20 Jan 2021) 9:00 am AEST

Week 10 - 25 Jan 2021

Module/Topic	Chapter	Events and Submissions/Topic
Soft tissue characterisation.	Lectures and notes on Moodle site. Additional readings and lectures on course Moodle site.	

Week 11 - 01 Feb 2021

Module/Topic	Chapter	Events and Submissions/Topic

Interventional techniques

Chapter 18 of prescribed text.
Additional readings and lectures on
course Moodle site.

Week 12 - 08 Feb 2021

Module/Topic	Chapter	Events and Submissions/Topic
Revision and online test		Online Test Open: Wednesday 10th February, 2021, 9:00 am, AEST.

Exam Week - 15 Feb 2021

Module/Topic	Chapter	Events and Submissions/Topic
		Online test shuts Wed 17th February, 2021, 9:00 am AEST.
		Online Test Due: Exam Week Wednesday (17 Feb 2021) 9:00 am AEST

Term Specific Information

The unit coordinator for this unit is Michelle Fenech.
Please contact m.fenech@cqu.edu.au for any further information.
Tutorial times will be worked out once the term commences.

Assessment Tasks

1 E-Poster

Assessment Type

Written Assessment

Task Description

In your role as a health professional you may be asked to complete a presentation, for example, at a conference where e-posters are common. In this assessment task you will develop skills associated with producing an e-poster which will enable you to undertake this task for any topic.

You are required to develop an educational e-poster that clearly presents the use of ultrasound to examine a specific musculoskeletal (MSK) structure or pathology.

- The presentation must be limited to eight (8) slides excluding the title and reference slides
- An abstract is required to accompany the e-poster, but not included within the poster
- The e-poster should be written at a level suitable for presentation at a conference
- You must state which conference you would intend it to be presented to (nominate your intended audience)
- The first slide should be the title slide which should contain the title of the presentation, your name and qualifications
- Each content slide should have clear headings and be presented in a logical, clear and visually appealing fashion
- The area outlined in the poster should be clinically relevant to the practice of musculoskeletal sonography
- The anatomy, sonographic appearance of normal and abnormal structures, and a discussion of why the examination may be undertaken along with the pathology that may be encountered in the region should be discussed.

You are required to have researched, analysed, critically reflected on and synthesized current medical literature from peer reviewed sources. A high level of communication needs to be utilized to convey a clear message with all anatomical images being of high quality, well labelled and correctly referenced. Please note all slides are required to be in 'landscape' format.

Assessment Due Date

Week 9 Wednesday (20 Jan 2021) 9:00 am AEST

Return Date to Students

Week 11 Wednesday (3 Feb 2021)

Results will be available in the Moodle site with feedback.

Weighting

Pass/Fail

Minimum mark or grade

50%

Assessment Criteria

Your e-poster will be assessed on academic writing quality and should address the following points;

- The e-poster should contain organized, logical and coherent content with a clear and concise message
- Please use numbers and bullets to highlight points. Your poster will be assessed on the accurate use of spelling, grammar and terminology suitable for the target audience
- Content of e-poster - the purpose of the poster should be clear and relevant to the field of musculoskeletal sonography
- The anatomy, sonographic appearance and pathophysiology of a particular structure or tissue should be presented with diagrams and images used to support the discussion
- Evidence based content must be used.

Suitability for presentation - The e-poster should be suitable for presentation at the chosen conference and the subject matter relevant to the selected audience. Referencing - In-text references and the reference list must be all accurate, complete and in the correct Vancouver style with high quality and appropriate sources utilized.

The marking rubric to be used for this assessment is available on the unit Moodle site.

Learning Outcomes Assessed

- Differentiate ultrasound appearance of the musculoskeletal system from anatomical structures and pathology of other body systems
- Interpret static and dynamic diagnostic ultrasound images to provide a provisional differential diagnosis.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Self-management

2 Online Test

Assessment Type

Online Test

Task Description

Health professionals are required to possess a body of knowledge that is relevant to their scope of practice whereby fundamental knowledge is required to be understood and then be built upon clinically. To demonstrate your understanding and knowledge of this unit you are required to complete an online test.

- This test must be accessed through the assessment tab on Moodle and will comprise 10 questions addressing multiple weeks of content requiring written responses to be completed in a 90 minute time frame.
- The test will be open from Wed 9am (AEST) Week 12 (10th February, 2021) and will close on Wed 9am (AEST) Review/Exam week (17th February, 2021).
- You will need to allocate a 90 minute period throughout the time the test is open in order to complete the test.
- The test will be open for 90 minutes (allowing 9 minutes per question) with only ONE attempt being allowed
- Once started the test cannot be paused, stopped, re-started or re-taken
- Questions will be drawn from a pool of questions to allow each student test to be unique whilst addressing the same learning outcomes for each student. Image viewing questions may be included and you are required to be familiar with normal and pathological sonographic imaging of the areas discussed in this unit

This assessment is to be undertaken as an individual. As with all other university examinations, colluding with other

students on non-group work tasks is considered academic misconduct and may lead to action being taken by the University.

Assessment Due Date

Exam Week Wednesday (17 Feb 2021) 9:00 am AEST

The online test will be automatically submitted at the completion of the test or once the time limit is reached, whichever occurs first.

Return Date to Students

Results will be available in the unit Moodle site.

Weighting

Pass/Fail

Minimum mark or grade

50%

Assessment Criteria

You must provide short to medium length typed responses to a series of online questions.

Image viewing questions may be included and you are required to be familiar with both normal and pathological sonographic appearances.

The test will comprise of 10 questions with each question worth 10 marks (giving a maximum of 100 marks available)

Responses will be assessed according to:

- use of appropriate terminology and descriptors as well as grammar, spelling, relevance of response and competence in addressing all elements of the question
- the ability to appropriately interpret sonographic images and then to succinctly compose an appropriate response based on their learning from the unit.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
