General Information

Overview

This unit examines the interrelated topics of personal and business ethics and business sustainability. It critically reviews the socio-cultural environment in which business operates and how this can change dramatically between countries and cities. Ethical frameworks for managerial decision-making are critiqued with reference to various stakeholder groups and you will examine the debates surrounding sustainable development as they impact on organisations in their local and global contexts. The interactions between personal ethics and how ethics is managed within an organisation are also considered. Technological, societal and cultural sources of ethical challenges are reviewed and cases will be discussed outlining how various organisations might respond to these challenges.
