

NURS13135 *The Professional Nurse*

Term 2 - 2019

Profile information current as at 06/05/2024 10:50 pm

All details in this unit profile for NURS13135 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit you will consolidate knowledge gained throughout the Bachelor of Nursing course and be introduced to concepts aimed at transitioning you to the registered nurse role. You will build on your critical thinking and clinical reasoning skills through the development of professional, legal and ethical knowledge to facilitate safe delivery of nursing care to individuals, families and communities. This unit will provide you with theoretical knowledge that will complement Clinical Nursing Practice 5.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: *12*

Pre-requisites or Co-requisites

Pre-requisites Students must have completed 120 credit points and NURS13133 Clinical Nursing Practice 4 or NURS13126 Critical Care Nursing

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2019

- Bundaberg
- Online
- Rockhampton

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Survey

Feedback

I found this Unit very relevant to the next step in my nursing career. Unfortunately, I was not able to attend the weekly Zoom Sessions due to work commitments. Thank you to my Lecturers for providing a very informative and interesting Unit.

Recommendation

We have worked to create a unit that assists in preparing students for their impending Graduate year and this feedback supports that this purpose is noticed. Zoom sessions were only during business hours in 2018 - the feedback of evening sessions is noted and will be considered for the 2019 offering. Please note the Zoom sessions were recorded and students had the ability to watch them at their convenience and then post any questions generated to the forum for reply.

Feedback from Student Survey

Feedback

Assignments were interesting. Plenty of learning materials. Assignment feedback was helpful. Good prep for professional nursing.

Recommendation

The assignments were all newly generated for the 2018 and focused explicitly on preparing students for the transition to Graduate RN and professional practice. This feedback has reinforced to the coordinating team that authentic assessment in this area is paramount for the unit.

Feedback from Student Survey

Feedback

While I understand the volume of work that the lecturers have is enormous, I feel a little bit more time between receiving feedback and the due date of the following assessment would be highly beneficial.

Recommendation

Feedback was monitored to ensure it was directive and sufficient to allow the student improvement for the subsequent assessments as per item 4.30 Assessment policy - Feedback related to the assessment criteria may be provided individually or to a group. Feedback must also be sufficiently detailed to identify strengths and deficiencies, and suggest how performance can be improved without discouraging self-reliance in learning and assessment. Turn around time was in accordance with university policy 4.19 - Students must receive feedback on assessment tasks allowing time for students to benefit from the feedback and to receive academic support before the next assessment task must be submitted. Feedback was back to students with 14 days, however we will look at spacing the two written assessments further apart in 2019.

Feedback from Student Survey

Feedback

I have struggled with the workload of having two double-weighted subjects with a six week placement toward the end of the term.

Recommendation

The Moodle weeks were open from week 1 and assessment were advised from week 1 primarily because students were out on large clinical placement all throughout the term. The strategy to open all learning for all weeks, as outlined to the students in the week 1 zoom, was so that student who had a late clinical placement could adjust their workload and time management assessments with a clear picture of all information and all assessment due dates. Quite a few students who had late placements (after week 6) actually had started looking at assessment earlier as evidence through the forum posts in preparation of being organised during their clinical placement obligations. We will consider the assessment breakdowns again in preparation of the 2019 offering.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Analyse the professional, legal and ethical governance and their application to the leadership role of the registered nurse.
2. Critique conflict and change management strategies within organisational cultures and the impact this may have on nursing and members of the multidisciplinary team.
3. Consider the transitional challenges and coping strategies required by the graduate registered nurse entering the workforce.
4. Define the scope of practice and the delegation roles of the registered nurse and integrate these into nursing practice.

The learning outcomes are linked to the Australian Nursing and Midwifery Accreditation Standards for registered nurses and the Nursing and Midwifery Board of Australia competencies.

Assessment Tasks

1 Assessment 1 - Online Quiz

Assessment Type

Online Quiz(zes)

Task Description

The multiple-choice online quiz will test your understanding of fundamental concepts, perspectives, and facts covered over the first 3 weeks of term. There will be 20 multiple-choice questions to be answered in 60 minutes. There is only one correct or best answer to each question, and you need to select the option corresponding to this answer.

