General Information

Overview

The purpose of the Medical Science Research Project 2 unit is to provide you with further training in research as you continue projects begun in Medical Science Research Project 1. This unit requires you to independently report on the investigation of the research question proposed. The final journal paper will typically contain the data analyses, results, and discussion in addition to a cogent literature review and hypotheses. It is anticipated that some journal papers may be suitable for eventual publication in an appropriate journal with the academic involved named as co-author. In all stages of the project you must adhere to appropriate ethical and professional standards.

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Students liked regular communication from the unit coordinator that aligned with the weekly milestones.

Recommendation

Continue to post the weekly "tip of the week" and consider aligning with other Q&A student posts on the Learning Community.

Feedback from SUTE

Feedback

A minority of students did not explore resources on Moodle sufficiently and would have preferred the unit coordinator to provide answers to their questions directly, rather than being directed to where the answer is addressed in learning material on the Moodle site.

Recommendation

Consider exploring methods to further engage students in the learning material as complexity of some concepts are best understood from lectures or tutorial discussions and cannot be distilled easily to a short written answer.
