General Information

Overview

This unit will introduce you to fundamental principles and elements of visual design and how these can be applied in digital environments. You will develop an understanding of design as a visual language, become immersed in design thinking, and become proficient in visual communication for digital production. As you develop skills with industry-standard software tools such as Adobe Illustrator and Adobe Photoshop, you will work individually and collaboratively to create innovative solutions to design problems.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Informal discussions with Digital Media team colleagues

Feedback

Course content should include more discussion of intellectual property and ethical issues around generative AI and design.

Recommendation

Update and expand content relating to intellectual property and ethical issues around generative AI and design.

Feedback from Informal discussions with Digital Media team colleagues

Feedback

Adobe Illustrator now incorporates a standardized way of working with generative AI. This method should be covered in the Unit teaching materials and the use of generative AI should be incorporated into one of the assessable exercises.

Recommendation

Use of Adobe Illustrator's AI tools will be taught. One of the assessable exercises will be modified to require students work with generative AI in Illustrator.
