General Information

Overview

This unit introduces the principles and practices of critical thinking and effective decision-making in contemporary business and organisational contexts. You will explore how reasoning, reflection, and evidence-based analysis underpin sound managerial judgment and problem-solving. The unit develops your ability to construct and evaluate arguments, apply decision-making frameworks, and critically assess the influence of cognitive biases and rational thinking on decision quality. You will examine the integration of digital transformation, artificial intelligence (AI), and data-driven insights in managerial decision making, and assess both the opportunities and limitations of these technologies. The unit also foregrounds ethical reasoning, cultural awareness, and Indigenous perspectives on decision making, encouraging inclusive and values-based approaches to complex business problems. By engaging in individual and group activities, you will strengthen your skills in analytical reasoning, persuasive communication, and collaborative problem solving. You will also reflect on emerging trends shaping the future of decision making, including cognitive computing and human–AI collaboration, to prepare for leadership in an increasingly digital and interconnected world.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Unit coordinator's observation

Feedback
Students prefer a prescribe text.

Recommendation
It is difficult to find a textbook that covers the topics of this unit. A compilation of articles and some book chapters could be prepared as readings. This could be delivered through the CQU bookshop.

Feedback from SUTE

Feedback
Students valued case study based learning and practical knowledge enhancement through workshop activities.

Recommendation
Continue incorporating practical activities including the application of diagnostic tools and decision-making frameworks.

Feedback from SUTE

Feedback
Students liked constructive assessment feedback as it helped them understand their limitations in critical thinking and the competencies they are required to gain.

Recommendation
Continue strengthening assessment feedback. Provide clear and constructive and actional strategy to support students. Revise the marking criteria and marking rubric.
