General Information

Overview

This unit facilitates the development of the knowledge and skills required for the safe administration of medications, including evaluation of therapeutic effects and/or adverse reactions post administration and relevant nursing and patient education considerations. You will critically examine the role of the nurse in the preparation and administration of medicines and other therapeutic substances. You will examine the pharmacodynamics and pharmacokinetics of common medications and polypharmacy considerations. In addition, you will apply legal, ethical and best practice principles in the safe administration of medication and other therapeutic substances (e.g. oxygen, blood and blood products) including proper use of related devices. You will also engage in electronic medication management systems, and address patient education and engagement in medication management.