While you can refer to the textbook or other resources while you are taking the quiz, it is not possible to do this for every question because of the time limit. Therefore, you need to have a good understanding of the unit content, including the core readings, before taking the quiz. Each student will receive a customized quiz, where questions are randomly generated from a large test bank so that collusion will not be possible.

Total Percentage	30%

Details

All tasks relate to the following scenario. The scenario is to be used as the stimulus for your short answer responses.

Scenario

A graduate registered nurse (GRN) is working in specialist clinics at the hospital. A renal failure patient presents to the clinic for a follow-up appointment after having a urinary tract infection. The GRN places a blood pressure cuff on the patient's arm, and at that moment detects the 'thrill' from a dialysis fistula. As the GRN is removing the cuff to measure the blood pressure on the other arm, a colleague abruptly states "The patient has a fistula in that arm. Don't use it!" This happens in front of the patient and their family. The GRN is embarrassed and does not respond. Later in the shift the GRN avoids sharing information with the colleague about a patient's vital signs as they are worried the colleague will be rude to them again.

Reflection plays an important role in analysing events in the workplace and can be useful when you are faced with difficult working conditions or environments.

Consider the situation outlined above:

- discuss the involvement and feelings of the GRN;
- discuss the involvement and role of others;
- identify key issues;
- discuss the implications for practice and
- outline the potential personal learning for the GRN.

Task 1 (500 words)

The National Safety and Quality Health Service Standards (2017) state that "communication is inherent to patient care" (p 49) and the above scenario could be considered as a situation where critical information about the patient is being communicated.

- Describe how feelings of insecurity could affect communication with this colleague?
- Discuss how being in a difficult situation like this scenario could be managed to avoid conflict?

Task 2 (500 words)

The culture of a health care organisation can powerfully influence its ability to manage human resources and serve patients, and ultimately has a strong impact on its economic performance (Day, 2016, p. 58).

- Describe the features of organisational culture in health care.
- Discuss the culture in the scenario above and the practical actions you could take to improve that culture.

Task 3 (500 words)

Notes to Students

- Include a title page-student name, student number, unit code, term/year, name of unit coordinators, name of assignment and due date for submission
- Write in third person (refer to the Graduate Registered Nurse)
- Use the scenario provided to provide context for your responses
- Refer to the marking criteria.
- Essay format includes introduction, body paragraphs and conclusion. Use double line spacing, Times New Roman, size 12 font
- Include header with student name and number and page numbers
- Use headings to indicate the task you are responding to.
- Include an introduction and conclusion
- Use normal paragraph structure in your response to each task (2 or 3 paragraphs per task)
- It is expected that you use academic, peer reviewed articles/journals. NB: Journal articles used must be less than 5 years old and textbooks less than 10 years old. Credible websites are acceptable (not .com sites)
- A reference list that adheres to APA presentation guidelines and indicates that you have read widely must be included

Details	<p>Despite completing their degree and gaining registration, newly graduated registered nurses often describe a feeling of being unprepared for their new profession. This feeling can range from somewhat uncomfortable to highly shocking and it can have a significant impact on staff retention in the workplace. The following case study shows the reaction of one graduate when she begins her new job in a busy medical ward.</p> <p>Journal Entry 8th May 2018: <i>Today during my shift I had to use the hoist to lift Mr B from his bed to a chair. I thought I should be able to do this by myself. Mr B has had major abdominal surgery and now he has intravenous therapy, an indwelling catheter, a wound drain and a large wound from his incision site. While I was trying to get Mr B up in the hoist, I ended up getting all his drips and drains in quite a tangle. Mr B seemed to find it quite painful and he struggled against being lifted in the hoist. I found that the reality of lifting a patient in a clinical setting compared to what we practiced in the learning space at university is quite different. I should have asked for help, but I didn't want my buddy to think that I could not do my job.</i></p>
Task	Consider the transitional challenges that Karen is experiencing on entering the workforce. Identify and discuss the occupational health and safety issues involved in this example for both Mr B and Karen. Identify why Karen may have reacted to completing a task in this way. Use current literature to discuss how you think this situation could have been prevented.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
