MEDS28001 *Musculoskeletal Sonography*

Term 1 - 2026

Profile information current as at 05/12/2025 02:13 pm

All details in this unit profile for MEDS28001 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit introduces you to the principal theories in musculoskeletal sonography. In this unit you will apply your knowledge of detailed relational anatomy and pathophysiology, and correlate this with new knowledge on sonographic appearance, scanning orientation and scanning skills relevant to the musculoskeletal system. You will demonstrate understanding of the clinical indication of musculoskeletal ultrasound, applying clinical reasoning in planning for the scanning protocol for each individual patient and implementing patient care and safety in performing musculoskeletal sonography. You will interpret static and dynamic musculoskeletal sonographic imaging and create a provisional diagnostic report as well as explaining differential diagnosis and alternative diagnostic studies based on the clinical information.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE data, email communication

Feedback

Students appreciate the unit content being well-structured and informative.

Recommendation

Maintain the structure of unit content and continue updating the newest knowledge for students.

Feedback from SUTE data, student reflection

Feedback

Students would like to have more time between the submission of the two components of their written assessment.

Recommendation

Consider increasing the time between the submission of the two components of their written assessment to assist with the added time pressures students feel when on full-time clinical placement.

Feedback from SUTE data

Feedback

Students would like to have more practice on MSK anatomy on ultrasound images.

Recommendation

Consider adding more interactive practice in tutorials on sonographic anatomy of Musculoskeletal (MSK) structures.
